Diversifying Expanding Excelling

EaseMyTrip, the leading Online Travel Agency (OTA) in India, is a one-stop travel ecosystem, offering innovative 'end-to-end' travel solutions and unforgettable journeys, having served over 30 Mn+ premium users across India and internationally. Leveraging our deep understanding of evolving customer expectations, we have moved beyond air travel to new verticals such as buses, hotels, holidays, and cruises and are scaling differentiated verticals, reinforcing our growing visibility on the global stage.

As a trailblazer in India's travel landscape, we have remained bootstrapped since inception and hold the rare distinction of being the nation's first bootstrapped OTA to go public. Led by dynamic leadership, a de-risked business model and cutting-edge technology, we are recognised among India's elite unicorn club and are one of the few listed new-age tech companies with a proven track record of consistent profitability. Customer-centric innovations such as zero convenience fees and full refunds underscore our ongoing commitment to delivering unique, value-driven travel experiences for our customers.

Capitalising on growing demand across emerging and mature markets, we continue to strengthen our domestic footprint through strategic initiatives, key collaborations and focussed brand building. Simultaneously, strategic acquisitions and targeted investments across key regions have accelerated the reach and scale of our international business.

As the fastest growing travel platform, we embark on the next phase of our journey – diversifying to fuel opportunities, expanding with strategic direction and delivering excellence to build a future-ready, sustainable travel and tourism ecosystem.

Driving Excellence with Strategic Focus

Dear Shareholders,

FY 2024-25 was a pivotal year for EaseMyTrip as we strategically explored organic and inorganic growth opportunities, reinforcing our commitment to innovation, customer satisfaction, profitability and responsible growth, fortifying our market leadership and setting the stage for continued success.

I, Nishant Pitti, am both honoured and thrilled to take on the role of the Chairman & Managing Director while continuing my journey as Co-founder of EaseMyTrip. I look forward to continuing the Company's next phase of growth and transformation.

Nishant Pitti

Chairman

INDUSTRY OVERVIEW

The Indian travel and tourism sector remained a key facilitator of the nation's economic momentum in FY 2024-25, contributing to increased foreign exchange earnings (FEEs) and employment generation. India witnessed an estimated 9.66 Mn Foreign Tourist Arrivals (FTAs) in 2024, generating ₹ 2,77,842 Cr in FEEs, indicating a 19.8% increase. Domestic airline passenger traffic reached 145.42 Lakhs in March 2025, compared to 133.68 Lakhs during the previous year corresponding period, registering a 10.35% YOY growth. Additionally, ₹ 2,541.06 Cr were allotted under the Union Budget 2025-26 to boost the sector's growth. Proposed government initiatives such as MUDRA loans for homestay operators and Bharatiya Vayuyan Vidheyak for the aviation sector are expected to further stimulate broad-based growth, creating a more robust and vibrant travel and tourism ecosystem.

PERFORMANCE REVIEW

In FY 2024-25, we focussed on scaling our business profitability while delivering continued value to our customers. Our Gross Booking Revenue (GBR) reached ₹ 86,916 Mn in FY 2024-25, up from ₹ 85,126 Mn in FY 2023-24, reflecting a steady 2.1% YOY growth, while we generated Revenue from Operations of ₹ 5,873 Mn. Our continued focus on operational excellence enabled us to attain an

EBITDA of ₹ 1,612 Mn while our PAT stood at ₹ 1,087 Mn, underscoring our steadfast commitment to profitable and sustainable growth.

Amid global headwinds impacting travel demand and heightened competition in the OTA market, we achieved meaningful outcomes by leveraging our robust business model, core capabilities, operational discipline and strategic priorities.

Dedicated to diversifying revenue streams, we expanded into non-air verticals such as buses, hotels and cruises as well as emerging segments like healthcare and education. This expansion focus helped strengthen our market position, resulting in strong growth in our non-air business. Our hotel and holiday package bookings registered an impressive 81% increase YOY, reaching 9.4 Lakhs in FY 2024-25 compared to 5.2 Lakhs in the previous year. Simultaneously, bookings in trains, buses and our other segments increased from 10.4 Lakhs in FY 2023-24 to 13.0 Lakhs in FY 2024-25, indicating a YOY increase of 25%. Our non-air segment growth was fuelled by cross-selling, competitive pricing and an extensive hotel inventory, backed by dedicated in-house and work-from-home sellers.

Stayed committed to delivering innovative, customer-centric solutions, we diversified our portfolio and scaled differentiated verticals, introducing more personalised offerings. From improving

user experience to providing excellent customer service and alternative travel destinations, we remained focussed on creating memorable customer experiences during the fiscal year. Additionally, our targeted brand building initiatives also played a key role in enhancing our customer reach, brand visibility and maintaining cost efficiency. With a total marketing spend of 1.1% of the GBR, these spends contributed to our strong overall performance and profitable growth.

We continued to expand our domestic footprint in FY 2024-25. Our newly launched offices in Gurugram and Mumbai mark a significant step in our offline expansion journey, strengthening our operational capabilities and deepening our presence in key markets. Additionally, we continued to aggressively scale our franchise network, adding 25 stores across pan India, to tap into the growing demand for travel, especially in Tier II and Tier III regions. This expansion reflects EaseMyTrip's commitment to bolstering our offline presence to around 100 additional stores by 2025 while offering comprehensive travel solutions to a diverse customer base.

Internationally, our strategic focus on expanding our global footprint led to robust growth in our international business. This growth was primarily driven by strong momentum in our Dubai operations, with GBR rising to ₹ 7,014 Mn in FY 2024-25 from ₹ 2,050 Mn in FY 2023-25, a whopping 242% YOY

increase. To further strengthen our presence in the global travel space, we established wholly-owned subsidiaries in Brazil and Saudi Arabia while increasing investments in our UAE and US operations. We are proud to share that we secured the prestigious IATA GoGlobal accreditation in this fiscal year, marking a major milestone in our international expansion journey. The accreditation validates our compliance with global standards and reinforces our readiness to scale international operations while delivering exceptional value to customers worldwide.

EXPANSION HORIZONS

Guided by experienced leadership, we continued to implement groundbreaking, driving innovation to meet changing market and customer dynamics, expand reach and drive responsible growth. Supported by cutting-edge technology, a dedicated team, and strong market positioning, these efforts are closely aligned with our long-term vision to build a scalable and sustainable global travel ecosystem.

As part of our strategic move to maintain a well-diversified portfolio and commit to India's broader sustainability goals, we made bold forays into high potential and differentiated verticals during the year. We ventured into the electric bus manufacturing market by launching a new subsidiary, Easy Green Mobility. With Yolo Bus, our other subsidiary, as its operational front, Easy Green Mobility plans to initially manufacture 4,000-5,000 electric buses, redefining intercity travel while supporting clean mobility. This strategic development was further bolstered by the securing of an electric bus tender from the Madhya Pradesh Government, underscoring our diversification into the public electric mobility sector to build a smart future-ready transport infrastructure.

Maintaining our innovative streak, we ventured into the experiential travel space with the launch of EasyVijay, an immersive AI-powered battlefield initiative featuring veteran-led journeys and historic moments. We partnered with Ayodhya Development Authority through EasyDarshan to enhance pilgrim infrastructure through the Theerth Yatri Sewa Booth in the fiscal year. We also acquired Planet Education Australia to offer tailored student travel solutions and capitalise on rising global demand for international education-linked travel.

During the year, we furthered our commitment to responsible growth

through key partnerships. We joined the ONDC network to drive India's digital commerce transformation, launching ScanMyTrip.com - India's first marketplace on the ONDC Network. It has empowered OTAs, MSMEs and homestays list/sell their products/services, making us the first OTA to both buy from and sell on the ONDC platform. We entered into a partnership with SIDBI and Uttarakhand Tourism to provide the Homestay Entrepreneurship Training Programme for 150 homestay owners along the Chardham Yatra route. To further promote eco-friendly travel, we teamed up with BNZ Green to introduce real-time carbon footprint tracking and blockchain-based carbon credits. We signed a strategic MoU with the Uttar Pradesh EcoTourism Development Board to support 904 homestays and key tiger reserves, creating unique tourism packages. The strategic tie-up between EaseMyTrip Foundation and Jacqueline Fernandez-led YOLO Foundation to ensure timely quality medical support and transportation for sick and injured animals, reinforced our commitment to community welfare.

In FY 2024-25, we advanced customer experiences through technology-driven innovation and strategic collaborations. We launched EMTDesk, a comprehensive corporate travel platform offering real-time tracking, expense management and sustainability tools and EMTMate to enable seamless booking and support for travel agents and agencies. Leveraging AI, we established smart voice recognition, dynamic pricing and customised recommendations to simplify travel planning. Key collaborations include a unique giveaway with CARS24, a card management interface with Hyperface and a senior citizen-centric partnership with Sukoon Unlimited to offer tailored travel assistance. We also expanded user convenience by integrating travel booking with OLX India and PhonePe, reaching millions with exclusive deals. We also launched our first co-branded travel debit card with Bank of Baroda to deliver premium benefits and airport lounge access. Meanwhile, by initiating partnerships with Adani Digital Labs and Google Wallet, we aim to revolutionise duty-free shopping and travel management, a testament to our dedicated focus on delivering effortless, personalised, and memorable travel journeys.

We curated creative and targeted marketing campaigns to deliver unmatched travel deals and experiences to our growing customer base.

Notable campaigns include our 16th Anniversary Sale, Easy Summer and Independence Day, among others, all offering exclusive discounts and deals. In a strategic development, we onboarded Jacqueline Fernandez as our brand ambassador as part of a long-term partnership, aiming to strengthen our brand recall while targeting new customers. During the year, we continued to sponsor major events such as the World Championship of Legends and the IIFA Festival. We also undertook key collaborations, including with retail partners like Shoppers Stop and cross-industry partnerships with Swiggy and SpiceJet to enhance engagement and deepen reach nationwide.

Additionally, we accelerated our domestic outbound travel growth by forging strategic partnerships, including with New Zealand, Korea, Sabah and Penang tourism boards. Focussed on Tier II and Tier III cities, these alliances deliver tailored packages, co-funded campaigns and dedicated microsites, boosting visibility and bookings. We also resumed our Maldives bookings after improved bilateral ties to fuel further expansion.

WAY AHEAD

We move ahead with great excitement, backed by tailwinds in the domestic economy and India's travel and tourism segment, which is expected to contribute US\$ 512 Bn to India's GDP by 2028. This growth is anticipated to be led by a growing middle class, rising discretionary spending, increased digital penetration, a focus on offering diverse travel experiences such as spiritual tourism and proactive government policies.

As the fastest growing OTA, we continue to evolve, sharpening our focus on non-air segments and growing traction in international markets. By enhancing customer offerings, building niche leadership across each travel vertical and deepening our product suite, we aim to craft superior travel journeys while driving mutual progress for all stakeholders.

In conclusion, I sincerely thank all our stakeholders for believing in our vision to deliver continued innovation and consistent value, empowering travelling globally in an ever-evolving landscape.

Extending international business

Accelerating growth across non-air verticals

Driving sustainable growth and delivering consistent stakeholder value

Unlocking the Future of Travel

Empowered by seasoned leadership, robust infrastructure and game-changing strategies, we stay ahead of shifting market dynamics and evolving customer needs while driving responsible growth. Through innovative and diversified solutions, we are also increasingly expanding our reach across non-air segments to build a future-ready, interconnected and sustainable travel landscape.

In FY 2024-25, we achieved strong year-on-year growth across our non-air verticals, including hotels and holiday packages and trains, buses and other segments. This momentum was fuelled by cross-selling, competitive pricing, and an extensive hotel inventory, supported by dedicated in-house and work-from-home sellers. We also diversified our portfolio, scaled differentiated verticals and deepened our presence across key domestic and international markets to offer tailored offerings, enhance user experiences, while strengthening reach and driving profitable growth.

Scaling Our Global Footprint

Aligned with our global expansion strategy, we capitalised on travel demand across emerging and mature markets through strategic initiatives. We expanded our global footprint through new wholly-owned subsidiaries and strategic investments in existing regions.

Our continued focus on delivering exceptional value to our international customers led to significant growth in the international business during the fiscal year.

Our Dubai operations witnessed exponential growth in FY 2024-25, achieving GBR of ₹ 7,014 Mn, up from ₹ 2,050 Mn in FY 2023-24, reflective an impressive 242.2% year-on-year growth. This exceptional performance was fuelled by focussed operational growth and continued momentum in international travel.

Established New Subsidiaries

To tap into high potential markets, we incorporated wholly-owned subsidiaries in Brazil and Saudi Arabia, with the markets projected to reach US\$ 22.3 Bn and US\$ 110.1 Bn by 2028 and 2033, respectively.

Key Investments

With growing momentum in our Dubai business, we reinforced our Middle East presence through additional investments in our UAE-based entities, EMT Tours and EMT Holidays. Simultaneously, we scaled up investments in EaseMyTrip USA to expand our U.S. operations. Powered by India-based expertise, these efforts position us to broaden our geographic reach, enhance brand visibility and help us build a scalable global ecosystem.

EaseMyTrip secures prestigious IATA GoGlobal accreditation to fuel international expansion

This global recognition paves the way for EaseMyTrip's enhanced presence across multiple geographies

New Delhi, November 12, 2024: EaseMyTrip.com, one of India's largest online travel tech platforms, has been awarded with IATA's esteemed GoGlobal accreditation. This certification not only validates that EaseMyTrip has met the rigorous global standards set by the International Air Transport Association (IATA) but also enables the company to expand its operations seamlessly across multiple countries.

The GoGlobal accreditation is highly regarded within the aviation sector and well-recognised by global airlines as a testament to the company's operational excellence and readiness for international growth.

Deepening Domestic Presence

As a one-stop travel ecosystem, we are committed to offering comprehensive travel solutions and seamless experiences tailored to a diverse customer base while expanding our domestic reach with a localised strategy.

Expanding Office Presence

During the year, we established a new office in Gurugram, Haryana, a significant milestone in our expansion journey. The new office will strengthen our operational presence and capability to deliver exceptional

travel services to a wider customer base. Additionally, we inaugurated a new office in Mumbai to bolster our corporate, B2B and MICE travel solutions, fortifying our foothold in India's financial capital.

Expanding Franchise Outlets to Boost Offline Presence

To enhance regional accessibility and provide personalised travel services to customers, we continued to rapidly expand our franchise stores across India, targeting 100 stores by 2025. During the year, we opened new outlets including Raipur, Srikalahasti, Bengaluru, Jabalpur, Bhubaneswar,

25

New franchise outlets opened in FY 2024-25

Hyderabad, Ahmedabad, Mangalore, Karnal, Amritsar and Bhopal. By leveraging our robust technology platform and local expertise, we are strengthening our presence in emerging and regional markets. This focus helps us bridge the gap between online convenience and offline accessibility while enhancing customer engagement and tapping into increasing travel demand across Tier 2 and Tier 3 markets.

Strategic Foray into Emerging and Differentiated Verticals

Focussed on building a well-diversified portfolio, we ventured into new non-air segments such as buses, hotels and cruises, along with strategic investments and acquisitions in emerging segments like healthcare and education. Additionally, we ventured into scaling differentiated verticals to give a unique and compelling travel experience to a diverse customer base.

Entering Electric Bus Manufacturing through New Subsidiary: Easy Green Mobility

In a significant strategic development, we entered the electric bus manufacturing market by incorporating a new subsidiary, Easy Green Mobility. With India's electric bus market projected to grow at a CAGR of 24% from 2024 to 2030, this strategic move positions us to capitalise on the rising demand for clean mobility solutions. Easy Green Mobility will manufacture EV buses, with YoloBus (another EaseMyTrip subsidiary), serving as its operational arm, signifying our commitment to innovation and sustainable travel solutions. Our subsidiary will prioritise advanced technology and energy-efficient battery systems to support long-range travel. With an initial product outlay of 4,000-5,000 buses, the partnership between Easy Green Mobility and YoloBus aims to redefine intercity travel and accelerate the transition to net-zero carbon mobility, targeting the operation of over 2,000 electric buses by FY 2027-28.

Key Highlights

- ₹ 200 Cr investment planned over 2-3 years towards R&D and setting up manufacturing plant
- Aiming for an initial production capacity of 4,000-5,000 buses
- Plan to operate 2,000+ electric buses by FY 2027- 28 through YoloBus
- EV buses to feature advanced tech, long-range batteries and energy efficiency
- Move aligns with FAME, PLI & State EV policies, supporting India's EV mission

Secured Electric Bus Tender from Madhya Pradesh Government

The above collaboration was further strengthened, with our subsidiaries, YoloBus and Easy Green Mobility, securing a significant public sector contract to supply electric buses in Madhya Pradesh, reflecting our strategic entry into the Government-led electric mobility sector. The initiative aligns with India's broader sustainability goals while advancing our diversification into smart, future-ready transport infrastructure.

Launched EasyVijay – A Battlefield Tourism Initiative

On Republic Day 2025, we unveiled EasyVijay, a specialised battlefield tourism vertical that commemorates India's military legacy through immersive experiences. It features guided tours, veteran-led storytelling and AR/VR experiences across historical battle sites in India and internationally. Integrating physical site visits with cutting-edge digital recreations and AI-personalised itineraries, EasyVijay enriches our experiential travel portfolio with a distinct engaging and differentiated format.

Hotel in Ayodhya

EaseMyTrip, in collaboration with Jeewani Group, had entered into a strategic partnership with Radisson Hotel Group to develop a 150-room Radisson Blu Hotel in Ayodhya. This greenfield project, is currently under construction and is expected to open in 2027/2028, will be located just two kilometres from Shri Ram Mandir and in close proximity to Maharishi Valmiki International Airport, Ayodhya Railway Station, and National Highway-27, ensuring excellent connectivity. Designed to offer a seamless blend of luxury and comfort, the hotel will provide unmatched hospitality and convenience, further strengthening EaseMyTrip's commitment to creating exceptional travel experiences.

Venturing into Study Tourism with Acquisition of Planet Education

Aligned with our vision to diversify into differentiated verticals, we have acquired Planet Education Australia, marking our entry into the fast-growing study tourism segment. Through this acquisition, we aim to provide specialised student travel services and seize opportunities in the international education market, a key sector of the broader global tourism industry, which is projected to grow at a CAGR of 5.4%, from US\$ 11.94 Tn in 2025 to US\$ 22.27 Tn. It also positions us to align with the rising demand for international education-related travel and associated services.

EasyDarshan Partners with Ayodhya Development Authority to Drive Spiritual Tourism

To strengthen our foothold in spiritual tourism while promoting affordable, community-led travel experiences, we partnered with the Ayodhya Development Authority through EasyDarshan. This collaboration led to the launch of Theerth Yatri Sewa Booth and expansion of homestay infrastructure to meet the rising demand for accommodation in Ayodhya.

Entering the Medical Tourism Sector with Acquisition of Pflege Home Healthcare

Our entry into the medical tourism space comes at a time when the industry is witnessing unprecedented growth, with the global market currently valued at US\$ 7.69 billion and projected to reach US\$ 14.31 billion by 2029. Through the acquisition of a 49% equity stake in Dubai-based Pflege Home Healthcare, we are broadening our service portfolio to encompass wellness and healthcare, addressing the rising demand for medical tourism. By integrating healthcare with travel, EaseMyTrip aims to deliver holistic solutions for individuals seeking medical treatments and wellness experiences abroad.

"Our 7-day trip to New Zealand in October 2024 was one of our best travel experiences, thanks to EaseMyTrip. Everything, right from flights to hotel accommodations to local experiences was perfectly coordinated. Despite the short duration of stay, the well-planned travel itinerary and friendly customer support team, ensured that we explored the best of Auckland, Queenstown, the hub of Maori culture - Rotorua and the magical glowworm caves. Booking through EaseMyTrip made the entire experience incredibly smooth, stress-free and enjoyable."

– Shankar & Meena Rao, Hyderabad

"As a regular customer of EaseMyTrip, I say with pride that the Company never fails to surprise me. This year was no different, with the launch of the pathbreaking EasyVijay battlefield tour on January 26, 2025, honouring India's military legacy. Featuring guided tours, stories from war veterans and AR/VR-led historic battle recreations, it made the whole tour experience deeply personal, allowing me to understand Indian history on a whole new level. It was truly one-of-a-kind travel experience"

Enhancing Domestic Outbound Travel with Key Collaborations

Committed to accelerating our outbound travel growth, we continued to forge strategic collaborations during the year. Through joint campaigns and curated itineraries, these partnerships will enable us to enhance customer experiences, deepen outreach in Tier II and Tier III cities and boost brand visibility.

MoU with New Zealand Tourism

We signed a MoU with New Zealand Tourism to boost Indian tourist arrivals through personalised travel packages, joint marketing campaigns, influencer engagement and digital promotions. This collaboration aims to simplify bookings while offering culturally specific, year-round travel experiences tailored to the needs of Indian travellers. With New Zealand emerging as a tourist hotspot, welcoming over 45,000 Indian tourists in recent years, and India's outbound travel market poised for significant growth, we are well-positioned to capture emerging travel demand and solidify our global presence.

MoU with Korea Tourism Organisation

We have forged MoU with the Korea Tourism Organisation to position Korea as a preferred destination for Indian travellers. With co-funded marketing campaigns, tailored itineraries, a dedicated microsite and expanded presence in Tier II and III cities, the partnership aims to boost India's outbound travel and enrich their travel experiences. The Indian tourist numbers to South Korea are expected to grow with India's outbound travel market, which is projected to reach 29 Mn annual trips by 2028. This collaboration will help us diversify our international destination portfolio, deepen penetration in emerging markets and drive increased booking volumes.

Partnership with Sabah Tourism Board

We have tied-up with the Sabah Tourism Board to promote Sabah as a prime destination for Indian travellers. Aimed at expanding visibility and accessibility, especially in Tier II and III cities, the collaboration includes a dedicated Sabah microsite, curated travel content, joint marketing campaigns and specialised offerings across leisure, MICE and wellness tourism. Through our widespread digital reach and customer base, we strive to strengthen Sabah's visibility and accessibility in the Indian market while enhancing our global portfolio and driving incremental bookings through targeted marketing and enriched travel experiences.

MoU with Penang Convention & Exhibition Bureau

We signed an MoU with the Penang Convention & Exhibition Bureau (PCEB) to promote Penang as a premier destination for Indian travellers. The alliance offers a dedicated microsite, customised content and co-funded marketing campaigns to showcase Penang's rich cultural and adventure offerings while driving niche travel segments like MICE, destination weddings and wellness tourism. It will also expand our reach in Tier II and III cities and leverages data insights for targeted marketing while

strengthening our travel offerings with exclusive packages and loyalty benefits.

Resumed Maldives Bookings post Bilateral Ties Improvement

We resumed booking for Maldives travel post improvement in the bilateral ties between both governments and following a constructive discussion with the Ministry of Tourism of Maldives. The improved relations augur well with our vision of supporting our government's broader mission mutually enhancing tourism between India and Maldives.

EaseMyTrip Sponsored Events

Making a Difference Together

Pursuing responsible growth, we diligently work to deliver long-term value to our stakeholders and the communities we operate in. Through various initiatives, including CSR, we reaffirm our commitment to a greener, more prosperous future for all.

Vision

We work with a vision of developing a lush green and bio-diverse sustainable world for future generations by igniting a huge environmental revolution through trees. With each healthy sapling, we intend to create a repository for a rich ecological bio diverse planet. We also envision well trained and promoted rural sports, nationally recognised sports, Paralympic sports and Olympic sports

Mission

We are on a mission to create a healthy, green and clean planet through tree plantation. Along with our diligent greening efforts, we strive to uplift and assist the rural communities, while promoting extensive agriculture across the nation and making it a happy-green paradise and to promote rural sports, nationally recognised sports, Paralympic sports and Olympic sports.

Boosting Eco-Tourism

We signed an MoU with the Uttar Pradesh EcoTourism Development Board to boost the state's eco-tourism. This partnership aims to enhance visibility for 904 registered homestays and the state's tiger reserves like Dudhwa, Pilibhit and Amangarh. Additionally, the development of educational products for bird sanctuaries, inspired by models like Okhla Bird Sanctuary and Bharatpur Bird Sanctuary and customised tourism packages highlighting the state's rich cultural and wildlife heritage.

Key FY 2024-25 Initiatives

Fostering Digital Inclusion

We signed a Letter of Intent (LOI) to join the ONDC Network, aiming to revolutionise digital commerce in India. Through this initiative, we seek to offer seamless, accessible and efficient travel services to a broader customer base, including digitally underserved communities, thereby promoting inclusive growth nationwide.

Promoting Eco-friendly Travel

We tied up with BNZ Green to provide eco-friendly travel by launching real-time carbon footprint tracking and a blockchain-based carbon offset programme. This initiative strives to help travellers purchase carbon credits and receive verified certificates, reinforcing our efforts to build a sustainable and cohesive travel and tourism ecosystem.

Supporting Animal Welfare

EaseMyTrip Foundation, our subsidiary, has partnered with the YOLO Foundation, an initiative by Bollywood actress Jacqueline Fernandez, to improve the lives of stray animals. By jointly donating 10 fully equipped animal ambulances, the collaboration aims to provide sick and injured animals with timely and quality medical treatment and transportation. This initiative reflects our vision to support animal welfare while inspiring others to join such meaningful causes.

EaseMyTrip Foundation has proudly signed a Memorandum of Understanding (MoU) with the Archaeological Survey of India (ASI) under the Government's esteemed Adopt a Heritage 2.0 programme. Through this partnership, the Foundation is honoured to serve as Smārak Sārathi (Monument Mitra) for four of India's most treasured heritage sites – the majestic Qutub Minar in Delhi, the magnificent Sun Temple in Konark, Odisha, the historic Agra Fort in Agra, and the exquisite Western Group of Temples in Khajuraho, Madhya Pradesh. This initiative reflects our deep commitment to preserving India's cultural legacy and enriching the experience of millions of visitors who connect with these timeless monuments.

We contribute to training sportspersons through our CSR initiatives by providing access to quality coaching and facilities, fostering discipline, teamwork, and excellence, while inspiring communities and strengthening the future of sports.

In collaboration with the Delhi Municipal Corporation, the Company has actively contributed towards enhancing urban greenery by supporting plantation drives, maintaining green belts, and promoting eco-friendly initiatives, thereby fostering a cleaner and healthier environment for the community.

Management Discussion & Analysis

GLOBAL ECONOMY OVERVIEW

Over the past year, the global economy navigated a complex environment shaped by persistent challenges and evolving policy dynamics. According to the International Monetary Fund (IMF), global GDP was 3.3% in 2024 and is projected to moderate to 2.8% in 2025, with a marginally improved forecast of 3.0% in 2026. The IMF has highlighted increasing risks to global growth arising from recent trade and protectionist measures. While the additional tariffs imposed by the United States have been temporarily suspended, the ongoing volatility has contributed to heightened uncertainty in inflation and growth trajectories.

Advanced economies are anticipated to grow at a slower pace, with a noted growth rate of 1.8% in 2024 and an estimated growth of 1.4% in 2025. The implementation of broad-based tariff measures by the US has emerged as a significant drag on global trade. Reflecting this, the IMF revised its 2025 US growth forecast downward to 1.8% from the earlier estimate of 2.7%. The IMF also noted that the rapid escalation of trade tensions and high levels of policy uncertainty could have a material impact on economic activity. While the Federal Reserve's policy actions appear to be guiding the US economy towards a measured slowdown, balancing inflation moderation with stable employment, the broader outlook remains uncertain.

In the Eurozone, growth remained subdued at 0.9% in 2024 and is estimated to be 0.8% in 2025. Germany, the region's largest economy, is projected to register flat growth in 2025 following two consecutive years of contraction, driven by structural challenges in its manufacturing sector. Spain, however, continues to demonstrate relative strength, with growth revised upward to 3.2% in 2024 and 2.5% in 2025. Japan's growth outlook remains moderate, with a GDP of 0.1% in 2024 and an anticipated slight improvement to 0.6% in 2025, reflecting structural headwinds and lingering supply chain disruptions.

Emerging markets presented a mixed picture. The IMF projected a slight slowdown in growth for these economies, from 4.3% in 2024 to 3.7% and 3.9% in 2025 and 2026, respectively. China's economic momentum showed signs of deceleration. The IMF revised China's growth forecast downward to 4.0% for 2025 and 2026, from 5.0% in 2024. This trend reflects challenges such as a sluggish property

sector and subdued consumer confidence. India continued to be a beacon of robust growth among major economies. The IMF maintained its growth projections for India at 6.5% in 2024 and has slightly lowered them to 6.2% and 6.3% in 2025 and 2026, respectively. This sustained expansion underscores India's resilience and its pivotal role in driving global economic growth.

Looking ahead, the global economic outlook for 2025 and 2026 indicates a period of moderate expansion, easing inflation, and structural challenges. The IMF estimates global growth at 3.3% for both years, below the pre-pandemic average of 3.7% (2000–2019). The World Bank projects global growth to stabilise at 2.7% during this period, consistent with the 2024 estimate.

Global headline inflation is projected to decline to 4.3% in 2025 and further to 3.6% in 2026. Inflation in advanced economies is expected to return to target levels sooner than in emerging and developing markets. The disinflation trend is supported by softening commodity prices and the delayed impact of previous monetary tightening measures.

INDIAN ECONOMY OVERVIEW

India's economy has maintained its growth momentum, demonstrating resilience amid global uncertainties and domestic inflationary pressures. As per the revised estimates released by the Government of India on February 28, 2025, GDP growth for FY 2023-24 has been upwardly revised to 9.2%, compared to the earlier estimate of 8.2%. This revision reflects stronger-than-anticipated performance, particularly in the manufacturing and services sectors. For FY 2024-25, the government has reported a GDP growth of 6.5%, slightly lower than earlier expectations but still robust by global standards.

Supportive government policies, a potential interest rate cut from the Reserve Bank of India (RBI) and a moderation in inflation could provide tailwinds. Still, risks remain, global demand remains tepid, geopolitical tensions persist, and financial markets remain volatile. The RBI projects growth to remain stable at 6.5% for FY 2025-26.

The RBI continued its calibrated approach to managing inflation while supporting growth. Headline inflation eased to 3.6%, aided by stable food prices and timely

policy interventions. This favourable inflation trajectory, coupled with accommodative monetary conditions, provides a conducive environment for economic activity. However, challenges remain, including the effective transmission of policy rates amidst liquidity constraints and external macroeconomic pressures. The RBI's ability to maintain macroeconomic stability will be central to sustaining growth in the medium term.

Looking ahead, India's growth trajectory remains the envy of most major economies. Yet, sustaining this momentum will require navigating a delicate balance – reviving private investment, addressing persistent structural challenges and ensuring that the benefits of growth percolate beyond urban centres. For now, the economy remains in a sweet spot: slowing, perhaps, but still outpacing its peers.

INDIAN TRAVEL INDUSTRY

India's travel and tourism sector continues to emerge as a vital contributor to the country's economic progress, supported by its cultural diversity, growing middle-income population, and expanding infrastructure. According to the Ministry of Tourism, the industry contributed approximately US\$ 199.6 billion to India's GDP in 2022 and is projected to reach US\$ 512 billion by 2028. The sector's GDP contribution is expected to grow at an annual rate of 7.1% over the next decade. In FY 2022-23, the industry generated around 76 million jobs and is anticipated to support 53 million jobs by 2029.

Foreign Tourist Arrivals (FTAs) reflect steady recovery and renewed international interest. FTAs reached 9.52 million in 2023, representing a 47.9% increase over the previous year. Provisional data for 2024 indicates a further increase to 9.66 million tourists. As per the Ministry's estimates, FTAs are forecast to grow to 30.5 million by 2028. Foreign Exchange Earnings (FEE) from tourism during January–December 2023 stood at US\$ 28.1 billion, while earnings for January–July 2024 were US\$ 18.17 billion. This growth is driven by both increased inbound travel and the government's focus on travel facilitation measures, including the expansion of the e-visa scheme and upgraded airport infrastructure.

The Union Budget 2025-26 allocated ₹2,541.06 crore (US\$ 291.07 million) to the tourism sector. Key focus areas include infrastructure development, skill enhancement, and travel facilitation across 50 identified tourist destinations. The government has also proposed MUDRA loans for homestay operators, introduced measures to enhance last-mile connectivity, and launched digital initiatives such as a unified tourism app to improve the tourist experience.

Further, the Swadesh Darshan 2.0 scheme aims to promote sustainable and inclusive tourism, while the PRASHAD scheme continues to support the development of pilgrimage destinations with 46 approved projects to date.

India's unique value proposition in medical tourism and spiritual travel is gaining prominence. The medical tourism sector is projected to grow at a CAGR of 21.1% between 2020 and 2027. In parallel, pilgrimage tourism continues to witness high domestic traction and increasing interest from the global Indian diaspora, with investments being made in states such as Uttar Pradesh, Uttarakhand, and West Bengal to upgrade facilities and build themed circuits.

The domestic travel segment is also expanding rapidly. The overall travel market in India is expected to grow from US\$ 75 billion in FY20 to US\$ 125 billion by FY27. Within this, the hotel industry is projected to increase from US\$ 32 billion to US\$ 52 billion by FY27, driven by sustained demand and the growing presence of international hotel chains, which are expected to hold a 50% share in India's hospitality market. The airline travel segment, estimated at US\$ 20 billion, is also expected to double in size by FY27, supported by rising air connectivity and improved access to travel documentation.

India's digital infrastructure is a key enabler of travel growth. The country is recognised as one of the most digitally advanced traveller markets, with growing online adoption across the booking and travel experience lifecycle. In 2025, the Travel & Tourism market is expected to generate US\$ 25.01 billion in revenue, led by the Package Holidays segment, which is projected to reach US\$ 11.23 billion. By 2029, the market is expected to grow at a CAGR of 8.06%, reaching US\$ 34.11 billion, with digital channels accounting for 60% of the total revenue.

India's tourism industry is also leveraging policy-level incentives, such as 100% capital expenditure deduction for new hotel establishments under Section 35AD of the Income Tax Act, to drive long-term investments. With the government's continued thrust on infrastructure development, heritage preservation, cruise tourism, and skill-building, the sector remains strategically positioned for sustained growth.

Outlook

The Indian travel and tourism sector is expected to maintain its upward momentum, driven by rising disposable incomes, expanding air connectivity, and strong digital adoption. Foreign Tourist Arrivals are projected to reach 30.5 million by 2028, with corresponding revenue expected to exceed ₹5,12,356 crore (US\$ 59 billion). Domestically, travel demand

remains buoyant, supported by urbanisation trends, a growing middle class, and government-led initiatives aimed at improving accessibility and affordability.

The continued focus on spiritual, medical, and experiential tourism is expected to broaden India's appeal to a wider audience, while digital innovations will further streamline the customer journey. Increasing international hotel chain penetration and capacity additions in the airline segment are expected to enhance service delivery and customer experience. With policy support, infrastructure development, and consumer-driven demand in place, the Indian travel industry is well-placed to achieve sustainable and inclusive growth over the medium to long term.

INDIAN HOSPITALITY INDUSTRY

The Indian hospitality industry spans a wide array of segments, including lodging, food and beverages, transportation, theme parks, and amusement parks. As an integral component of the country's service sector, it continues to demonstrate strong potential for growth. This momentum is largely attributed to India's diverse cultural and historical heritage, ecological richness, and varied geographical landscapes, which attract a steady influx of tourists. The sector has shown resilience, recovering from recent global disruptions, and is playing an increasingly prominent role in the national economy by leveraging both domestic and international tourism demand.

India's robust domestic tourism market offers stability, cushioning the industry from global economic volatility and geopolitical uncertainties. The budget and economy hotel segment is particularly thriving, projected to grow at an annual rate of approximately 6% through 2029. This growth is driven by the rising aspirations of the middle class, a surge in affordable travel preferences, and increased movement across tier-2 and tier-3 cities. These cities are witnessing an uptick in demand for standardised, no-frills accommodation with essential amenities offered at competitive prices. The proliferation of digital booking platforms and contactless services has further streamlined guest experiences and boosted operational efficiency.

Technology is a major enabler of transformation in the Indian hospitality space. Artificial Intelligence (AI)-powered solutions such as chatbots for customer service and personalised recommendation engines are enhancing guest engagement and satisfaction. These applications leverage consumer behaviour analytics and real-time data to deliver tailored experiences, optimise pricing, and improve overall service delivery. With ₹ 260 billion in global AI investments projected in the hospitality sector by 2026, Indian players are increasingly aligning with global innovation trends.

Sustainability has also emerged as a key focus area. Over 250 Indian hotels have received Green Globe certification, reflecting the industry's shift toward eco-conscious operations. Initiatives include solar-powered hotel infrastructure, electric vehicles for tourist transport, and broader carbon footprint reduction programmes across aviation and accommodation segments. These efforts underscore the industry's commitment to responsible tourism.

Supporting this momentum is the increasing digitisation of operations, not only among luxury and mid-range hotels but also within budget and unbranded establishments. Cloud-based property management systems, automated check-ins, smart energy systems, and AI-based concierge services are improving productivity and service quality. Digital transformation is no longer a differentiator but a necessity, as customer expectations evolve toward faster, frictionless, and personalised travel experiences. The digital maturity of India's hospitality players is expected to be a critical determinant of competitiveness in the coming years.

India's hospitality industry was valued at US\$ 179 billion in 2018 and reached US\$ 251 billion by 2023. The market is now estimated at US\$ 281.83 billion in 2025 and is expected to grow to US\$ 541.70 billion by 2030, registering a CAGR of nearly 14% over the forecast period. The strong fundamentals of rising disposable incomes, increased business and leisure travel, and technology-led transformation are set to drive sustained growth. The expansion of hospitality infrastructure, coupled with strategic digital adoption and a shift toward green practices, is establishing a solid foundation for long-term competitiveness. India's position among the top global destinations for ease of doing business further strengthens its attractiveness to both domestic stakeholders and international investors.

Outlook

India's hospitality industry is poised for an accelerated growth trajectory, supported by favourable macroeconomic indicators, strong consumer demand, and proactive policy interventions. The industry's robust domestic market serves as a critical strength, providing consistent business even during periods of global travel volatility. Unlike economies that are heavily reliant on inbound tourism, India benefits from a vast and growing internal travel segment, which supports stable hotel occupancy and revenue streams.

The Indian hotel market, which stood at US\$ 32 billion in FY 2019-20, is projected to reach US\$ 52 billion by FY 2026-27. Premium hotel occupancy is anticipated to rise from 68-70% in FY 2022-23 to 72-74% in FY 2024-25, indicating continued recovery and operational efficiency gains. The broader

tourism and hospitality industry is forecasted to generate over US\$ 59 billion in revenue by 2028, highlighting its strategic importance to the national economy.

The employment generation remains a core pillar of the sector. With an estimated 50 million direct and indirect jobs expected to be created in the next five to seven years, the hospitality and tourism industry is set to play a major role in supporting inclusive economic development.

Foreign Direct Investment continues to be a strong growth catalyst. From April 2000 to December 2023, cumulative FDI equity inflows into the hotel and tourism sector totalled US\$ 17.1 billion. This reflects a growing global confidence in India's long-term potential and enhances the capital base for hospitality infrastructure development.

Policy-driven enablers are further accelerating industry growth. The establishment of the Hospitality Development and Promotion Board has streamlined the hotel project approval process, while dedicated government funds, such as the ₹2 billion allocation for pilgrimage tourism circuits, reinforce public-private collaboration. These efforts position India among the top destinations for ease of doing business in hospitality.

With sustained investment, rising consumer demand, and an increasing focus on innovation and sustainability, the Indian hospitality sector is well-positioned to deliver resilient and inclusive growth.

COMPANY OVERVIEW

Easy Trip Planners Limited, herein referred to as "EaseMyTrip" or "the Company," was founded in 2008 and has grown to become a leading online travel platform in India. Company started its operations with a B2B2C distribution channel, enabling travel agents to book domestic airline tickets through its website, serving the offline travel market in India.

In 2011, EaseMyTrip expanded its operations to the B2C distribution channel, targeting the travel needs of India's growing middle-class population. This strategic shift allowed the Company to directly address the travel requirements of individual customers. In 2013, EaseMyTrip further diversified its business by entering the B2E distribution channel, providing comprehensive travel solutions to corporate clients.

Currently, EaseMyTrip offers a wide range of travel-related products and services to provide end-to-end travel solutions. These include airline tickets, hotel bookings, holiday packages, rail tickets, bus tickets, charter, taxi and cruise

services. Additionally, the Company offers ancillary services such as travel insurance, visa processing, and tickets for various activities and attractions. EaseMyTrip also provides a no-convenience fee option, eliminating service fees when alternate discounts or promotional coupons are not applied.

EaseMyTrip continues to build on its technological foundation, with a dedicated in-house team focussed on developing secure, scalable, and advanced technological infrastructure. Over time, the Company has expanded its portfolio to include intercity mobility, hospitality management, and electric mobility. Key strategic acquisitions, including Spree Hospitality, YoloBus, and Easy Green Mobility, have enabled the Company to diversify its service offerings and enter high-growth verticals while remaining asset-light. Key platform features such as AI-powered chat support, WhatsApp-based bookings, zero upfront hotel payments, and flight fare lock options further strengthen the Company's one-stop travel ecosystem. Additional tech-led innovations include ScanMyTrip, a discovery and booking marketplace integrated with the ONDC network, EMTDesk for automated corporate bookings and EMTMate for travel agent enablement.

As of March 31, 2025, EaseMyTrip has served over 30 million customers, offering access to a network of more than 400 international and domestic airlines. The Company also provides a wide selection of hotels in India and international locations, covers nearly all railway stations in India, and offers bus tickets and taxi rentals in major Indian cities. Additionally, EaseMyTrip has a strong network of over 72,000 registered travel agents across India's key metropolitan areas. The Company has also expanded its presence through strategic acquisitions and international offices, supporting its focus on enhancing product diversity and geographical reach. Its global footprint now includes offices in the UAE, UK, USA, Singapore, Saudi Arabia, Brazil, Thailand, the Philippines, and New Zealand. It has also launched 'Explore Bharat', a dedicated inbound tourism vertical, aimed at showcasing Indian destinations to international travellers. In addition, the Company has introduced 'EasyDarshan', a curated pilgrimage travel service offering end-to-end solutions for spiritual tourism across India. Further, strategic partnerships such as with Planet Education are enabling EaseMyTrip to expand its offerings in niche travel categories, including student and business travel.

Through its strategic distribution channels, diverse service offerings, and focus on customer-centric innovations, EaseMyTrip has established itself as a scalable, efficient, and sustainable travel platform, well-positioned to meet the evolving needs of a broad and growing customer base.

BUSINESS SEGMENTS

Airline Tickets: EaseMyTrip offers a comprehensive range of airline tickets for both domestic and international travel. Customers can choose from over 400 airlines, including domestic carriers like Indigo and Air India and international airlines like Etihad Airways and Lufthansa. This extensive selection provides customers with numerous options for their travel needs.

This segment primarily earns revenue through commissions, incentives, and select service fees tied to booking activity. To further enhance user convenience, we have introduced features such as WhatsApp-based flight bookings, fare lock options that allow customers to hold a flight price for up to 48 hours, and EaseFly, which provides free cancellation and date change options. These are further supported by AI-enabled chatbot assistance to help customers manage their bookings with greater ease.

Hotels and holiday packages: We offer a diverse range of hotel and holiday packages, catering to various vacation themes such as beach, adventure, family, pilgrimage, romantic, shopping, cruise, and culture. Additionally, we also provide escorted tours, honeymoon specials, group tours, and weekend trips. To further strengthen our offerings in the domestic and spiritual tourism segments, we have launched 'Explore Bharat', a dedicated inbound tourism vertical focussed on promoting Indian destinations to international travellers, and 'EasyDarshan', a curated pilgrimage travel service offering end-to-end solutions for spiritual journeys across India. Customers benefit from the convenience of customising their travel plans, with the ability to combine multiple travel products like airline tickets, hotel stays, and car rentals into a single transaction. This flexibility not only enhances customer convenience but also enables the company to cross-sell multiple products effectively.

We also cater to corporate clients through the B2E (Business-to-Employee) route, offering tailored services for planning and booking official travel through EMTDesk, our dedicated platform for corporate travel management. As of March 31, 2025, EaseMyTrip provides access to over 2.9 million hotels worldwide. Our business model, which involves partnerships with aggregators and direct contracting, allows us to maintain a lean cost structure by not directly dealing with hotels or assuming inventory risk. This approach enables us to operate the hotel segment with a small team of just 71 people, receiving commissions periodically from these aggregators. We also operate our own hospitality vertical through Spree Hotels, which manages a portfolio of over 2,000 room keys under an asset-light model.

The hotel and holiday packages segment significantly contributed to the company's net revenue, accounting for 19.8% of the total, reaching ₹1,162.47 million in FY 2024-25, compared to ₹553.5 million in FY 2023-24. This growth highlights the effectiveness of EaseMyTrip's strategic approach in this business segment.

Other Travel Products and Services: EaseMyTrip offers a comprehensive range of travel products and services beyond airline and hotel bookings. Customers can book rail tickets, bus tickets, air charter services, and taxi rentals. Additionally, we provide ancillary value-added services, including travel insurance, visa processing and tickets for various activities and attractions. We have strengthened our presence in the intercity mobility segment through YoloBus, a tech-enabled, asset-light platform for premium bus travel. We also operate an electric mobility vertical, Easy Green Mobility, focussed on offering sustainable urban travel solutions.

The Company has been expanding into specialised travel categories including education, sports, and luxury segments. We cater to the unique needs of students and educational institutions through partnerships such as Planet Education, and offer customised solutions for luxury weddings and events, MICE (Meetings, Incentives, Conferences, and Exhibitions), and sports tourism. We also introduced the 'Explore Bharat' initiative to promote inbound tourism, focussing on attracting international travellers to Indian destinations.

EaseMyTrip has also scaled its technology-driven offerings through proprietary platforms such as ScanMyTrip, a discovery and booking marketplace, integrated with the Open Network for Digital Commerce (ONDC), expanding reach through interoperable and inclusive travel solutions. EMTDesk, a corporate travel expense management platform; and EMTMate, a tech solution to support and empower travel agents.

KEY BUSINESS STRENGTH

Leading with a Customer-Centric Approach through a One Stop Travel Ecosystem

We are leveraging the rapid growth of the travel industry to strengthen our position in India's online ticketing market. One of the key factors driving this growth is the rising use of discount coupons, which provide transparency and build customer loyalty. EaseMyTrip was among the first OTAs to introduce No Convenience Fee and Zero Hidden Cost models, reinforcing our customer-first positioning.

To enhance the travel experience, we offer end-to-end support, before, during, and after the journey, through

24/7 in-house call centres. E-tickets and flight alerts are shared proactively via SMS and messaging platforms, keeping customers informed throughout their travel. Our One Stop Travel Ecosystem spans flights, hotels, buses, trains, cabs, visas, charters, cruises, and activities, offering a seamless and integrated solution.

In addition to ticketing, we have built a customer-first ecosystem that addresses diverse travel needs. We operate dedicated call centres to handle holiday package enquiries and bookings, providing personalised assistance. We currently have live operations in the UAE, United Kingdom, Thailand, and the United States, while also maintaining a presence in Singapore, Saudi Arabia, Brazil, Philippines, and New Zealand. These international offices help enhance localised service delivery and support deeper engagement with our global customer base. Integrated platforms such as Spree Hospitality and YoloBus further extend our ecosystem into stay and intercity mobility.

By implementing these strategies, we aim to establish itself as a reliable and customer-focussed travel service provider, meeting the evolving needs of travellers in a digital world. Our commitment to innovation and customer satisfaction positions us as a leader in the online travel industry, dedicated to making every journey enjoyable and stress-free.

Consistent Performance Driven by Lean and Transparent Business Model

Over the course of 16 years in operations, we have consistently funded our working capital needs and business growth through internal accruals, without relying on external equity infusion. This approach has allowed us to remain bootstrapped, maintaining complete control over our financial strategies and growth trajectory.

Our advanced technology infrastructure and streamlined systems have supported strong financial and operational performance. These tools enable agile workflows, efficient data management, and better decision-making. Our lean cost model has been central to sustaining margins and enabling profitable growth across cycles.

We maintain a sharp focus on resource optimisation. This includes efficient workforce deployment to reduce errors, improve productivity, and enhance service quality. As of March 31, 2025, our company had a total of 1,706 full-time employees, reflecting our ability to operate efficiently without compromising the quality of service we provide to our customers. Our lean staffing model is

a testament to our focus on operational excellence and cost-effectiveness.

This lean approach also extends to verticals such as hospitality and intercity mobility. Strategic expansions, including Spree Hospitality and YoloBus, have contributed to business growth while preserving cost discipline. Our global presence across the UAE, UK, USA, Singapore, Saudi Arabia, and Brazil has been built without external equity infusion, underscoring the strength of our internally funded model and our focus on operational efficiency.

By prioritising these initiatives, we have positioned ourselves as a financially resilient and efficient organisation within the highly competitive online travel industry. Our dedication to maintaining lean operations, coupled with our investment in advanced technology, has enabled us to deliver superior value to our customers.

Improving User Experience through AI-Powered Personalisation and 24/7 Support

We remain focussed on enhancing the user journey through seamless, tech-enabled solutions. Our platform offers a range of innovative tools such as WhatsApp flight bookings, AI-powered chatbots for real-time query resolution, zero upfront hotel bookings, fare lock options, and free cancellation/date change through EaseFly. These are further strengthened by voice-based search and dynamic pricing tools that personalise user experiences.

Our organisation has a highly skilled in-house technology team responsible for developing a secure, scalable and efficient technology infrastructure. This enables us to enhance customer-focussed initiatives, roll out new solutions, and improve overall service delivery. During the year, we expanded our tech stack with platforms like ScanMyTrip EMTDesk, our dedicated platform for corporate travel bookings, and EMTMate for agent enablement.

The team's continuous efforts in research and development allow us to stay ahead of evolving customer needs and maintain operational resilience in a dynamic environment. We are also in the process of integrating with the Open Network for Digital Commerce (ONDC) to broaden accessibility through interoperable travel services.

As of March 31, 2025, our technology team comprised 112 professionals with strong technical backgrounds and domain expertise, committed to driving innovation and user satisfaction.

Expanding Market Reach with Comprehensive Tri Channel Distribution Strategies

Our organisation has developed an extensive distribution network based on a hybrid platform, incorporating three channels: B2C (Business-to-Consumer), B2E (Business-to-Employee), and B2B2C (Business-to-Business-to-Consumer). This multi-channel approach enables tap in all the customers through various touchpoints. The platform is supported by a strong agent and franchisee network that drives demand in Tier 2 and Tier 3 cities and fosters trust across customer touchpoints.

Our network integrates websites, mobile applications, and a wide base of travel agents, allowing us to meet varied customer preferences and improve accessibility. We also operate dedicated call centres for holiday package enquiries and bookings, providing personalised assistance. Our international footprint has expanded through offices in the UAE, UK, USA, Singapore, Saudi Arabia, Brazil, Thailand, Philippines and New Zealand.

We are actively developing our inbound tourism vertical under the 'Explore Bharat' initiative, aimed at promoting Indian destinations to international travellers, and have also introduced EasyDarshan, a curated pilgrimage travel service offering end-to-end solutions for spiritual tourism across India. During the year, we further strengthened our market presence through partnerships such as Planet Education, enhancing engagement in student and business travel segments.

By implementing streamlined software across distribution channels, we offer multiple touchpoints to market additional travel products and services, leveraging established customer relationships for a seamless experience. Our hybrid distribution model enables us to effectively promote our full suite of offerings, deepening customer relationships and driving growth in a competitive travel industry.

Strengthening Brand Recognition through Strategic Marketing Partnerships

Our long-standing presence in the market and extensive operational experience have made 'EaseMyTrip' a widely recognised brand across India. We have consistently reinforced our customer-first image by pioneering zero convenience fee and zero hidden cost models. These differentiators have built trust and enhanced our customer acquisition and retention.

Our strong brand equity has enabled us to forge high-impact strategic partnerships with airlines, hotels, and other ecosystem players. Over time, we have collaborated with various brands and platforms to launch exclusive ticketing offers, promotional campaigns, and cashback programmes, driving higher conversion and user engagement.

To expand visibility and strengthen recall, we have actively invested in event sponsorships, particularly in high-impact areas such as sports marketing. These efforts have significantly boosted our brand presence across physical and digital media.

Backed by a growing user base of 30+ million customers, rising app downloads, and increasing website traffic, EaseMyTrip continues to gain recognition as one of India's leading online travel platforms. Our recognition through industry accolades like the Travel & Tourism Awards and continuous cross-marketing efforts further demonstrates our deepening market penetration.

By capitalising on our brand strength, ecosystem partnerships, and loyalty-driven initiatives, we aim to deepen customer trust, unlock new cross-sell opportunities, and solidify our leadership in India's evolving travel landscape.

Experienced Team Driving Execution and Growth

EaseMyTrip's leadership team brings deep expertise in the travel and technology sectors, combined with strong operational capabilities and strategic foresight. This experience has been instrumental in expanding our distribution footprint, scaling new verticals, and strengthening our product and service offerings.

Since inception, the promoters have played an active role in executing the Company's growth strategy and overseeing day-to-day operations. Their continued involvement and long-term vision have helped shape EaseMyTrip's growth trajectory and build a resilient organisation.

The senior management team adopts a hands-on and agile approach to navigating dynamic market conditions. Their collective insight and guidance continue to drive innovation, enhance execution, and unlock new opportunities, ensuring sustained momentum and long-term value creation for all stakeholders.

BUSINESS STRATEGIES

Capitalising on the Expansion within the Travel Sector

India's online ticketing sphere continues to thrive, shaped by surging internet access, smartphone proliferation, budget airline growth, and rising reliance on digital railway reservations. This momentum in online services signals considerable prospects for forward-thinking enterprises. Mindful of these trends, the Company remains intent on harnessing market expansion, fostering continued engagement from existing patrons whilst drawing in new clientele. By vigilantly tracking consumer habits and embracing technological innovation, we uphold our dedication to exceptional service, pioneering solutions, and frictionless booking experiences. Through persistent enhancement of our portfolio, the Company is set to extend its market reach and sustain its standing as a leading presence within the ever-shifting travel industry.

Leveraging Non-Air Segments for Growth/Enhancing the Offerings beyond Air Travel

EaseMyTrip has placed emphasis on broadening its range of services, notably within the hotel and holiday package domains known for superior margins. The hotel sector's largely segmented nature and modest uptake of digital bookings present notable opportunities for advancement. As increasing numbers of hotel providers migrate online, customer appetite for effortless bookings grows. To meet this demand, EaseMyTrip has secured partnerships via 2.9 million hotel-related APIs, vastly enriching its supplier network and enabling seamless access to a comprehensive array of international accommodations. Furthermore, the Company's international footprint now spans several destinations, with the Dubai office achieving a robust Gross Booking Revenue of ₹7,013.7 million for FY 2024-25, compared to ₹2,049.7 million in FY 2023-24, registering growth of 242.2%. Key development areas – hotels, international travel, bus transport – are earmarked for growth, given current online adoption below 20%. EaseMyTrip aims to deepen customer engagement through improved online experiences and expansion in underserved markets, including rail ticketing for cities with limited air travel infrastructure. The Company's active diversification, overseas growth and focus on segments with untapped digital potential pave the way for increased market capture and enhanced customer convenience.

Expanding Agent Networks and Franchise Initiatives/Reaching New Consumers in Tier II & III Cities

Traditional travel agents, integral to the B2B2C channel, are increasingly choosing online platforms to streamline processes and reduce costs, amplifying competitiveness in a digital age. This move is particularly significant for

reaching audiences in smaller cities. EaseMyTrip intends to consolidate its travel agent network to support customer needs and facilitate local hotel acquisition. Expanding usage of the customisable B2B2C portal will also address demand from the offline sector. Pursuing its growth agenda, EaseMyTrip introduced the EMT Franchise model, delivering direct, personalised service and expanding its footprint to 16 stores, including Bhopal, Amritsar and Karnal. This approach addresses digital literacy barriers by providing accessible solutions. Investment in technology for improved connectivity and business efficiency equips agents to thrive in today's digital environment, strengthening the Company's B2B2C channel and meeting evolving market requirements in Tier II and III cities.

Focus on Innovation and Technology/Advancing Customer Experience through Technological Progress

Embracing rapid advancements, EaseMyTrip prioritises research and technological development to optimise platform reliability and enrich user journeys. The Company is dedicated to presenting an extensive choice of discounted travel options, accessible primarily via its mobile applications. Enhanced app functionality will deliver location-specific and language-tailored recommendations, allowing travellers to enjoy bespoke support from planning to completion. Through sustained investment in cutting-edge technology, EaseMyTrip continually elevates user satisfaction and engagement, striving to set new benchmarks in travel convenience and customisation.

Strategic Brand Collaborations/Boosting Engagement through Partnerships

EaseMyTrip upholds a strategic agenda of expanding and diversifying its service spectrum to widen its customer base. Forming alliances with prominent brands unlocks opportunities for cross-promoting premium products and accessing targeted audiences, while simultaneously trimming marketing expenditures. Such cross-party collaborations, spanning both digital and physical domains, enable the Company to deliver a broader suite of travel products, benefiting from partner expertise and established consumer trust. This approach not only opens new market avenues but also enhances value and choice for customers.

Acquisitions Driving Continued Momentum/Expansion through Key Acquisitions

Past acquisitions have tangibly accelerated EaseMyTrip's trajectory, underpinning performance across various business areas. During the last financial year, further investments in air travel and non-air segments have propelled the Company towards deeper market penetration and greater operational scale. These initiatives continue to serve as growth catalysts, ensuring sustained advancement in a dynamic industry landscape.

Outlook

Online Ticketing Market / Strengthening Core in Online Travel

The online ticketing market has shown strong growth, driven by increasing digital adoption and consumer preference for convenient booking solutions. We have established a strong presence in this competitive sector by utilising advanced technology infrastructure to improve user experience and streamline transactions. We continue to prioritise domestic growth while building out our inbound travel vertical through initiatives such as 'Explore Bharat', which aims to promote Indian destinations to international travellers. As we look ahead, we remain poised to capitalise on further opportunities in this evolving market, sustaining our growth trajectory and delivering value to our stakeholders.

Expanding into Higher-Margin Segments / Scaling Underpenetrated and High-Growth Verticals

By diversifying our offerings into higher-margin segments such as hotels, holiday packages, and intercity mobility, we aim to capitalise on untapped potential and strengthen our market position. This approach is expected to enhance our revenue streams and increase profitability. Our asset-light hospitality business under Spree Hotels and our premium bus mobility platform, YoloBus, continue to scale profitably, reinforcing the strength of our strategy. We are also focussed on scaling underpenetrated verticals such as education travel, weddings, MICE, and sports tourism, which represent growing categories within our full-service travel portfolio. We expect these initiatives to further strengthen EaseMyTrip's revenue mix and long-term profitability.

Expansion into International Markets

EaseMyTrip is actively scaling its presence across global markets to capture untapped opportunities and reinforce its competitive position. With established operations in the UAE, UK, Thailand, and USA, and additional locations set to launch shortly, our international footprint continues to grow steadily. Notably, our operations in Dubai have delivered exceptional performance, further validating the strength and scalability of our business model.

Redefining Travel with Technological Advancements / Enhancing User Experience through Tech and Innovation

Our investment in technology and innovative product development is essential for maintaining our competitive

edge in the online travel industry. By using advanced technologies, we enhance user experience and introduce unique features. Recent initiatives such as WhatsApp-based bookings, fare lock options, EaseFly, and AI-powered chat support reflect our continued efforts to simplify the travel journey and improve customer engagement. This builds customer loyalty, ensures sustained growth, and meets evolving customer needs. In addition, platforms such as EMTDesk and EMTMate have allowed us to scale our B2B and agent-facing solutions, while ScanMyTrip enhances travel discovery. We are also integrating our offerings with the ONDC network, enabling broader access through interoperable, government-supported digital infrastructure.

Focus on Customer Satisfaction and Brand Equity / Deepening Customer Trust through Brand and Service Excellence

Our comprehensive customer support infrastructure enhances our brand's recognition and reputation. By consistently prioritising customer-focussed initiatives and investing in effective marketing strategies, we aim to boost our brand equity and attract a wider customer base. Our dedication to exceptional service helps us meet and exceed customer expectations, building loyalty and trust in our brand. As we expand our global presence in a calibrated and capital-efficient manner, our agent and franchisee network remains a key pillar of demand generation, particularly across Tier 2 and Tier 3 cities. We will continue to deepen this network through automation, enablement tools, and strategic outreach.

Delivering Scalable and Sustainable Growth / Driving Scalable Growth with Asset-Light Efficiency

We remain focussed on capturing growth opportunities in the online ticketing market. By diversifying into higher-margin segments and leveraging technology and innovation, we aim to stay ahead of the competition. We continue to pursue strategic acquisitions that complement our platform and expand our capabilities. Throughout this roadmap, we will operate with a lean, asset-light model, supported by strong internal accruals and disciplined cost control. This approach underpins our ability to drive scale profitably and deliver long-term value to all stakeholders.

RISK MANAGEMENT

Risk	Mitigation
Economy risk The Company's operational and financial results could be negatively influenced by a contraction in the global economy, or by disturbances affecting the Indian economy and its travel sector.	EaseMyTrip addresses this risk by concentrating on both business growth and efficient cost management. The Company diligently oversees its fixed expenditures and enhances operational effectiveness through continuous assessment and adjustment to prevailing market trends and conditions. These strategic approaches are routinely evaluated to ensure alignment with evolving economic landscapes.

Demand Risk

The Company experiences exposure to inherent seasonal patterns within the travel and tourism sector. Revenue typically reaches its highest points during the summer and winter holiday periods, which correspond to the first and third quarters of the financial year. These natural variations introduce a potential for inconsistency in revenue generation across the entire year.

EaseMyTrip manages this risk through ongoing improvements to its digital platforms, including its websites and mobile applications, aiming to enhance user experience, widen market penetration, and broaden its revenue streams. The Company has strategically diversified its service offerings to encompass not only hotels and travel packages but also rail and bus tickets, taxi hire, and supplementary services such as travel insurance and visa processing. Moreover, a comprehensive distribution network – spanning online portals, call centres, physical travel stores, and independent travel agents – provides numerous access points for customers. This network caters to a wide range of travellers, including non-resident Indians and those visiting the country. This multifaceted approach contributes to stabilising revenue, even during periods typically associated with lower demand.

Competitive Risk

The Company operates within an intensely competitive segment of the travel products and services market. It faces rivalry from a diverse array of players, both domestically and internationally, comprising well-established entities and newer entrants. This competitive set includes online travel agencies, conventional offline travel enterprises, various payment platforms, and search engines that also provide travel-related functionalities.

EaseMyTrip mitigates this competitive pressure by prioritising technological advancements and elevating the customer experience across all its platforms. The Company utilises self-service options, chat assistance, call centres, and its network of physical travel stores to ensure a smooth customer journey. To solidify its standing in the market, the Company has shifted its emphasis towards digital marketing, brand development, and increasing public awareness through widespread media campaigns and innovative digital approaches. Forming strategic alliances, such as the collaboration with Lifestyle, provides additional advantages to customers. Furthermore, initiatives to engage with India's extensive network of travel agents within the business-to-business-to-consumer (B2B2C) segment are designed to stimulate sales growth and achieve greater market penetration.

Concentration Risk

The Company's substantial dependence on its airline ticketing operations represents a concentration risk, given that a considerable proportion of its revenue originates from this singular business vertical. This reliance could potentially influence the stability of revenue and the performance of margins, particularly during periods of market fluctuation or downturns specific to the industry.

EaseMyTrip has strategically responded to this risk by broadening its range of product offerings. The Company has expanded into additional travel services, now including bus tickets, taxi hire, and railway reservations. Furthermore, recognising the growth prospects within the Indian hospitality sector, EaseMyTrip is establishing direct collaborations with hotels and various suppliers. Concurrently, the Company is enhancing its presence in the international hotel booking and holiday package markets. By extending its service portfolio in this manner, EaseMyTrip aims to solidify its position as a comprehensive travel solutions provider, fostering customer loyalty and establishing multiple income channels.

Technological Risk

The Company encounters potential difficulties should it not keep pace with rapid advancements in technology. A failure to adapt could negatively impact its operational effectiveness and overall efficiency.

EaseMyTrip has established a dedicated internal technology team, focussed on maintaining an advanced and secure technological infrastructure for the Company. Through ongoing system upgrades incorporating the latest innovations, EaseMyTrip effectively manages its product and service portfolios while simultaneously enhancing operational efficiencies. The Company utilises technologically enhanced distribution channels to access India's expanding middle-class travel market. Additionally, EaseMyTrip prioritises innovation by embracing technology-led initiatives that improve the process of attracting new customers, streamline service provision, and elevate overall customer satisfaction, thereby ensuring consistency with international developments.

HUMAN RESOURCE

At EaseMyTrip, our employees are a cornerstone of our success, and we are committed to their continuous growth and engagement. We invest in their professional development through comprehensive in-house training, skill enhancement initiatives, and opportunities for advancement across all functions and levels. To recognise and reward their contributions, we have implemented structured reward and recognition programmes. Importantly, our workforce is non-unionised, and we have maintained a stable and productive work environment, with no significant work stoppages or labour disputes over the past four years. As of March 31, 2025, our team comprised 1,706 full-time employees.

CORPORATE SOCIAL RESPONSIBILITY (CSR)

EaseMyTrip is committed to creating long-term economic value while actively supporting the development of a sustainable society. Our Corporate Social Responsibility (CSR) initiatives are closely aligned with our mission to address social and environmental responsibilities and foster positive economic practices. We have established a comprehensive CSR policy that prioritises initiatives aimed at eradicating hunger, poverty, and malnutrition, as well as promoting healthcare, sanitation, and access to safe drinking water. The policy also emphasises education, vocational skills, gender equality, women's empowerment, and environmental sustainability. Our CSR committee is responsible for overseeing the implementation of these initiatives and recommending the allocation of funds. In FY 2024-25, we contributed ₹20.5 million through the EaseMyTrip Foundation to support environmental sustainability and the promotion of sports across the country.

INVESTOR RELATIONS

We are committed to continually enhancing our service standards for investors, benchmarking our activities against industry best practices. Our dedicated Investor Relations team actively serves the interests of the investment community through regular communication and engagement, facilitating ongoing discussions with global investors and shareholders. We conduct periodic meetings to share performance updates, significant material events, and relevant information exchanges. The Chairman & Chief Executive Officer, Executive Director, Chief Financial Officer, and the Investor Relations team collectively manage and represent our Company in interactions with investors, the media, and various government entities.

To ensure transparency, we make all critical information accessible to our investors through our website's dedicated 'Investor Relations' section, which includes comprehensive

details on our Directors, shareholding patterns, quarterly reports, financial results, annual reports, press releases, unpaid/unclaimed dividends, and various policies. Additionally, any material developments during the quarter that may impact revenue or earnings are promptly communicated to stock exchanges and updated on our website. Our website also hosts quarterly results, regulatory filings, earnings call transcripts, Investor Relations presentations, and schedules for analyst and investor interactions.

INTERNAL CONTROLS

The Company maintains a strong and reliable internal control system. Aligned with our business operations, EaseMyTrip has implemented a comprehensive internal control framework that addresses governance, compliance, audit, control, and reporting. This framework ensures adherence to local statutory requirements, promotes the orderly and efficient conduct of business, safeguards assets, and facilitates the detection and prevention of fraud and errors. It also ensures the adequacy and completeness of accounting records and the timely preparation of reliable financial information.

The effectiveness of our internal checks and control systems is regularly validated by internal auditors and reviewed by management. The Audit Committee provides oversight of the Company's financial reporting process, ensuring accurate and timely disclosures with the highest levels of transparency, integrity, and quality. Additionally, the Committee evaluates the adequacy and effectiveness of internal control systems and recommends improvements where necessary to maintain high levels of integrity, transparency, and governance.

OVERVIEW

EaseMyTrip commenced operations in 2008 by focusing on the B2B2C (business to business to customer) distribution channel and providing travel agents access through their website to book domestic travel airline

tickets in order to cater to the offline travel market in India. Subsequently, by leveraging their B2B2C channel, they commenced operations in the B2C (business to customer) distribution channel in 2011 by primarily focusing on the growing Indian middle class population's travel requirements. Consequently, due to their presence in the B2B2C and B2C channels, they were able to commence operations in the B2E (business to enterprise) distribution channel in 2013 with the aim of providing end-to-end travel solutions to corporates. Their presence in 3 distinct distribution channels provides them with a diversified customer base and wide distribution network.

As of March 31, 2025, the Company provided customers with access to more than 400 international and domestic airlines, more than 2.9 million hotels in India and international jurisdictions, almost all the railway stations in India as well as bus tickets and taxi rentals for major cities in India. Further, EaseMyTrip also had the largest network of travel agents with 72,000+ registered travel agents across almost all major cities in India as of March 31, 2025.

3. TRANSFER TO RESERVE

During the financial year under review, the Company had no outstanding Share Option balances and did not transfer any amount to the General Reserve.

The total General Reserve stands at ₹ 2,493.16 million on standalone basis whereas ₹ 2,216.82 million on consolidated basis.

4. CHANGE IN THE NATURE OF BUSINESS

There has been no change in the nature of the business of the Company. Your Company continues to be in the business of Travel and Travel related services, and is exploring business opportunities in Hospitality, Aviation, Insurance Broking Sector, EV Manufacturing and Foreign Exchange Money Changer.

5. SHARE CAPITAL

As on March 31, 2025, the authorised share capital of the Company stood at ₹5,00,00,00,000/- (comprising of 5,00,00,00,000 equity shares of face value ₹1/- each). Report on Corporate Governance

Our Company is deeply committed to the principles of good corporate governance, fostering sustainable value for stakeholders, enhancing the accountability of the Board and Management and strengthening the trust and confidence of the public in our organisation.

COMPANY'S PHILOSOPHY ON CORPORATE GOVERNANCE

At its core, Corporate Governance is a guiding philosophy that extends beyond mere compliance with statutory and regulatory requirements. It encompasses the deliberate and well-considered practices adopted by the Company to safeguard the interests of all stakeholders and to create a sustainable foundation for long-term success. This framework fosters a culture of strong business ethics, effective oversight, transparency and accountability across all levels of the organisation.

A robust corporate governance framework ensures an effective system of checks and balances among key constituents—namely, the Board of Directors, Management, Auditors and various stakeholders. Clear definition of roles and responsibilities, coupled with unwavering commitment to transparency at all times, lies at the heart of this system.

The appointment of Independent Directors within the Company is not a mere compliance exercise to meet listing requirements but a strategic choice to leverage their diverse skills, rich experience and independent perspective. These Directors play a critical role in shaping strategic direction, offering guidance and constructively challenging management through incisive questioning and meaningful deliberations on key decisions.

The Company is steadfast in its commitment to adopting and upholding the highest standards of Corporate Governance, with the ultimate objective of achieving business excellence and enhancing long-term shareholder value. This commitment is reinforced through the Company's Code of Conduct and Ethics, Corporate Governance Guidelines and Committee Charters. The Company's Board and Management processes, audit mechanisms and internal control systems are designed to align fully with these governance principles.

During the year under review, the Company has complied in all material respects with the requirements prescribed under the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 ("Listing Regulations") and the Companies Act, 2013 ("Act"), as applicable, in relation to Corporate Governance.

BOARD OF DIRECTORS

The Board is at the core of our Corporate Governance practices and oversees and ensures that the Management serves and protects the long-term interest of all our stakeholders. We believe that an active, well-informed and independent Board is necessary to ensure the highest standards of corporate governance.

As on March 31, 2025, the Board comprised Six members, including an Executive and non-independent Chairman and three independent directors including one Woman Director.

Detailed profile of all the directors is available on our website <https://www.easemytrip.com/about-us.html>

The three executive Directors belong to the Promoter Category and are relatives (as defined under the Companies Act, 2013). The Company does not have any pecuniary relationship with any of the non-executive directors.

The Board of Directors and its committees meet at regular Intervals.

The Company has issued formal letters of appointment to Independent Directors in the manner as provided in the Companies Act, 2013. The terms and conditions of appointment are disclosed on the website of the company.

SKILLS, EXPERTISE AND COMPETENCIES OF DIRECTORS

EaseMyTrip believes that it is the collective effectiveness of the Board that impacts Company performance and therefore members of the Board amongst themselves should have a balance of skills, experience and diversity of perspectives appropriate to the Company.

Given the Company's size, scale and diversified nature of its businesses, the Directors should possess one or more of the following skills, expertise and competencies:

1. Organizational Purpose

Ability to comprehend the socio-economic, political, regulatory and competitive environment—both domestic and global—in which the Company operates, coupled with the insight to identify opportunities and threats to its businesses. Competence to contribute to the development of an inspiring vision for the Company, aligned with overarching societal goals and to appreciate the Company's triple bottom line philosophy, which integrates societal service with the creation of sustainable economic value

2. Strategic Insight

Ability to evaluate corporate and business strategies in the competitive context and to contribute meaningfully to the progressive refinement of the Company's strategies to achieve its stated objectives.

3. Organizational Capacity Building

Acumen to assess organisational capacity and readiness across relevant parameters, and to provide guidance on addressing capacity gaps. Proficiency in understanding the talent landscape and the Company's talent quotient, thereby aiding in the formulation of strategies to attract, retain and nurture superior talent. Ability to recognise the need for in-depth specialisation in business-critical areas such as marketing, legal, information technology and public advocacy as well as the value of strong general management capabilities.

4. Stakeholder Value Creation

Capability to understand the processes that underpin shareholder value creation and its key drivers, while constructively critiquing initiatives aimed at generating value for all stakeholders.

5. Commercial Acumen

Financial and commercial expertise to assess the Company's performance and to evaluate strategies and action plans in light of their financial implications and outcomes.

6. Risk Management and Compliance

Ability to identify and appreciate the key risks affecting the Company's businesses, and to contribute to the development, implementation and periodic review of robust systems and controls for risk mitigation and compliance management.

7. Policy Evaluation

Competence to understand and periodically refine the Company's governance philosophy while evaluating policies, systems and processes in the context of business needs, regulatory requirements and evolving industry practices.

8. Culture Building

Ability to contribute to the Board's role in fostering an ethical and inclusive organisational culture, eliminating conflicts of interest and upholding the highest standards of ethics, integrity and professional conduct

9. Board Cohesion

Understanding of the statutory roles and responsibilities of an individual director and of the Board collectively. Ability to encourage and maintain a cohesive and collaborative working environment, to consider diverse perspectives and to synthesise a range of ideas to deliver optimal organisational outcomes.

26. Overview of the entity's material responsible business conduct issues

Please indicate material responsible business conduct and sustainability issues pertaining to environmental and social matters that present a risk or an opportunity to your business, rationale for identifying the same, approach to adapt or mitigate the risk along-with its financial implications, as per the following format.

S. No.	Material identified	Indicate whether risk or opportunity (R/O)	Rationale for identifying the risk / opportunity	In case of risk, Approach to adapt or mitigate	Financial implications of the risk or opportunity (Indicate Positive or negative implications)
1	Data privacy and Security	Risk	The identification of data privacy and security risks arises from the need to safeguard sensitive customer information, comply with legal obligations, protect the Company's reputation, maintain continuity of business operations, and secure valuable intellectual property..	EaseMyTrip addresses the risk through a multi-faceted approach. There is a comprehensive Risk Management policy and a dedicated Risk Management Committee to oversee data related matters. The company employs robust data protection measures, adheres to relevant regulations, and provides regular training to employees. EaseMyTrip has incident response protocols in place in the event of a breach. These actions demonstrate their commitment to protecting customer data, ensuring compliance, and maintaining a secure environment.	Negative: A potential breach or mishandling of sensitive data could result in financial losses and reputational damage. Negative implications include the potential loss of sensitive data impacting the company's brand image and trust among stakeholders. Additionally, unmanaged threats to corporate data can lead to financial and reputational damages.
2	Business Ethics and Governance	Risk	The risk of business ethics and integrity at EaseMyTrip arises from the need to protect reputation, build trust, ensure legal compliance, maintain employee morale, attract investors, and preserve customer loyalty. Upholding high ethical standards is crucial to avoid legal consequences, reputational damage, and negative stakeholder perception.	EaseMyTrip has implemented measures like the establishment of a Code of Conduct, conducting regular ethics training for employees, maintaining a Whistleblower Policy to encourage reporting of concerns, monitoring compliance through internal controls, ensuring transparent governance practices, and potentially collaborating with external organizations.	Both Negative and Positive: The negative financial implications of ethical risks involve legal consequences, reputational damage, and decreased employee productivity. However, the positive financial implications include enhanced stakeholder trust, investor confidence, and competitive advantage.

S. No.	Material identified	Indicate whether risk or opportunity (R/O)	Rationale for identifying the risk / opportunity	In case of risk, Approach to adapt or mitigate	Financial implications of the risk or opportunity (Indicate Positive or negative implications)
				These actions demonstrate the company's commitment to fostering an ethical culture, promoting accountability, and continuously improving its ethical framework.	By effectively managing and mitigating ethical risks, EaseMyTrip can minimize negative financial impacts and capitalize on the potential benefits associated with ethical business practices.
3	Human Capital Development	Opportunity	Well-being and job satisfaction of employees	-	Positive: Skilled employees can better adapt to emergent technologies.
4	Diversity and Inclusion	Opportunity	Supportive and positive work environment for the employees	-	Positive: Higher productivity leading to greater retention rate.
5	Community Care	Opportunity	Community care is identified as an opportunity for EaseMyTrip as it will help them develop good relations and rapport with their stakeholders, the wider community and promotes a positive brand image.	-	Positive: Brand value will increase. Negative: Increase in operational costs of the Company
6	Carbon emissions	Risk	Carbon emissions are identified as a risk for EaseMyTrip due to their environmental impact, the need to comply with stricter regulations, stakeholder expectations for environmental responsibility, and the importance of futureproofing the business.	EaseMyTrip has implemented initiatives such as focusing on energy efficiency measures, and raising awareness about environmental sustainability.	Negative: Compliance costs associated with stricter regulations and potential upfront expenses for adopting energy-efficient technologies. Positive: Cost savings through energy efficiency, a competitive advantage in attracting environmentally conscious customers, increased investor confidence, and long-term resilience.

S. No.	Material identified	Indicate whether risk or opportunity (R/O)	Rationale for identifying the risk / opportunity	In case of risk, Approach to adapt or mitigate	Financial implications of the risk or opportunity (Indicate Positive or negative implications)
7	Sustainable Operations and Infrastructure	Opportunity	Reduction in the impact on the environment leads to energy savings, related cost savings and improves the brand image of the company.	-	Positive: Reduction in annual water, waste, and emission intensities, hence leading to a reduction in annual costs of electricity and water consumption. Negative: Increase in Operational and capex costs for installing low carbon technologies
8	Travel Safety	Opportunity	Providing safety-related information is important and identified as opportunity for EaseMyTrip as it is a travel services-related industry and providing information on safety, protection and cleanliness is vital for it for the safety of its customers.	-	Positive: Increase in customer trust and less complaints on safety norms therefore leading to revenue growth.
9	Sustainable Travel	Opportunity	Sustainable travel is identified as opportunity for EaseMyTrip because it will lead them on a path of having a positive impact on the environment.	-	Positive: Attract more environment conscious customers. Reduces negative impact on the environment.
10	Quality Customer Experience	Opportunity	Customer satisfaction with the provided services.	-	Positive: Increase in customer base and improve performance and brand image.

Leadership Indicators

1. Awareness programmes conducted for value chain partners on any of the principles during the financial year:

Total number of awareness programmes held	Topics / principles covered under the training	%age of value chain partners covered (by value of business done with such partners) under the awareness programmes
None	NA	NA

Note: Being a travel and tour operating company, our principal products and services are airline tickets, hotels and holiday packages, rail and bus tickets, taxi rentals and ancillary services such as travel insurance, visa processing and tickets for activities and attractions. Correspondingly, our supplier base is predominated by leading airlines, hotels and travel package dealers. Given the large interface of our suppliers with the customers from all backgrounds, they are legally required to adhere to stringent norms related to environment, health and safety and therefore, do not require dedicated awareness programs on sustainability issues to be provided to them by us. However, we engage with our suppliers regularly to foster collaborative partnerships on all issues impacting the travel and tourism industry and promote sustainable travel for our customers.

2. Does the entity have processes in place to avoid/ manage conflict of interests involving members of the Board? (Yes/No) If yes, provide details of the same.

Yes. The Company receives an annual declaration (changes from time to time) from its Board members and KMP on the entities they are interested in and ensures requisite approvals as required under the statute as well as the Company's policies are in place before transacting with such entities / individuals.

PRINCIPLE 2: Businesses should provide goods and services in a manner that is sustainable and safe

Essential Indicators

1. Percentage of R&D and capital expenditure (capex) investments in specific technologies to improve the environmental and social impacts of product and processes to total R&D and capex investments made by the entity, respectively.

	FY 2024-25	FY 2023-24	Details of improvements in Environmental and social impacts
R&D	Nil		The Company operates in the service industry and does not invest in research and development activities.
Capex	Nil		In our financial statements, CAPEX includes fit outs and equipment for our offices, computers, laptops, etc. We try to consciously choose environment-friendly technologies, including energy efficient air conditioning systems, LED lighting fixtures, sensor-based taps, energy-efficient laptops, among others.

2. a. Does the entity have procedures in place for sustainable sourcing? (Yes/No)

Considering the nature of its business and the industry in which it operates, the Company's operations have a negligible impact on the environment as well as minimal social implications arising from its products and processes.

NIC Code	Name of Product / Service	% of total Turnover contributed	Boundary for which the Life Cycle Perspective / Assessment was conducted	Whether conducted by independent external agency (Yes/No)	Results communicated in public domain (Yes/No) If yes, provide the web-link.
Nil					

Note: As a leader in the service industry, we recognize the distinct nature of our operations, and while a traditional Life Cycle Assessment (LCA) might not directly apply, we remain firmly committed to sustainability. By prioritizing sustainable partnerships, driving digital innovation, and encouraging responsible customer engagement, EaseMyTrip showcases its dedication to environmentally conscious practices. While a formal LCA may not be the immediate focus, EMT's proactive approach underscores its ongoing commitment to both its customers and environmental responsibility.

2. If there are any significant social or environmental concerns and/or risks arising from production or disposal of your products / services, as identified in the Life Cycle Perspective / Assessments (LCA) or through any other means, briefly describe the same along-with action taken to mitigate the same.

Name of Product / Service	Description of the risk / concern	Action Taken

Independent Auditor’s Report

To the Members of Easy Trip Planners Limited

REPORT ON THE AUDIT OF THE STANDALONE FINANCIAL STATEMENTS

OPINION

- We have audited the accompanying standalone financial statements of Easy Trip Planners Limited ('the Company'), which comprise the Standalone Balance Sheet as at 31 March 2025, the Standalone Statement of Profit and Loss (including Other Comprehensive Income), the Standalone Statement of Cash Flow and the Standalone Statement of Changes in Equity for the year then ended, and notes to the standalone financial statements, including material accounting policy information and other explanatory information.
- In our opinion and to the best of our information and according to the explanations given to us, the aforesaid standalone financial statements give the information required by the Companies Act, 2013 ('the Act') in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards ('Ind AS') specified under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015 and other accounting principles generally accepted in India, of the state of affairs of the Company as at 31 March 2025, and its profit (including other comprehensive income), its cash flows and the changes in equity for the year ended on that date.
- We have determined the matter described below to be the key audit matter to be communicated in our report.

BASIS FOR OPINION

- We conducted our audit in accordance with the Standards on Auditing specified under section 143(10) of the Act. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Standalone Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India ('ICAI') together with the ethical requirements that are relevant to our audit of the standalone financial statements under the provisions of the Act and the rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

KEY AUDIT MATTERS

- Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the standalone financial statements of the current period. These matters were addressed in the context of our audit of the standalone financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Key audit matters	How our audit addressed the key audit matters
1. Recoverability of investments in and loans given to subsidiaries Refer note 2.2a and 2.8 of material accounting policy information and note 6, note 7 and note 53 of the standalone financial statements of the Company for the year ended 31 March 2025 As at 31 March 2025, the Company has investments in and loans recoverable from various subsidiary companies aggregating to ₹ 944.52 million and ₹ 944.98 million, respectively. The investments are carried at cost less impairment, if any, while the loans are carried at amortised cost less impairment, if any.	Our audit procedures to test recoverability of investments in and loans given to subsidiaries included, but were not limited to the following: a) Obtained an understanding of the management's process for impairment testing and expected credit loss determination, including for identification of impairment indicators and significant increase in credit risk relating to loans. Evaluated the design and implementation, and tested the operating effectiveness of the internal financial controls relating to such recoverability assessment of loans and investments;

Key audit matters	How our audit addressed the key audit matters
The management annually reviews whether any impairment indicators exists in the carrying value of investments in accordance with the requirements of Ind AS 36, Impairment of Assets ('Ind AS 36'), and whether there is any significant increase in credit risk since initial recognition with respect to loans outstanding in accordance with the requirements of Ind AS 109, Financial Instruments ('Ind AS 109'). Some of the subsidiaries of the Company have incurred losses in recent years including in the current year, and the carrying values of such investments exceed the net worth of the respective subsidiaries. Considering the existence of aforesaid impairment indicator, the Company has assessed the recoverable amounts of the material investments by carrying out separate valuations using discounted cash flow method with the help of external valuation experts. Such determination requires management to make significant estimates, judgements and assumptions relating to forecast of future revenue, operating margins, growth rate and selection of the discount rates to determine the recoverable value to be considered for impairment testing of the carrying value of above-mentioned balances. Considering the materiality of the amounts, significant judgements and estimates involved, and the significant auditor attention required to test such accounting estimate by management, we have identified this as a key audit matter for current year audit.	b) Evaluated the appropriateness of accounting policies adopted by the management in respect of impairment testing and expect credit loss determination in accordance with Ind AS 36 and Ind AS 109. c) Assessed the professional competence and objectivity of the external valuation expert engaged by the management for performing the required valuations to estimate the recoverable value of the material investment in subsidiary companies where impairment indicators exists; d) Involved auditor's valuation experts to test appropriateness of valuation methodology and assumptions used in the valuations by the management's expert; e) Traced the future cash flow projections to approved business plans of the subsidiary companies and evaluated the reasonableness of the inputs used in the projections by comparing past projections with actual results to determine historical accuracy of projections, and by considering our understanding of the business and market conditions, as relevant; f) Evaluated sensitivity analysis performed by the management and further performed independent sensitivity analysis on these key assumptions to determine estimation uncertainty involved and impact on conclusions drawn; and g) Assessed the appropriateness and adequacy of disclosures made in the standalone financial statements in accordance with the applicable accounting standards.
2. Revenue recognition from air passage (Refer note 2.9 of material accounting policy information and note 23 of the standalone financial statements of the Company for the year ended 31 March 2025)	
The Company has derived its revenue mainly from agency commission and incentives based on sale of airline tickets amounting to ₹ 2,953.42 million during the year ended 31 March 2025. Revenue from the sale of airline tickets is recognised at a point in time, as an agent, on a net commission basis and revenue from incentives and service fees is recognised on accrual basis net of discounts given to the customers. Further, the Company records allowances for cancellations basis historical experience which is reversed and recognised as income once the claim period expired.	Our audit procedures in relation to revenue recognition included, but were not limited to the following: a) Obtained an understanding of the systems, processes and controls implemented by the Company for recording revenue from air passage. Evaluated the design and implementation and tested the operating effectiveness of key controls over revenue recognition. b) Obtained an understanding of the Company's accounting policy for revenue recognition as per Ind AS 115.

Key audit matters	How our audit addressed the key audit matters
The Company earns incentives from airlines if the specific targets are achieved based on the agreements / incentive schemes. The Company has treated such incentives as variable consideration in accordance with Ind AS 115, Revenue from Contracts with Customers ('Ind AS 115') and recognise as revenue over a period of time when the performance obligations under the incentive schemes / agreements are achieved/ expected to be achieved during the year. The management has implemented various manual controls for testing of system generated data from operational IT systems, including reconciliations with confirmations received from airlines pertaining to underlying travel related data, to ensure revenue is recorded in the correct period with correct amount. Revenue recognition is a key performance indicator and there is a presumed risk of fraud of revenue being overstated in accordance with Standards on Auditing as revenue is one of the Company's key performance indicators. Further, due to the dependence of the management on manual controls described above and management estimates involved in recording of incentives and other variable considerations which are dependent on estimation of likelihood of achievement of sale/ flown targets, requires significant auditor's efforts. Accordingly, we have identified revenue recognition from air passage as a key audit matter.	c) Traced the travel details, on a sample basis, for which income is recognised to the statements provided by the airlines and payments received from the payment gateway reports to test occurrence of revenue recognised. d) Tested the relevant system generated reports used for revenue recognition for ensuring the completeness and accuracy of the reports such as reconciliation with the external party confirmations, reconciliation of sales with the collections. e) On a sample basis, tested the amount of incentives accrued at the year-end based on terms agreed with various airlines using the travel / flown data received and confirmed from such airlines. f) Tested the amount of advertisement income, other variable consideration such as cancellation income and deposit incentives on sample basis from the agreements entered with the customers. g) Assessed the appropriateness and adequacy of disclosures in the standalone financial statements in accordance with the applicable accounting standards.

INFORMATION OTHER THAN THE STANDALONE FINANCIAL STATEMENTS AND AUDITOR'S REPORT THEREON

6. The Company's Board of Directors are responsible for the other information. The other information comprises the information included in the Annual Report, but does not include the standalone financial statements and our auditor's report thereon. The Annual Report is expected to be made available to us after the date of this auditor's report.

Our opinion on the standalone financial statements does not cover the other information and we will not express any form of assurance conclusion thereon.

In connection with our audit of the standalone financial statements, our responsibility is to read the other

information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the standalone financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

When we read the Annual Report, if we conclude that there is a material misstatement therein, we are required to communicate the matter to those charged with governance.

RESPONSIBILITIES OF MANAGEMENT AND THOSE CHARGED WITH GOVERNANCE FOR THE STANDALONE FINANCIAL STATEMENTS

7. The accompanying standalone financial statements have been approved by the Company's Board of Directors. The Company's Board of Directors are responsible for

the matters stated in section 134(5) of the Act with respect to the preparation and presentation of these standalone financial statements that give a true and fair view of the financial position, financial performance including other comprehensive income, changes in equity and cash flows of the Company in accordance with the Ind AS specified under section 133 of the Act and other accounting principles generally accepted in India. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

8. In preparing the standalone financial statements, the Board of Directors is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.
9. The Board of Directors is also responsible for overseeing the Company's financial reporting process.

AUDITOR'S RESPONSIBILITIES FOR THE AUDIT OF THE STANDALONE FINANCIAL STATEMENTS

10. Our objectives are to obtain reasonable assurance about whether the standalone financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these standalone financial statements.
11. As part of an audit in accordance with Standards on Auditing, specified under section 143(10) of the Act

we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the standalone financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls with reference to financial statements in place and the operating effectiveness of such controls;
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management;
- Conclude on the appropriateness of Board of Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the standalone financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern; and
- Evaluate the overall presentation, structure and content of the standalone financial statements, including the disclosures, and whether the standalone financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

12. We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.
13. We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.
14. From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the standalone financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

OTHER MATTER

15. The standalone financial statements of the Company for the year ended 31 March 2024 were audited by the predecessor auditor, S.R. Batliboi & Associates LLP, who have expressed an unmodified opinion on those standalone financial statements vide their audit report dated 24 May 2024.

REPORT ON OTHER LEGAL AND REGULATORY REQUIREMENTS

16. As required by section 197(16) of the Act, based on our audit, we report that the Company has paid remuneration to its directors during the year in accordance with the provisions of and limits laid down under section 197 read with Schedule V to the Act.
17. As required by the Companies (Auditor's Report) Order, 2020 ('the Order') issued by the Central Government of

India in terms of section 143(11) of the Act, we give in the Annexure A, a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.

18. Further to our comments in Annexure A, as required by section 143(3) of the Act based on our audit, we report, to the extent applicable, that:
 - a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purpose of our audit of the accompanying standalone financial statements;
 - b) Except for the matters stated in paragraph 18(f) (vi) below on reporting under Rule 11(g) of the Companies (Audit and Auditors) Rules, 2014 (as amended)), in our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books.
 - c) The standalone financial statements dealt with by this report are in agreement with the books of account;
 - d) In our opinion, the aforesaid standalone financial statements comply with Ind AS specified under section 133 of the Act;
 - e) On the basis of the written representations received from the directors and taken on record by the Board of Directors, none of the directors is disqualified as on 31 March 2025 from being appointed as a director in terms of section 164(2) of the Act;
 - f) The qualification relating to the maintenance of accounts and other matters connected therewith are as stated in paragraph 18(b) above on reporting under section 143(3)(b) of the Act and paragraph 18(h)(vi) below on reporting under Rule 11(g) of the Companies (Audit and Auditors) Rules, 2014 (as amended);
 - g) With respect to the adequacy of the internal financial controls with reference to financial statements of the Company as on 31 March 2025

and the operating effectiveness of such controls, refer to our separate report in Annexure B, wherein we have expressed an unmodified opinion; and

- h) With respect to the other matters to be included in the Auditor's Report in accordance with rule 11 of the Companies (Audit and Auditors) Rules, 2014 (as amended), in our opinion and to the best of our information and according to the explanations given to us:
 - i. The Company, as detailed in note 32 to the standalone financial statements, has disclosed the impact of pending litigations on its financial position as at 31 March 2025;
 - ii. The Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses as at 31 March 2025;
 - iii. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company during the year ended 31 March 2025 (Refer note 32C);
 - iv.
 - a. The management has represented that, to the best of its knowledge and belief other than as disclosed in note 42(iv) to the standalone financial statements, no funds have been advanced or loaned or invested (either from borrowed funds or securities premium or any other sources or kind of funds) by the Company to or in any person or entity, including foreign entities ('the intermediaries'), with the understanding, whether recorded in writing or otherwise, that the intermediary shall, whether, directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Company ('the Ultimate Beneficiaries') or provide any guarantee, security or the like on behalf the Ultimate Beneficiaries;
 - b. The management has represented that, to the best of its knowledge and belief, as

disclosed in note 42(v) to the standalone financial statements, no funds have been received by the Company from any person or entity, including foreign entities ('the Funding Parties'), with the understanding, whether recorded in writing or otherwise, that the Company shall, whether directly or indirectly, lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Funding Party ('Ultimate Beneficiaries') or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries; and

- c. Based on such audit procedures performed as considered reasonable and appropriate in the circumstances, nothing has come to our notice that has caused us to believe that the management representations under sub-clauses (a) and (b) above contain any material misstatement.
- v. The Company has not declared or paid any dividend during the year ended 31 March 2025.
- vi. As stated in Note 45 to the standalone financial statements and based on our examination which included test checks, except for matter mentioned below, the Company, in respect of financial year commencing on 1 April 2024, has used an accounting software for maintaining its books of account which have a feature of recording audit trail (edit log) facility and the same have been operated throughout the year for all relevant transactions recorded in the software. Further, during the course of our audit we did not come across any instance of audit trail feature being tampered with other than the consequential impact of the exception given below. referred to in paragraph 17 of the Independent Auditor's Report of even date to the members of Easy Trip Planners Limited on the standalone financial statements for the year ended 31 March 2025

In terms of the information and explanations sought by us and given by the Company and the books of account and records examined by us in the normal course of audit, and to the best of our knowledge and belief, we report that:

- (i) (a) (A) The Company has maintained proper records showing full particulars, including quantitative details and situation of property, plant and equipment and investment properties.
- (B) The Company has maintained proper records showing full particulars of intangible assets.
- (b) The property, plant and equipment and investment properties have been physically verified by the management during the year and no material discrepancies were noticed on such verification. In our opinion, the frequency of physical verification programme adopted by the Company is reasonable having regard to the size of the Company and the nature of its assets.
- (c) The title deeds of all the immovable properties (including investment properties) held by the Company, disclosed in Note 4 to the standalone financial statements, are held in the name of the Company.
- (d) The Company has adopted cost model for its property, plant and equipment and intangible assets. Accordingly, reporting under clause 3(i)(d) of the Order is not applicable to the Company.

(xvii) The Company has not incurred any cash losses in the current financial year as well as the immediately preceding financial year.

(xviii) There has been resignation of the statutory auditors during the year and based on the information and explanations given to us by the management and the response received by us pursuant to our communication with the outgoing auditors, there have been no issues, objections or concerns raised by the outgoing auditors.

(xix) According to the information and explanations given to us and on the basis of the financial ratios, ageing and expected dates of realisation of financial assets and payment of financial liabilities, other information in the standalone financial statements, our knowledge of the plans of the Board of Directors and management and based on our examination of the evidence supporting the assumptions, nothing has come to our attention, which causes us to believe that any material uncertainty exists as on the date of the audit report indicating that Company is not capable of meeting its liabilities existing at the date of balance sheet as and when they fall due within a period of one year from the balance sheet date. We, however, state that this is not an assurance as to the future viability of the company. We further state that our reporting is based on the facts up to the date

of the audit report and we neither give any guarantee nor any assurance that all liabilities falling due within a period of one year from the balance sheet date, will get discharged by the company as and when they fall due.

(xx) (a) In our opinion and according to the information and explanations given to us, there are no unspent amounts towards Corporate Social Responsibility pertaining to other than ongoing projects as at end of the current financial year. Accordingly, reporting under clause 3(xx)(a) of the Order is not applicable to the Company.

(b) In our opinion and according to the information and explanations given to us, the Company has transferred the remaining unspent amounts towards Corporate Social Responsibility (CSR) under sub-section (5) of section 135 of the Act, in respect of ongoing project, within a period of 30 days from the end of financial year to a special account in compliance with the provision of sub-section (6) of section 135 of the Act.

(xxi) The reporting under clause 3(xxi) of the Order is not applicable in respect of audit of standalone financial statements of the Company. Accordingly, no comment has been included in respect of said clause under this report.

Annexure B

to the Independent Auditor's Report of even date to the members of Easy Trip Planner Limited on the standalone financial statements for the year ended 31 March 2025

INDEPENDENT AUDITOR'S REPORT ON THE INTERNAL FINANCIAL CONTROLS WITH REFERENCE TO THE STANDALONE FINANCIAL STATEMENTS UNDER CLAUSE (I) OF SUB-SECTION 3 OF SECTION 143 OF THE COMPANIES ACT, 2013 ('THE ACT')

1. In conjunction with our audit of the standalone financial statements of Easy Trip Planners Limited ('the Company') as at and for the year ended 31 March 2025, we have audited the internal financial controls with reference to financial statements of the Company as at that date.

RESPONSIBILITIES OF MANAGEMENT AND THOSE CHARGED WITH GOVERNANCE FOR INTERNAL FINANCIAL CONTROLS

2. The Company's Board of Directors is responsible for establishing and maintaining internal financial controls based on the internal financial controls with reference to financial statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting ('the Guidance Note') issued by the Institute of Chartered Accountants of India ('the ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of the Company's business, including adherence to the Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

AUDITOR'S RESPONSIBILITY FOR THE AUDIT OF THE INTERNAL FINANCIAL CONTROLS WITH REFERENCE TO FINANCIAL STATEMENTS

3. Our responsibility is to express an opinion on the Company's internal financial controls with reference to financial statements based on our audit. We conducted our audit in accordance with the Standards on Auditing issued by the ICAI prescribed under Section 143(10) of the Act, to the extent applicable to an audit of internal financial controls with reference to financial

statements, and the Guidance Note issued by the ICAI. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to financial statements were established and maintained and if such controls operated effectively in all material respects.

4. Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls with reference to financial statements and their operating effectiveness. Our audit of internal financial controls with reference to financial statements includes obtaining an understanding of such internal financial controls, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.
5. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls with reference to financial statements .

MEANING OF INTERNAL FINANCIAL CONTROLS WITH REFERENCE TO FINANCIAL STATEMENTS

6. A company's internal financial controls with reference to financial statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial controls with reference to financial statements include those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of

management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

INHERENT LIMITATIONS OF INTERNAL FINANCIAL CONTROLS WITH REFERENCE TO FINANCIAL STATEMENTS

7. Because of the inherent limitations of internal financial controls with reference to financial statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to financial statements to future periods are subject to the risk that the internal financial controls with reference to financial statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

OPINION

8. In our opinion, the Company has, in all material respects, adequate internal financial controls with reference to financial statements and such controls were operating effectively as at 31 March 2025, based on the internal financial controls with reference to financial statements criteria established by the Company considering the essential components of internal controls stated in the Guidance Note issued by the ICAI.

Notes to Standalone Financial Statements

For the year ended March 31, 2025

CIN - L63090DL2008PLC179041

All amounts in ₹ million (unless otherwise stated)

1. CORPORATE INFORMATION

Easy Trip Planners Limited ('the Company') (CIN: L63090DL2008PLC179041) is a public limited company domiciled in India and incorporated on June 04, 2008 under the provisions of the erstwhile Companies Act, 1956 replaced with the Companies Act, 2013 w.e.f April 01, 2014. The Company is engaged in the business of providing reservation and booking services related to travel and tourism through ease my trip-portal, ease my trip-app or in-house call-centre. The registered office of the Company is located at 223, Patparganj Industrial Area, Delhi 110092. The shares of the Company are listed on the National Stock Exchange of India Limited and BSE Limited.

2. SUMMARY OF MATERIAL ACCOUNTING POLICY INFORMATION

2.1 Basis of preparation

The standalone financial statements have been prepared to comply in all material aspects with the Indian Accounting Standard ('Ind AS') notified under the Companies (Indian Accounting Standards) Rules, 2015 (as amended from time to time) and presentation requirements of Division II of Schedule III to the Companies Act, 2013 (Ind AS compliant Schedule III). The standalone financial statements comply with Ind AS notified by Ministry of Company Affairs (MCA).

These standalone financial statements are approved for issue by the Board of Directors on May 30, 2025.

The accounting policies, as set out in the following paragraphs of this note, have been consistently applied, by the Company, to all the years presented in the said standalone financial statements.

These standalone financial statements have been prepared and presented on the going concern basis and at historical cost, except for the following assets and liabilities, which have been measured as indicated below:

- certain financial assets and financial liabilities that are measured at fair value (refer accounting policy regarding financial instruments); and

- employees' defined benefit plan and compensated absences are measured as per actuarial valuation.

The preparation of the said standalone financial statements requires the use of certain critical accounting estimates and judgements. It also requires the management to exercise judgement in the process of applying the Company's accounting policies. The areas where estimates are significant to the standalone financial statements, or areas involving a higher degree of judgement or complexity, are disclosed in Note 2.19.

All the amounts included in the standalone financial statements are reported in millions of Indian Rupees and are rounded to the nearest millions, except per share data and unless stated otherwise.

2.2 Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability. The principal or the most advantageous market must be accessible by the Company.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value,

Notes to Standalone Financial Statements

For the year ended March 31, 2025

CIN - L63090DL2008PLC179041

All amounts in ₹ million (unless otherwise stated)

maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the standalone financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognised in the standalone financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting year.

At each reporting date, the Company analyses the movements in the values of assets and liabilities which are required to be remeasured or re-assessed as per the Company's accounting policies.

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

2.2a Investment in subsidiaries:

A subsidiary is an entity that is controlled by another entity.

The Company's investments in its subsidiaries are carried at cost, less any impairment in the value of investment.

Impairment of investments

The Company reviews its carrying value of investments carried at cost annually, when there is indication for impairment. If the recoverable amount is less than its carrying amount, the impairment loss is recorded in the standalone statement of profit and loss.

When an impairment loss subsequently reverses, the carrying amount of the investment is increased to the revised estimate of its recoverable amount, so that the increased carrying amount does not exceed the cost of the investment. A reversal of an impairment loss is recognised immediately in standalone statement of profit or loss.

2.3 Current versus non-current classification

The Company presents assets and liabilities in the standalone balance sheet based on current / non-current classification.

An asset is classified as current when it satisfies any of the following criteria:

- it is expected to be realised in, or is intended for sale or consumption in, the company's normal operating cycle,
- it is held primarily for the purpose of being traded,
- it is expected to be realised within twelve months after the reporting date, or
- it is cash or cash equivalent unless it is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting date.

All other assets are classified as non-current.

A liability is classified as current when it satisfies any of the following criteria:

- it is expected to be settled in Company's normal operating cycle,
- it is held primarily for the purpose of trading,
- it is due to be settled within twelve months after the reporting date, or

Notes to Standalone Financial Statements

For the year ended March 31, 2025

CIN - L63090DL2008PLC179041

All amounts in ₹ million (unless otherwise stated)

- there is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting date.

All other liabilities are classified as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

The operating cycle is the time between the acquisition of assets for processing and their realisation in cash and cash equivalents. The Company has identified twelve months as its operating cycle.

2.4 Property, plant and equipment ('PPE')

An item is recognised as an asset, if and only if, it is probable that the future economic benefits associated with the item will flow to the Company and its cost can be measured reliably. PPE is stated at cost, net of accumulated depreciation and accumulated impairment losses, if any.

The initial cost of PPE comprises purchase price (including non-refundable duties and taxes but excluding any trade discounts and rebates), borrowing costs if capitalization criteria are met and directly attributable cost of bringing the asset to its working condition for the intended use.

Subsequent costs are included in the asset's carrying amount or recognised as separate assets, as appropriate, only when it is probable that the future economic benefits associated with expenditure will flow to the Company and the cost of the item can be measured reliably. All other repairs and maintenance are charged to standalone statement of profit and loss at the time of incurrence.

An item of property, plant and equipment and any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use or disposal.

Gains or losses arising from de-recognition of PPE are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are

recognised in the standalone statement of profit and loss when the asset is derecognised.

Depreciation on property, plant and equipment is calculated on a straight-line basis using the rates arrived at based on the useful lives estimated by the management which are in line with the useful lives prescribed in Schedule II of the Companies Act, 2013.

The Company has used the following useful lives to provide depreciation on its PPE.

Particulars	Years
Buildings	60
Furniture and fixtures	10
Vehicles	10
Computers	3
Office equipment	5
Vehicle- Others	8

Freehold land has an unlimited useful life and hence, is not depreciated.

The useful lives, residual values and depreciation method of PPE are reviewed, and adjusted appropriately, at-least as at each reporting date so as to ensure that the method and period of depreciation are consistent with the expected pattern of economic benefits from these assets. The effects of any change in the estimated useful lives, residual values and / or depreciation method are accounted prospectively, and accordingly the depreciation is calculated over the PPE's remaining revised useful life.

2.5 Intangible assets

Identifiable intangible assets are recognised when the Company controls the asset, it is probable that future economic benefits attributed to the asset will flow to the Company and the cost of the asset can be measured reliably.

Intangible assets are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less accumulated amortisation and accumulated impairment losses, if any.

Notes to Standalone Financial Statements

For the year ended March 31, 2025

CIN - L63090DL2008PLC179041

All amounts in ₹ million (unless otherwise stated)

Intangible assets with finite life are amortised on a straight-line basis over the estimated useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The Company amortises software over the best estimate of its useful life which is three years. Website maintenance costs are charged to expense as incurred.

The amortisation period and the amortisation method are reviewed at least at each financial year end. If the expected useful life of the asset is significantly different from previous estimates, the amortisation period is changed prospectively. If there has been a significant change in the expected pattern of economic benefits from the asset, the amortisation method is changed to reflect the changed pattern. Such changes are accounted for in accordance with Ind AS 8 - Accounting Policies, Changes in Accounting Estimates and Errors.

An intangible asset is derecognised upon disposal (i.e., at the date the recipient obtains control) or when no future economic benefits are expected from its use or disposal. Any gain or loss arising upon derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the standalone statement of profit and loss when the asset is derecognised.

2.6 Investment property

An investment in land or buildings, which is held by the Company for capital appreciation or to earn rentals or both, is classified as investment property.

Investment properties are measured initially at cost, including transaction costs. The cost comprises purchase price, borrowing costs if capitalization criteria are met and directly attributable cost of bringing the investment property to its working condition for the intended use. Subsequent to initial recognition, investment properties are stated at cost less accumulated depreciation and accumulated impairment loss, if any.

Depreciation on building component of investment property is calculated on a straight-line basis over the

period of 60 years, which is in line with the useful life prescribed in Schedule II to the Companies Act, 2013.

Depreciation on leasehold land component of investment property is calculated on a straight-line basis over the period of lease, which is in line with the useful life prescribed in Schedule II to the Companies Act, 2013.

Investment properties are derecognised either when they have been disposed of or when they are permanently withdrawn from use and no future economic benefit is expected from their disposal. The difference between the net disposal proceeds and the carrying amount of the asset is recognised in profit or loss in the year of derecognition.

2.7 Impairment of non-financial assets

The Company assesses, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) fair value less costs of disposal and its value in use. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used.

The Company bases its impairment calculation on detailed budgets and forecast calculations, which are prepared separately for each of the Company's CGUs to which the individual assets are allocated.

Notes to Standalone Financial Statements

For the year ended March 31, 2025

CIN - L63090DL2008PLC179041

All amounts in ₹ million (unless otherwise stated)

Impairment losses of continuing operations are recognised in the standalone statement of profit and loss.

For assets an assessment is made at each reporting date to determine whether there is an indication that previously recognised impairment losses no longer exist or have decreased. If such indication exists, the Company estimates the asset's or CGU's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the statement of profit and loss.

2.8 Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

(i) Financial assets

Initial recognition and measurement

Financial assets are classified, at initial recognition, as subsequently measured at amortised cost, fair value through other comprehensive income (OCI), and fair value through profit or loss.

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Company's business model for managing them. With the exception of trade receivables that do not contain a significant financing component or for which the Company has applied the practical expedient, the Company initially measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs. Trade receivables that do

not contain a significant financing component or for which the Company has applied the practical expedient are measured at the transaction price determined under Ind AS 115 "Revenue from Contracts with Customers". Refer to the accounting policies in section (f) Revenue from contracts with customers.

In order for a financial asset to be classified and measured at amortised cost or fair value through OCI, it needs to give rise to cash flows that are 'solely payments of principal and interest (SPPI)' on the principal amount outstanding. This assessment is referred to as the SPPI test and is performed at an instrument level. Financial assets with cash flows that are not SPPI are classified and measured at fair value through profit or loss, irrespective of the business model.

The Company's business model for managing financial assets refers to how it manages its financial assets in order to generate cash flows. The business model determines whether cash flows will result from collecting contractual cash flows, selling the financial assets, or both. Financial assets classified and measured at amortised cost are held within a business model with the objective to hold financial assets in order to collect contractual cash flows while financial assets classified and measured at fair value through OCI are held within a business model with the objective of both holding to collect contractual cash flows and selling.

Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in three categories:

- Financial assets at amortised cost (debt instruments)
- Financial assets designated at fair value through OCI with no recycling of cumulative gains and losses upon derecognition (equity instruments)
- Financial assets at fair value through profit or loss

Notes to Standalone Financial Statements

For the year ended March 31, 2025

CIN - L63090DL2008PLC179041

All amounts in ₹ million (unless otherwise stated)

Financial assets at amortised cost (debt instruments)

A 'financial asset' is measured at the amortised cost if both the following conditions are met:

- a) The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows, and
- b) Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

This category is the most relevant to the Company. After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate (EIR) method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in finance income in the profit or loss. The losses arising from impairment are recognised in the profit or loss. The Company's financial assets at amortised cost includes trade receivables, and loan to an associate and loan to a director included under other non-current financial assets. For more information on receivables, refer to Note 10.

Financial assets designated at fair value through OCI (equity instruments)

Upon initial recognition, the Company can elect to classify irrevocably its equity investments as equity instruments designated at fair value through OCI when they meet the definition of equity under Ind AS 32 Financial Instruments: Presentation and are not held for trading. The classification is determined on an instrument-by-instrument basis. Equity instruments which are held for trading and contingent consideration recognised by an acquirer in a business combination to which Ind AS103 "Business Combinations" applies are classified as at FVTPL.

Gains and losses on these financial assets are never recycled to profit or loss. Dividends are recognised as other income in the standalone statement of profit and loss when the right of payment has been established, except when the Company benefits from such proceeds as a recovery of part of the cost of the financial asset, in which case, such gains are recorded in OCI. Equity instruments designated at fair value through OCI are not subject to impairment assessment.

The Company elected to classify irrevocably its non-listed equity investments under this category.

Financial assets at fair value through profit or loss

Financial assets at fair value through profit or loss are carried in the standalone balance sheet at fair value with net changes in fair value recognised in the standalone statement of profit and loss.

This category includes derivative instruments and equity investments which the Company had not irrevocably elected to classify at fair value through OCI. Dividends on listed equity investments are recognised in the standalone statement of profit and loss when the right of payment has been established.

Derecognition

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognised (i.e. removed from the Company's standalone balance sheet) when:

- The rights to receive cash flows from the asset have expired, or
- The Company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement and either
 - (a) the Company has transferred substantially all the risks and rewards of the asset, or

Notes to Standalone Financial Statements

For the year ended March 31, 2025

CIN - L63090DL2008PLC179041

All amounts in ₹ million (unless otherwise stated)

- (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Company has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Company continues to recognise the transferred asset to the extent of the Company's continuing involvement. In that case, the Company also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Company could be required to repay.

Impairment of financial assets

Further disclosures relating to impairment of financial assets are also provided in the following notes:

- Disclosures for significant assumptions – see Note 2.19
- Trade receivables and contract assets – see Note 10

The Company recognises an allowance for expected credit losses (ECLs) for all debt instruments not held at fair value through profit or loss. ECLs are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Company expects to receive, discounted at an approximation of the original effective interest rate. The expected cash flows will include cash flows from the sale of

collateral held or other credit enhancements that are integral to the contractual terms.

ECLs are recognised in two stages. For credit exposures for which there has not been a significant increase in credit risk since initial recognition, ECLs are provided for credit losses that result from default events that are possible within the next 12 months (a 12 month ECL). For those credit exposures for which there has been a significant increase in credit risk since initial recognition, a loss allowance is required for credit losses expected over the remaining life of the exposure, irrespective of the timing of the default (a lifetime ECL).

For trade receivables and contract assets, the Company applies a simplified approach in calculating ECLs. Therefore, the Company does not track changes in credit risk, but instead recognises a loss allowance based on lifetime ECLs at each reporting date. The Company has established a provision matrix that is based on its historical credit loss experience, adjusted for forward-looking factors specific to the debtors and the economic environment.

The Company considers a financial asset in default when contractual payments are 90 days past due. However, in certain cases, the Company may also consider a financial asset to be in default when internal or external information indicates that the Company is unlikely to receive the outstanding contractual amounts in full before taking into account any credit enhancements held by the Company. A financial asset is written off when there is no reasonable expectation of recovering the contractual cash flows.

Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the standalone balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

Notes to Standalone Financial Statements

For the year ended March 31, 2025

CIN - L63090DL2008PLC179041

All amounts in ₹ million (unless otherwise stated)

Financial guarantee contracts

A financial guarantee contract is a contract that requires the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payments when due in accordance with the terms of a debt instrument. Financial guarantee contracts issued by the Company are initially measured at their fair values and, if not designated as at FVTPL, are subsequently measured at the higher of:

- The amount of loss allowance determined in accordance with impairment requirements of Ind AS 109; and
- The amount initially recognised less, when appropriate, the cumulative amount of income recognised in accordance with the principles of Ind AS 115.

ii) Financial liabilities

All financial liabilities are recognized initially at fair value. The Company's financial liabilities include borrowings, trade payables and other payables.

After initial recognition, financial liabilities are subsequently measured either at amortised cost using the effective interest rate (EIR) method, or at fair value through profit or loss.

Gains and losses are recognized in the statement of profit and loss when the liabilities are derecognized as well as through the EIR amortisation process. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the statement of profit and loss.

Derecognition

A financial liability is derecognized when the obligation under the liability is discharged or cancelled or expires. The gain or loss on derecognition is recognised in the statement of profit and loss.

Loans and borrowings

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the EIR amortisation process. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the statement of profit and loss.

2.9 Revenue recognition

Revenue from contracts with customers is recognised when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods or services.

Revenue is recognised to the extent that it is probable that economic benefits will flow to the Company and revenue can be reliably measured. The Company considers whether there are other promises in the contract that are separate performance obligations to which a portion of the transaction price needs to be allocated. In determining the transaction price for revenue, the Company considers the effects of variable consideration, the existence of significant financing components, noncash consideration and consideration payable to the customer (if any) excluding taxes and duty.

The Company assesses its revenue arrangement against specific criteria in order to determine if it is acting as principal or agent. The Company has concluded that it is acting as agent in case of sale of airline tickets and hotel packages as the supplier is primarily responsible for providing the underlying travel services and the Company does not control the service provided by the supplier to the traveller.

Income from services

A. Air passage

Revenue from the sale of airline tickets is recognised at a point in time, as an agent, on a

Notes to Standalone Financial Statements

For the year ended March 31, 2025

CIN - L63090DL2008PLC179041

All amounts in ₹ million (unless otherwise stated)

net commission basis and revenue from incentives and service fees is recognised on accrual basis net of discounts given to customers, as the Company does not assume any performance obligation post the confirmation of the issuance of an airline ticket to the customer. Further, the Company records allowance for cancellations basis historical experience which is reversed and recognised as income once the claim period expired.

The Company earns incentives from airlines if the specific targets are achieved based on the agreements/incentive schemes. The Company has treated such incentives as variable consideration in accordance with Ind AS 115, Revenue from Contracts with Customers ('Ind AS 115') and recognise as revenue over a period of time when the performance obligations under the incentive schemes / agreements are achieved/ expected to be achieved during the year.

The Company has measured the revenue in respect of its performance obligation of a contract at its standalone selling price. The price that is regularly charged for an item when sold separately is the best evidence of its standalone selling price.

The specific recognition criteria described below is also considered before revenue is recognised.

Variable consideration

If the consideration in a contract includes a variable amount, the Company estimates the amount of consideration to which it will be entitled in exchange for transferring the goods or services to the customer. The variable consideration is estimated at contract inception and constrained until it is highly probable that a significant revenue reversal in the amount of cumulative revenue recognised will not occur when the associated uncertainty with the variable consideration is subsequently resolved.

The Company recognizes incentives from airlines when incentives are expected to be achieved as per the threshold specified in the contract.

To estimate the variable consideration, the Company applies the expected value method for contracts. The selected method that best predicts amount of variable consideration is primarily driven by the amount of volume thresholds contained in the contract. The Company uses historical data for forecasting future cancellations to come up with expected cancellation percentages. These percentages are applied to determine the expected value of the variable consideration.

B. Hotels Packages

Income from hotel reservation is recognized as an agent on a net basis. Revenue is recognised at the time of issuance of hotel voucher including for non-refundable transactions as the Company does not assume any performance obligation post the confirmation of the issuance of hotel voucher to the customer.

Packages assembled by individual travellers through packaging functionality on our websites generally includes a merchant hotel component and some combinations of an air, car or destination services component. The individual package components are accounted for as separate performance obligations and recognised in accordance with our revenue recognition policies stated above. In few cases of corporate packages managed by the Company on an end to end basis, the Company acts as a principal and takes full responsibility of delivering the services, the revenues are recognised on a gross basis and cost of services against these packages is recognised as service costs.

Contract balances

Contract assets

A contract asset is the right to consideration in exchange for goods or services transferred to the customer. If the Company performs by transferring goods or services to a customer before the customer pays consideration or before payment is due, a contract asset is recognised for the earned consideration that is conditional.

Trade Receivables

A receivable represents the Company's right to an amount of consideration that is unconditional (i.e., only the passage of time is required before payment of the consideration is due). Refer to accounting policies of financial assets in section (2.10) Financial instruments.

Contract liabilities

A contract liability is the obligation to transfer goods or services to a customer for which the Company has received consideration (or an amount of consideration is due) from the customer. If a customer pays consideration before the Company transfers goods or services to the customer, a contract liability is recognised when the payment is made, or the payment is due (whichever is earlier). Contract liabilities are recognised as revenue when the Company performs under the contract.

The Company receives upfront advance from Global Distribution System ("GDS") provider for facilitating the booking of airline tickets on its software which is recognised as deferred revenue at the time of receipt. A pre-agreed incentive is given to the Company by the GDS provider in periodic intervals for each eligible and confirmed 'segment' which is recognised as revenue and adjusted against amount recognised as deferred revenue. A Segment means a booking for the travel of one passenger over one leg of a journey on a direct flight operated by a single aircraft under a single flight number.

Non- cash consideration

Ind AS 115 requires that the fair value of such non-cash consideration, received or expected to be received by the customer, is included in the transaction price. The Company measures the non-cash consideration at fair value. If Company cannot reasonably estimate the fair value of the non-cash consideration, the Company measures the consideration indirectly by reference to the standalone selling price of the goods or services promised to the customer in exchange for the consideration.

Income from other sources

Income from other sources, primarily comprising advertising revenue, income from sale of rail and bus tickets and fees for facilitating website access to travel insurance companies are being recognized when performance obligation being sale of ticket and sale of insurance in case of advertisement income is satisfied. Income from the sale of rail and bus tickets is recognized as an agent on a net commission earned basis, as the Company does not assume any performance obligation post the confirmation of the issuance of the ticket to the customer.

Revenue from business support services provided by the Company to its subsidiaries which includes managerial, customer support, technology related, financial and accounting, human resource management, legal services etc are recognised on completion of service.

Interest income

For all debt instruments measured at amortised cost, interest income is recorded using the effective interest rate (EIR). EIR is the rate that exactly discounts the estimated future cash payments or receipts over the expected life of the financial instrument or a shorter period, where appropriate, to the gross carrying amount of the financial asset or to the amortised cost of a financial liability. When calculating the effective interest rate, the Company estimates the expected cash flows by considering all the contractual terms of the financial instrument but does not consider the expected credit losses. Interest income is included in other income in the statement of profit and loss.

Claims written back

Claims/ amounts due to customer represent customer's rights to refund against cancelled and unutilised tickets, recorded under the head 'Other current financial liabilities.' The Company recognises such amount as income under the head Revenue from operations when the Company is legally released from its obligation to make refund to the customer after considering, among other

matters, user agreement defining the company policy to provide refund, airline/ hotel policy which may require the Company to make refund as well as the applicable government policies, legal and regulatory requirements.

2.10 Foreign currency transactions

The standalone financial statements are presented in Indian Rupees which is the functional and presentational currency of the Company.

Transactions in foreign currencies are initially recorded in the relevant functional currency at the rates prevailing at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are translated into the functional currency at the closing exchange rate prevailing as at the reporting date with the resulting foreign exchange differences, on subsequent restatement / settlement, recognized in the standalone statement of profit and loss within other expenses / other income.

2.11 Employee benefits (Retirement & Other Employee benefits)

Retirement benefit in the form of provident fund is a defined contribution scheme and the Company has no obligation, other than the contribution payable to the provident fund. The Company recognizes contribution payable to the provident fund scheme as an expenditure, when an employee renders the related service. If the contribution payable to the scheme for service received before the balance sheet date exceeds the contribution already paid, the deficit payable to the scheme is recognized as a liability after deducting the contribution already paid.

If the contribution already paid exceeds the contribution due for services received before the balance sheet date, then excess is recognized as an asset to the extent that the pre-payment will lead to a reduction in future payment or a cash refund.

The Company operates defined benefit plan for its employees, viz., gratuity. The costs of providing benefits under the plan are determined on the basis of actuarial valuation at each year-end. Actuarial valuation

is carried out for using the projected unit credit method. In accordance with the local laws and regulations, all the employees in India are entitled for the Gratuity plan. The said plan requires a lump-sum payment to eligible employees (meeting the required vesting service condition) at retirement or termination of employment, based on a pre-defined formula. The obligation towards the said benefits is recognised in the standalone balance sheet, at the present value of the defined benefit obligations less the fair value of plan assets (being the funded portion). The present value of the said obligation is determined by discounting the estimated future cash outflows, using interest rates of government bonds. The interest income / (expense) are calculated by applying the above-mentioned discount rate to the plan assets and defined benefit obligations liability. The net interest income / (expense) on the net defined benefit liability is recognised in the statement of profit and loss. However, the related re-measurements of the net defined benefit liability are recognised directly in the other comprehensive income in the year in which they arise. The said re-measurements comprise of actuarial gains and losses (arising from experience adjustments and changes in actuarial assumptions), the return on plan assets (excluding interest). Re-measurements are not re-classified to the standalone statement of profit and loss in any of the subsequent years.

Past service costs are recognised in profit or loss on the earlier of:

- the date of the plan amendment or curtailment, and
- the date that the Company recognises related restructuring costs

Net interest is calculated by applying the discount rate to the net defined benefit liability or asset. The Company recognises the following changes in the net defined benefit obligation as an expense in the standalone statement of profit and loss:

- Service costs comprising current service costs, past-service costs, gains and losses on curtailments and non-routine settlements; and
- Net interest expense or income

Accumulated leave, which is expected to be utilized within the next 12 months, is treated as short-term employee benefit. The Company measures the expected cost of such absences as the additional amount that it expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

The Company treats accumulated leave expected to be carried forward beyond twelve months, as long-term employee benefit for measurement purposes. Such long-term compensated absences are provided for based on the actuarial valuation using the projected unit credit method at the year-end. Actuarial gains / losses are immediately taken to the standalone statement of profit and loss and are not deferred.

The Company presents the leave as a current liability in the balance sheet, to the extent it does not have an unconditional right to defer its settlement for 12 months after the reporting date.

2.12 Income taxes

The income tax expense comprises of current and deferred income tax. Income tax is recognised in the standalone statement of profit and loss, except to the extent that it relates to items recognised in the other comprehensive income or directly in equity, in which case the related income tax is also recognised accordingly.

a. Current tax

The current tax is calculated on the basis of the tax rates, laws and regulations, which have been enacted or substantively enacted as at the reporting date. The payment made in excess / (shortfall) of the Company's income tax obligation for the year are recognised in the standalone balance sheet as current income tax assets / liabilities. Any interest, related to accrued liabilities for potential tax assessments are not included in income tax charge or (credit), but are rather recognised within finance costs.

Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to

interpretation and considers whether it is probable that a taxation authority will accept an uncertain tax treatment. The Company shall reflect the effect of uncertainty for each uncertain tax treatment by using either most likely method or expected value method, depending on which method predicts better resolution of the treatment

Current income tax assets and liabilities are off-set against each other and the resultant net amount is presented in the balance sheet, if and only when, (a) the Company currently has a legally enforceable right to set-off the current income tax assets and liabilities, and (b) when it relates to income tax levied by the same taxation authority and where there is an intention to settle the current income tax balances on net basis.

b. Deferred tax

Deferred tax is recognised, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying values in the standalone financial statements.

Deferred tax liabilities are recognised for all taxable temporary differences, except:

- When the deferred tax liability arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss and does not give rise to equal taxable and deductible temporary differences.
- In respect of taxable temporary differences associated with investments in subsidiaries, when the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or

Notes to Standalone Financial Statements

All amounts in ₹ million (unless otherwise stated)

in equity). Deferred tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity.

Deferred tax assets are recognised only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

The Company offsets deferred tax assets and deferred tax liabilities if and only if it has a legally enforceable right to set off current tax assets and current tax liabilities and the deferred tax assets and deferred tax liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities which intend either to settle current tax liabilities and assets on a net basis, or to realise the assets and settle the liabilities simultaneously, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.

2.13 Dividend distribution to equity holders

The Company recognises a liability to make dividend distributions to equity holders when the distribution is authorised and the distribution is no longer at the discretion of the Company. As per the corporate laws

in India, a distribution is authorised when it is approved by the shareholders or board of directors in Board meeting or Annual General Meeting as applicable. A corresponding amount is recognised directly in equity.

2.14 Earnings per share

Basic earnings per share are calculated by dividing the profit or loss for the year attributable to equity shareholders by the weighted average number of equity shares outstanding during the year. The weighted average number of equity shares outstanding during the year is adjusted for events such as bonus issue, bonus element in a rights issue, share split, and reverse share split (consolidation of shares) that have changed the number of equity shares outstanding, without a corresponding change in resources.

For the purpose of calculating diluted earnings per share, the net profit or loss for the year attributable to equity shareholders and the weighted average number of shares outstanding during the year are adjusted for the effects of all dilutive potential equity shares.

2.15 Provisions

A provision is recognized when the Company has a present obligation as a result of past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. If the effect of the time value of money is material, provisions are measured at the present value of management's best estimate of the expenditure required to settle the present obligation at the end of the reporting period. The discount rate used to determine the present value is a pre-tax rate that reflects the risks specific to the liability. The increase in the provision due to the passage of time is recognized as a finance cost.

Where the Company expects some or all of a provision to be reimbursed, for example under an insurance contract, the reimbursement is recognized as a separate asset but only when the reimbursement is virtually certain. The expense relating to any provision is presented in the standalone statement of profit and loss net of any reimbursement.

2.16 Contingent liabilities

A disclosure for a contingent liability is made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. When there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made. The Company does not recognize a contingent liability but discloses its existence in the standalone financial statements.

2.17 Cash and cash equivalents

Cash and cash equivalents comprise cash at bank and in hand and short-term deposits with an original maturity of three months or less (that are readily convertible to known amounts of cash and cash equivalents and subject to an insignificant risk of changes in value) and funds in transit. However, for the purpose of the standalone statement of cash flows, in addition to above items, any bank overdrafts / cash credits that are integral part of the Company's cash management, are also included as a component of cash and cash equivalents.

The cash flow has been prepared under the "Indirect Method" as set out in Indian Accounting Standard (Ind AS) 7 - statement of cash flows.

2.18 Segment reporting policies

Operating segments are reported in a manner consistent with the internal reporting provided to the Chief Operating Decision Maker (CODM). Only those business activities are identified as operating segment for which the operating results are regularly reviewed by the CODM to make decisions about resource allocation and performance measurement. For details, refer to note 35.

2.19 Critical accounting estimates and judgements

The preparation of standalone financial statements in conformity with Ind AS requires management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and disclosure of contingent liabilities at the end of the reporting period. Although these estimates are based upon management's best knowledge of

current events and actions, uncertainty about these assumptions and estimates could result in the outcomes requiring a material adjustment to the carrying amounts of assets or liabilities in future periods. Changes in estimates are reflected in the standalone financial statements in the period in which changes are made and if material, their effects are disclosed in the notes to the standalone financial statements. Revisions of estimates are recognised on a prospective basis.

Information about key judgments in applying accounting policies that have the most significant effect on the standalone financial statements are as follows: -

Note 2.12 - judgment required to determine probability of recognition of deferred tax assets;

Note 2.16 - judgment is required to ascertain whether it is probable or not that an outflow of resources embodying economic benefits will be required to settle the taxation disputes and legal claim

Note 2.7 - identification of impairment indicators

Information about key areas of estimation /uncertainty in applying accounting policies that have the most significant effect on the standalone financial statements are as follows: -

Note 2.11 and 31 - measurement of defined benefit obligations: key actuarial assumptions;

Note 2.4, 2.5 and 2.6 - useful life and residual values of property, plant and equipment, fair valuation of investment properties and useful life of intangible assets;

Note 2.2 and 37 - fair value measurement of financial instruments;

Note 2.7 and 4 - impairment assessment of investment property - key assumptions underlying recoverable amount;

Note 2.8 - impairment assessment of financial assets;

There are no assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment within the next financial year except for as disclosed in these standalone financial statements.

2.20 Recent pronouncements

Ministry of Corporate Affairs ("MCA") notifies new standards or amendments to the existing standards under the Companies (Indian Accounting Standards) Rules as issued from time to time. During the year ended 31 March 2025, MCA has notified Ind AS 117 - Insurance Contracts and amendments to Ind As 116 – Leases,

relating to sale and lease back transactions, applicable from 1 April 2024. The Company has reviewed the new pronouncements and based on its evaluation has determined that these amendments do not have any impact on the standalone financial statements.

On 7 May 2025, MCA notifies the amendments to Ind AS 21 - Effects of Changes in Foreign Exchange Rates. These amendments aim to provide clearer guidance on assessing currency exchangeability and estimating exchange rates when currencies are not readily exchangeable. The amendments are effective for annual periods beginning on or after April 1, 2025. The Company is currently assessing the probable impact of these amendments on its standalone financial statements

- 29** Sections 92-92F of Income-tax Act, 1961 prescribe Transfer Pricing regulations for computing the taxable income and expenditure from 'international transactions' between 'associated enterprises' on an 'arm's length' basis. These regulations, inter alia, also require the maintenance of prescribed documents and information including furnishing a report from an Accountant within the due date of filing the return of income. The Company has undertaken necessary steps to comply with the Transfer Pricing regulations. The Management is of the opinion that the international transactions are at arm's length, and hence the aforesaid legislation will not have any impact on the standalone financial statements, particularly on the amount of tax expense and that of provision for taxation.

30 EARNINGS PER SHARE (EPS)

- (a) Basic and diluted EPS amounts are calculated by dividing the profit for the year attributable to equity holders of the Company by the weighted average number of equity shares outstanding during the year.
- (b) The following table reflects reconciliation of share issued during the year:

The time weighting factor is the number of days for which the specific shares are outstanding as a proportion of total number of days during the year.
- (e) The earnings per share for all comparative period has been adjusted for the bonus issue of the equity share capital (refer note 13(b)).

31 EMPLOYEE BENEFITS

A. Defined contribution plans

The Company makes contributions towards provident fund and employee's state insurance which are defined contribution plans for qualifying employees. The contributions are made to the registered provident fund administered by the government. The obligation of the Company is limited to the amount contributed and it has no further contractual nor any constructive obligation. The expense recognised during the year towards defined contribution plan is ₹ 14.23 million (March 31, 2024: ₹ 13.11 million).

Contributions to Defined Contribution Plan, recognised as expense for the year are as under:

Particulars	For the year ended March 31, 2025	For the year ended March 31, 2024
Employer Provident Fund	14.09	12.85
Employees' State Insurance	0.14	0.26
Total	14.23	13.11

B. Defined Benefit Plans

Gratuity:

The gratuity plan is governed by the Payment of Gratuity Act, 1972. Under the Act, employees who have completed five years of service are entitled to specific benefit. The level of benefit provided depends on the member's length of service and salary retirement age. The employee is entitled to a benefit equivalent to 15 days salary last drawn for each completed year of service with part thereof in excess of six months subject to maximum limit of ₹ 2 million. The same is payable on termination of service or retirement or death whichever is earlier.

The present value of the obligation under such defined benefit plan is determined based on an actuarial valuation as at the reporting date using the projected unit credit method, which recognises each year of service as giving rise to additional unit of employee benefit entitlement and measures each unit separately to build up the final obligation. The obligations are measured at the present value of the estimated future cash flows. The discount rate used for determining the present value of the obligation under defined benefit plans is based on the market yields on Government

A quantitative sensitivity analysis for significant assumption is as shown below:

Particulars	As at March 31, 2025	As at March 31, 2024
Impact of the change in discount rate		
Present value of obligation at the end of the period	67.44	51.83
a) Impact due to increase of 0.50 %	(5.15)	(3.96)
b) Impact due to decrease of 0.50 %	5.74	4.42
Impact of the change in salary increase		
Present value of obligation at the end of the period	67.44	51.83
a) Impact due to increase of 0.50 %	4.23	3.24
b) Impact due to decrease of 0.50 %	(3.93)	(3.07)

The sensitivity analysis above have been determined based on a method that extrapolates the impact on the defined benefit obligation as a result of reasonable changes in key assumptions occurring at the end of the reporting year. These analysis are based on a change in a significant assumption, keeping all other assumptions constant and may not be representative of an actual change in the defined benefit obligation as it is unlikely that changes in assumptions would occur in isolation of one another.

The following payments are expected contributions to the defined benefit obligation in future years:

Particulars	As at March 31, 2025	As at March 31, 2024
Year 1 (next annual reporting period)	1.92	1.52
Year 2	1.53	1.13
Year 3	1.96	1.58
Year 4	2.42	1.76
Year 5	2.54	2.10
Year 6 onwards	155.31	89.72
Total expected payments	165.68	97.81

Sensitivities due to mortality & withdrawals are not material & hence impact of change due to these not calculated.

The average duration of the defined benefit plan obligation at the end of the reporting year is 17.47 years (March 31, 2024: 17.51 years).

These assumptions were developed by management with the assistance of independent actuarial appraisers. Discount factors are determined close to each year end by reference to government bonds of relevant economic markets and that have terms to maturity approximating to the terms of the related obligation. Other assumptions are based on management's historical experience.

Management has assessed that loans, trade receivables, cash and cash equivalents, other bank balances, other financial assets, trade payables, other financial liabilities, borrowings approximate their carrying amounts largely due to the short-term maturities of these instruments. The fair values of the quoted equity shares are based on price quotations at the reporting date.

38 FAIR VALUE HIERARCHY

All financial instruments for which fair value is recognised or disclosed are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole.

Level 1: This level of hierarchy includes financial assets that are measured by reference to quoted (unadjusted) prices in active markets for identical assets or liabilities.

Level 2: This level of hierarchy includes financial assets that are measured using inputs, other than quoted prices included within level 1, that are observable for such items, directly or indirectly.

Level 3: unobservable inputs for the asset or liability

The following table provides the fair value measurement hierarchy of the Company's assets and liabilities:

39 FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES

The Company's activities are exposed to variety of financial risk; credit risk, liquidity risk and foreign currency risk. The Company's senior management oversees the management of these risks. The Company's senior management ensures that the Company's financial risk activities are governed by appropriate policies and procedures and that financial risks are identified, measured and managed in accordance with the Company's policies and risk objectives. The Company reviews and agrees on policies for managing each of these risks which are summarized below:

(a) Credit risk

Credit risk is the risk that a counter party will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Company is exposed to credit risk from its operating activities (primarily trade receivables), including deposits with banks and financial institutions, foreign exchange transactions and other financial instruments.

Trade receivable & other financial assets:-

The Company exposure to credit risk is influenced mainly by the individual characteristics of each customer and if a customer fails to meet its contractual obligations. The demographics of the customer, including the default risk of the industry and country in which the customer operates, also has an influence on credit risk assessment.

The Company uses a provision matrix to compute the expected credit loss allowance for trade receivables. The provision matrix takes into account available internal credit risk factors such as the Company's historical experience for customers. Based on the business environment in which the Company operates, management considers that the trade receivables are in default (credit impaired) if the payments are more than 180 days past due (other than receivables from related parties). Majority of trade receivables are from domestic customers, which are fragmented and are not concentrated to individual customers.

- (i) Trade receivables are typically unsecured. Credit risk is managed by the Company through credit approvals, establishing credit limits and continuously monitoring the creditworthiness of customers to which the Company grants credit terms in the normal course of business.

The ageing analysis of trade receivables as of the reporting date is as follows:

Particulars	Not Due	1 to 30 days	31 to 60 days	61 to 90 days	91 to 180 days	More than 180 days	Total
As at March 31, 2025	880.84	519.05	168.58	468.22	246.85	559.32	2,842.86

* The ageing of trade receivables does not include expected credit loss.

(ii) Expected credit loss for trade receivables using simplified approach

Particulars	As at March 31, 2025	As at March 31, 2024
Gross carrying amount	2,842.86	2,493.61
Expected credit losses (loss allowance provision)	(139.81)	(121.99)

(iii) Financial Guarantees

The Company is exposed to credit risk in relation to financial guarantee given to bank. The Company's maximum exposure in this respect is the maximum amount the Company could have to pay if the guarantee is called on. Financial guarantees are accounted as explained in note 2.8. The maximum amount the Company could be forced to settle under the arrangement for the full guaranteed amount if that amount is claimed by the counterparty to the guarantee is ₹ 337.90 million. Based on expectations at the end of the reporting year, the Company considers that it is more likely than not that such an amount will not be payable under the arrangement.

(b) Liquidity risk

Liquidity risk is the risk that the Company may not be able to meet its present and future cash and collateral obligations without incurring unacceptable losses. The Company's objective is to, at all times maintain optimum levels of liquidity to meet its cash and collateral requirements. The Company closely monitors its liquidity position and deploys a robust cash management system. It maintains adequate sources of financing including loans from banks at an optimised cost.

The table below summarises the maturity profile of the Company's financial liabilities based on contractual undiscounted payments.

(c) Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: interest rate risk, currency risk and other price risk, such as equity price risk and commodity risk. Financial instruments affected by market risk include trade payables in foreign currency.

(i) Foreign currency risk:

The fluctuation in foreign currency exchange rates may have potential impact on the standalone statement of profit or loss, where any transaction references more than one currency or where assets/liabilities are denominated in a currency other than the functional currency of the standalone Company. The Company undertakes transactions denominated in foreign currencies and thus it is exposed to exchange rate fluctuations. The Company has a treasury team which evaluates the impact of foreign exchange rate fluctuations by assessing its exposure to exchange rate risks and advises the management of any material adverse effect on the Company.

52 During the previous year, the Company via Shareholder's cum Share Subscription agreement ("SSSA") had acquired 55% controlling interest in Glegoo Innovations Private Limited for a consideration of ₹ 30.00 Million comprising of 2,75,000 equity shares of ₹ 10 each. As at March 31, 2024; shares have been subscribed and partly paid up to the extent of ₹ 14.87 Million.

During the current year, the shares have been fully paid up and accordingly, the investment as at March 31, 2025 is ₹ 30.00 Million (March 31, 2024 : ₹ 14.87 Million).

53 IMPAIRMENT ASSESSMENT

The Company holds investments amounting to ₹ 944.52 millions (March 31, 2024: ₹ 914.92 millions) in its subsidiaries. The value of the loans to its subsidiaries, including interest accrued thereon is ₹ 973.62 millions (March 31, 2024: ₹ 423.02 millions). As at March 31, 2025, the management of the Company assessed the recoverability of the investments and loans by carrying out a valuation of its subsidiaries business with the help of an external valuation expert using the discounted cashflow method.

Key assumptions used in calculating the recoverable value of subsidiaries:

- discount rates ranging from 15% to 22%
- terminal growth rate ranging from 2% to 5%

Considering the recoverable value assessed basis the valuation performed, the management of the Company is of the view that there is sufficient head room available and hence, no impairment is required to be recorded with respect to its investments (including loans) to its subsidiaries. Further, there were no impairment indicators in the previous year ended March 31, 2024.

54 The previous period / year figures have been regrouped / reclassified wherever necessary to conform to current year presentation. The impact of such reclassification / regrouping are not material to the financials statements.

Independent Auditor's Report

To the Members of Easy Trip Planners Limited

REPORT ON THE AUDIT OF THE CONSOLIDATED FINANCIAL STATEMENTS

OPINION

1. We have audited the accompanying consolidated financial statements of Easy Trip Planners Limited ('the Holding Company' or 'Company') and its subsidiaries (the Holding Company and its subsidiaries together referred to as 'the Group'), as listed in Annexure 1, which comprise the Consolidated Balance Sheet as at 31 March 2025, the Consolidated Statement of Profit and Loss (including Other Comprehensive Income), the Consolidated Statement of Cash Flows and the Consolidated Statement of Changes in Equity for the year then ended, and notes to the consolidated financial statements, including material accounting policy information and other explanatory information.
2. In our opinion and to the best of our information and according to the explanations given to us and based on the consideration of the reports of the other auditors on separate financial statements and on the other financial information of the subsidiaries, the aforesaid consolidated financial statements give the information required by the Companies Act, 2013 ('the Act') in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards ('Ind AS') specified under section 133 of the Act, read with the Companies (Indian Accounting Standards) Rules, 2015, and other accounting principles generally accepted in India of the consolidated state of affairs of the Group, as at 31 March 2025, and their consolidated profit (including other comprehensive income), consolidated

cash flows and the consolidated changes in equity for the year ended on that date.

BASIS FOR OPINION

3. We conducted our audit in accordance with the Standards on Auditing specified under section 143(10) of the Act. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Group in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India ('ICAI') together with the ethical requirements that are relevant to our audit of the consolidated financial statements under the provisions of the Act and the rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained together with the audit evidence obtained by the other auditors in terms of their reports referred to in paragraph 15 of the Other Matters section below, is sufficient and appropriate to provide a basis for our opinion.

KEY AUDIT MATTERS

4. Key audit matters are those matters that, in our professional judgment and based on the consideration of the reports of the other auditors on separate financial statements of the subsidiaries, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

5. We have determined the matter described below to be the key audit matters to be communicated in our report.

Key audit matters	How our audit addressed the key audit matters
(1) Impairment assessment of goodwill and acquired intangible assets with indefinite useful lives (Refer note 2.5, 2.7 and 2.9 of material accounting policy information and note 4 of the consolidated financial statements of the Holding Company for the year ended 31 March 2025) As at 31 March 2025, the Group carries goodwill and acquired intangible assets with indefinite useful lives (brands and trademarks) aggregating to ₹ 496.95 million and ₹ 103.12 million, respectively, that are required to be tested for impairment by the management on an annual basis in accordance with the requirements of Ind AS 36, Impairment of Assets ('Ind AS 36'). The management has determined the recoverable amount of intangible assets with indefinite useful lives using discounted cash flow method of valuation while the recoverable amount of goodwill has been determined by carrying out valuations using discounted cash flow method, of underlying cash generating units (CGUs) to which the goodwill is allocated by management for monitoring purpose in accordance with the requirements of Ind AS 36. Such valuations, performed with the help of external valuation experts, required the management to make significant estimates, judgements and assumptions relating to forecast of future revenue, operating margins, growth rate and selection of the discount rates to determine the recoverable value to be considered for impairment testing of the carrying value of goodwill and intangible assets. Considering the materiality of the amounts and significant degree of judgement and subjectivity involved in the estimates and key assumptions in the impairment testing of goodwill and intangible assets, we have identified this as a key audit matter.	Our audit procedures for impairment assessment of goodwill and intangible assets with indefinite useful lives included, but were not limited to, the following procedures: - Obtained an understanding of impairment assessment process of goodwill and intangible assets, including identification of CGUs and allocation of goodwill to such CGUs by management for monitoring purpose. Evaluated the design and implementation, and tested the operative effectiveness of key internal financial controls over such process; - Evaluated the appropriateness of accounting policy adopted by the management in respect of impairment testing of goodwill and intangible assets in accordance with Ind AS 36. - Assessed the professional competence and objectivity of the external valuation expert engaged by the management for performing the required valuations to estimate the recoverable value of CGUs; - Involved auditor's valuation experts for review of valuation methodology and assumptions used in the valuations by the management's expert; - Traced the future cash flow projections to approved business plans of the CGUs and evaluated the reasonableness of the inputs used in the projections by comparing past projections with actual results to determine historical accuracy of projections, and by considering our understanding of the business and market conditions, as relevant; - Evaluated sensitivity analysis performed by the management and further performed independent sensitivity analysis on these key assumptions to determine estimation uncertainty involved and impact on conclusions drawn; and - Assessed the appropriateness and adequacy of disclosures made in the consolidated financial statements in accordance with the applicable accounting standards.

Key audit matters	How our audit addressed the key audit matters
(2) Revenue recognition from air passage (Refer note 2.15 of material accounting policy information and note 24 of the consolidated financial statements of the Holding Company for the year ended 31 March 2025) The Holding Company has derived its revenue mainly from agency commission and incentives based on sale of airline tickets amounting to ₹ 2,953.42 million during the year ended 31 March 2025. Revenue from the sale of airline tickets is recognised at a point in time, as an agent, on a net commission basis and revenue from incentives and service fees is recognised on accrual basis net of discounts given to the customers. Further, the Company records allowances for cancellations basis historical experience which is reversed and recognised as income once the claim period expired. The Company earns incentives from airlines if the specific targets are achieved based on the agreements / incentive schemes. The Company has treated such incentives as variable consideration in accordance with Ind AS 115, Revenue from Contracts with Customers ('Ind AS 115') and recognise as revenue over a period of time when the performance obligations under the incentive schemes / agreements are achieved / expected to be achieved during the year. The management has implemented various manual controls for testing of system generated data from operational IT systems, including reconciliations with confirmations received from airlines pertaining to underlying travel related data, to ensure revenue is recorded in the correct period with correct amount. Revenue recognition is a key performance indicator and there is a presumed risk of fraud of revenue being overstated in accordance with Standards on Auditing as revenue is one of the Company's key performance indicators. Further, due to the dependence of the management on manual controls described above and management estimates involved in recording of incentives and other variable considerations which are dependent on estimation of likelihood of achievement of sale/ flown targets, requires significant auditor's efforts. Accordingly, we have identified revenue recognition from air passage as a key audit matter.	Our audit procedures in relation to revenue recognition included, but were not limited to the following: - Obtained an understanding of the systems, processes and controls implemented by the Company for recording revenue from air passage. Evaluated the design and implementation and tested the operating effectiveness of key controls over revenue recognition. - Obtained an understanding of the Company's accounting policy for revenue recognition as per Ind AS 115. - Traced the travel details, on a sample basis, for which income is recognised to the statements provided by the airlines and payments received from the payment gateway reports to test occurrence of revenue recognised. - Tested the relevant system generated reports used for revenue recognition for ensuring the completeness and accuracy of the reports such as reconciliation with the external party confirmations, reconciliation of sales with the collections. - On a sample basis, tested the amount of incentives accrued at the year-end based on terms agreed with various airlines using the space travel / flown data received and confirmed from such airlines. - Tested the amount of advertisement income, other variable consideration such as cancellation income and deposit incentives on sample basis from the agreements entered with the customers. - Assessed the appropriateness and adequacy of disclosures in the consolidated financial statements in accordance with the applicable accounting standards.

INFORMATION OTHER THAN THE CONSOLIDATED FINANCIAL STATEMENTS AND AUDITOR'S REPORT THEREON

6. The Holding Company's Board of Directors are responsible for the other information. The other information comprises the information included in the Annual Report, but does not include the consolidated financial statements and our auditor's report thereon. The Annual Report is expected to be made available to us after the date of this auditor's report.

Our opinion on the consolidated financial statements does not cover the other information and we will not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

When we read the Annual Report, if we conclude that there is a material misstatement therein, we are required to communicate the matter to those charged with governance.

RESPONSIBILITIES OF MANAGEMENT AND THOSE CHARGED WITH GOVERNANCE FOR THE CONSOLIDATED FINANCIAL STATEMENTS

7. The accompanying consolidated financial statements have been approved by the Holding Company's Board of Directors. The Holding Company's Board of Directors are responsible for the matters stated in section 134(5) of the Act with respect to the preparation and presentation of these consolidated financial statements that give a true and fair view of the consolidated financial position, consolidated financial performance including other comprehensive income, consolidated changes in equity and consolidated cash flows of the Group in accordance with the Ind AS specified under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, and other accounting principles generally accepted in India. The Holding Company's Board of Directors are also responsible for ensuring accuracy of records including financial information considered necessary for the preparation of consolidated Ind AS financial statements. Further, in terms of the provisions of the Act, the respective Board of Directors of the companies

included in the Group, covered under the Act are responsible for maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Group and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error. These financial statements have been used for the purpose of preparation of the consolidated financial statements by the Board of Directors of the Holding Company, as aforesaid.

8. In preparing the consolidated financial statements, the respective Board of Directors of the companies included in the Group are responsible for assessing the ability of the Group to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intend to liquidate the Group or to cease operations, or has no realistic alternative but to do so.
9. Those respective Board of Directors are also responsible for overseeing the financial reporting process of the companies included in the Group.

AUDITOR'S RESPONSIBILITIES FOR THE AUDIT OF THE CONSOLIDATED FINANCIAL STATEMENTS

10. Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.
11. As part of an audit in accordance with Standards on Auditing specified under section 143(10) of the Act we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;
 - Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Holding Company has adequate internal financial controls with reference to financial statements in place and the operating effectiveness of such controls;
 - Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management;
 - Conclude on the appropriateness of Board of Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the ability of the Group to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern;
 - Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation; and
 - Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group, to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the audit of financial statements of such entities included in the consolidated financial statements, of which we are the independent auditors. For the other entities included in the consolidated financial statements, which have been audited by the other auditors, such other auditors remain responsible for the direction, supervision and performance of the audits carried out by them. We remain solely responsible for our audit opinion.
12. We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.
 13. We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.
 14. From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

OTHER MATTERS

15. We did not audit the financial statements of 18 (eighteen) subsidiaries, whose financial statements reflects total assets of ₹ 3,208.27 million as at 31 March 2025, total revenues of ₹ 2,000.47 million and net cash inflows amounting to ₹ 125.39 million for the year ended on that date, as considered in the consolidated financial statements. These financial statements have been audited by other auditors whose reports have been furnished to us by the management and our opinion on the consolidated financial statements, in so far as it relates to the amounts and disclosures included

in respect of these subsidiaries, and our report in terms of sub-section (3) of section 143 of the Act in so far as it relates to the aforesaid subsidiaries, are based solely on the reports of the other auditors.

Our opinion above on the consolidated financial statements, and our report on other legal and regulatory requirements below, are not modified in respect of the above matters with respect to our reliance on the work done by and the reports of the other auditors.

16. The consolidated financial statements of the Group for the year ended 31 March 2024 were audited by the predecessor auditor, S.R. Batliboi & Associates LLP, who have expressed an unmodified opinion on those consolidated financial statements vide their audit report dated 24 May 2024.

REPORT ON OTHER LEGAL AND REGULATORY REQUIREMENTS

17. As required by section 197(16) of the Act, based on our audit and on the consideration of the reports of the other auditors, referred to in paragraph 15, on separate financial statements of the subsidiaries, we report that the Holding Company and 3 (three) subsidiaries incorporated in India whose financial statements have been audited under the Act have paid remuneration to their respective directors during the year in accordance with the provisions of and limits laid down under section 197 read with Schedule V to the Act. Further, we report that 6 (six) subsidiaries incorporated in India whose financial statements have been audited under the Act have not paid or provided for any managerial remuneration during the year. Accordingly, reporting under section 197(16) of the Act is not applicable in respect of such subsidiaries.
18. As required by clause (xxi) of paragraph 3 of Companies (Auditor's Report) Order, 2020 ('the Order') issued by the Central Government of India in terms of section 143(11) of the Act based on the consideration of the Order reports issued by us and by the respective other auditors as mentioned in paragraph 15 above, of companies included in the consolidated financial statements and covered under the Act we report that there are no qualifications or adverse remarks reported in the respective Order reports of such companies.
19. As required by section 143(3) of the Act, based on our audit and on the consideration of the reports of the other auditors on separate financial statements and other financial information of the subsidiaries incorporated in India whose financial statements have

been audited under the Act, we report, to the extent applicable, that:

- a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purpose of our audit of the aforesaid consolidated financial statements;
- b) Except for the matters stated in paragraph 19(h) (vi) below on reporting under Rule 11(g) of the Companies (Audit and Auditors) Rules, 2014 (as amended), in our opinion, proper books of account as required by law relating to preparation of the aforesaid consolidated financial statements have been kept so far as it appears from our examination of those books and the reports of the other auditors;
- c) The consolidated financial statements dealt with by this report are in agreement with the relevant books of account maintained for the purpose of preparation of the consolidated financial statements;
- d) In our opinion, the aforesaid consolidated financial statements comply with Ind AS specified under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015;
- e) On the basis of the written representations received from the directors of the Holding Company and its subsidiaries, and taken on record by the Board of Directors of the Holding Company and its subsidiaries, and the reports of the statutory auditors of its subsidiaries, covered under the Act, none of the directors of the Holding Company and its subsidiaries are disqualified as on 31 March 2025 from being appointed as a director in terms of section 164(2) of the Act;
- f) The qualification relating to the maintenance of accounts and other matters connected therewith with respect to the consolidated financial statements are as stated in paragraph 19(b) above on reporting under section 143(3)(b) of the Act and paragraph 19(h)(vi) below on reporting under Rule 11(g) of the Companies (Audit and Auditors) Rules, 2014 (as amended);
- g) With respect to the adequacy of the internal financial controls with reference to financial statements of the Holding Company, and its

subsidiaries covered under the Act, and the operating effectiveness of such controls, refer to our separate report in 'Annexure A' wherein we have expressed an unmodified opinion; and

- h) With respect to the other matters to be included in the Auditor's Report in accordance with rule 11 of the Companies (Audit and Auditors) Rules, 2014 (as amended), in our opinion and to the best of our information and according to the explanations given to us and based on the consideration of the report of the other auditors on separate financial statements and other financial information of the subsidiaries incorporated in India whose financial statements have been audited under the Act:
 - i. The consolidated financial statements disclose the impact of pending litigations on the consolidated financial position of the Group as detailed in Note 35 to the consolidated financial statements;
 - ii. The Holding Company and its subsidiaries did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses as at 31 March 2025;
 - iii. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Holding Company, and its subsidiaries covered under the Act, during the year ended 31 March 2025 (Refer note 35D);
 - iv. a. The respective managements of the Holding Company and its subsidiaries incorporated in India whose financial statements have been audited under the Act have represented to us and the other auditors of such subsidiaries respectively that, to the best of their knowledge and belief, as disclosed in note 46(iii) to the consolidated financial statements, no funds have been advanced or loaned or invested (either from borrowed funds or securities premium or any other sources or kind of funds) by the Holding Company or its subsidiaries to or in any person or entities, including foreign entities ('the intermediaries'), with the understanding, whether recorded in writing or otherwise, that

the intermediary shall, whether, directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Holding Company, or any such subsidiaries ('the Ultimate Beneficiaries') or provide any guarantee, security or the like on behalf the Ultimate Beneficiaries;

Annexure A

to the Independent Auditor's Report of even date to the members of Easy Trip Planner Limited on the consolidated financial statements for the year ended 31 March 2025

INDEPENDENT AUDITOR'S REPORT ON THE INTERNAL FINANCIAL CONTROLS WITH REFERENCE TO FINANCIAL STATEMENTS UNDER CLAUSE (I) OF SUB-SECTION 3 OF SECTION 143 OF THE COMPANIES ACT, 2013 ('THE ACT')

1. In conjunction with our audit of the consolidated financial statements of Easy Trip Planners Limited ('the Holding Company') and its subsidiaries (the Holding Company and its subsidiaries together referred to as 'the Group'), as at and for the year ended 31 March 2025, we have audited the internal financial controls with reference to financial statements of the Holding Company and its subsidiary companies, which are companies covered under the Act, as at that date.

RESPONSIBILITIES OF MANAGEMENT AND THOSE CHARGED WITH GOVERNANCE FOR INTERNAL FINANCIAL CONTROLS

2. The respective Board of Directors of the Holding Company and its subsidiary companies, which are companies covered under the Act, are responsible for establishing and maintaining internal financial controls based on the internal financial controls with reference to financial statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting ('Guidance Note') issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of the Company's business, including adherence to the Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

AUDITOR'S RESPONSIBILITY FOR THE AUDIT OF THE INTERNAL FINANCIAL CONTROLS WITH REFERENCE TO FINANCIAL STATEMENTS

3. Our responsibility is to express an opinion on the internal financial controls with reference to financial statements of the Holding Company and its subsidiary companies, as aforesaid, based on our audit. We conducted our audit in accordance with the Standards on Auditing issued by the ICAI prescribed under Section 143(10) of the Act, to the extent applicable to an audit of internal financial controls with reference to financial statements, and the Guidance Note issued by the ICAI. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to financial statements were established and maintained and if such controls operated effectively in all material respects.
4. Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls with reference to financial statements and their operating effectiveness. Our audit of internal financial controls with reference to financial statements includes obtaining an understanding of such internal financial controls, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.
5. We believe that the audit evidence we have obtained and the audit evidence obtained by the other auditors in terms of their reports referred to in the Other Matters paragraph below, is sufficient and appropriate

to provide a basis for our audit opinion on the internal financial controls with reference to financial statements of the Holding Company and its subsidiary companies as aforesaid.

MEANING OF INTERNAL FINANCIAL CONTROLS WITH REFERENCE TO FINANCIAL STATEMENTS

6. A Company's internal financial controls with reference to financial statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A Company's internal financial controls with reference to financial statements include those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorisations of management and directors of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the Company's assets that could have a material effect on the financial statements.

INHERENT LIMITATIONS OF INTERNAL FINANCIAL CONTROLS WITH REFERENCE TO FINANCIAL STATEMENTS

7. Because of the inherent limitations of internal financial controls with reference to financial statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the

internal financial controls with reference to financial statements to future periods are subject to the risk that the internal financial controls with reference to financial statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

OPINION

8. In our opinion and based on the consideration of the reports of the other auditors on internal financial controls with reference to financial statements of the subsidiary Companies, the Holding Company and its subsidiary Companies which are Companies covered under the Act, have in all material respects, adequate internal financial controls with reference to financial statements and such controls were operating effectively as at 31 March 2025, based on the internal financial controls with reference to financial statements criteria established by the Company considering the essential components of internal controls stated in the Guidance Note issued by the ICAI.

OTHER MATTER

9. We did not audit the internal financial controls with reference to financial statements in so far as it relates to 10 subsidiary Companies, which are covered under the Act, whose financial statements reflect total assets of ₹ 1,764.23 million and net assets of ₹ 169.34 million as at 31 March 2025, total revenues of ₹ 1,606.26 million, and net cash inflows amounting to ₹ 121.81 million for the year ended on that date, as considered in the consolidated financial statements. The internal financial controls with reference to financial statements in so far as it relates to such subsidiary companies have been audited by other auditors whose reports have been furnished to us by the management and our report on the adequacy and operating effectiveness of the internal financial controls with reference to financial statements for the Holding Company and its

subsidiary companies, as aforesaid, under Section 143(3)(i) of the Act in so far as it relates to such subsidiary companies is based solely on the reports of the auditors of such companies. Our opinion is not modified in respect of this matter with respect to our reliance on the work done by and on the reports of the other auditors.

1. CORPORATE INFORMATION

The Consolidated financial statements comprise the financial statements of Easy Trip Planners Limited ('the Holding Company'/'the parent company') and its subsidiaries (collectively, 'the Group') for the year ended March 31, 2025. The Holding Company is a public limited company domiciled in India and incorporated on June 04, 2008 under the provisions of the erstwhile Companies Act, 1956 replaced with Companies Act 2013 w.e.f April 01, 2014. The registered office of the Holding Company is located at 223 Patparganj Industrial Area, Delhi 110092. The shares of the Holding Company are listed on the National Stock Exchange of India Limited and BSE Limited.

The Group is primarily engaged in the business of providing reservation and booking services related to travel and tourism through ease my trip-portal, ease my trip-app or in-house call-centre.

2 SUMMARY OF MATERIAL ACCOUNTING POLICY INFORMATION

2.1 Basis of preparation

The consolidated financial statements of the Group have been prepared to comply in all material aspects with accordance with Indian Accounting Standards ('Ind AS') notified under the Companies (Indian Accounting Standards) Rules, 2015 (as amended from time to time) and presentation requirements of Division II of Schedule III to the Companies Act, 2013, (Ind AS compliant Schedule III). The consolidated financial statements comply with Ind AS notified by Ministry of Company Affairs (MCA).

These consolidated financial statements are approved for issue by the Board of Directors on May 30, 2025.

The accounting policies, as set out in the following paragraphs of this note, have been consistently applied, by the Group, to all the years presented in the said consolidated financial statements.

These consolidated financial statements have been prepared and presented on the going concern basis and at historical cost, except for the following assets

and liabilities, which have been measured as indicated below:

- certain financial assets and financial liabilities that are measured at fair value (refer accounting policy regarding financial instruments); and
- employees' defined benefit plan and compensated absences are measured as per actuarial valuation"

The preparation of the said consolidated financial statements requires the use of certain critical accounting estimates and judgements. It also requires the management to exercise judgment in the process of applying the Group's accounting policies. The areas where estimates are significant to the financial statements, or areas involving a higher degree of judgement or complexity are disclosed in note 2.25.

All the amounts included in the consolidated financial statements are reported in millions of Indian Rupees and are rounded to the nearest millions, except per share data and unless stated otherwise.

2.2 Basis of consolidation

The Group's financial statements consolidate the financial statements of Easy Trip Planners Limited and all of its subsidiaries (refer as "Group") as at 31 March 2025. All subsidiaries have a reporting date of March 31, 2025 (refer note 45 for details of the subsidiaries).

Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Specifically, the Group controls an investee if and only if the Group has:

- Power over the investee (i.e. existing rights that give it the current ability to direct the relevant activities of the investee)
- Exposure, or rights, to variable returns from its involvement with the investee, and
- The ability to use its power over the investee to affect its returns

All amounts in ₹ million (unless otherwise stated)

The Group combines the financial statements of the parent and its subsidiaries on a line-by-line basis, aggregating like items of assets, liabilities, equity, income and expenses. All intra-group transactions and balances between Group companies are eliminated on consolidation, including unrealised gains and losses on transactions between Group companies. These consolidated financial statements are prepared by applying uniform accounting policies in use at the Group.

Non-controlling interest ("NCI") which represents part of consolidated net Statement of profit and loss and net assets of subsidiary that are not, directly or indirectly, owned or controlled by the Holding Company, are excluded and presented in the consolidated Balance Sheet separately within Equity.

Profit or loss and other comprehensive income of subsidiaries acquired or disposed of during the year are recognised from the effective date of acquisition, or up to the effective date of disposal, as applicable.

Profit or loss and each component of OCI are attributed to the equity holders of the parent of the Group and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance based on their respective ownership interests.

The excess of cost to the Group of its investment in subsidiaries, on the acquisition dates over and above the Group's share of equity in the subsidiaries, is recognised as 'Goodwill on consolidation' being an asset in the consolidated financial statements. The said goodwill is not amortised, however, it is tested for impairment at each balance sheet date and the impairment loss, if any, is provided for. When the Group loses control over a subsidiary, it derecognises the assets and liabilities of the subsidiary, and any related NCI and other components of equity. Any interest retained in the former subsidiary is measured at fair value at the date the control is lost. Any resulting gain or loss is recognised in the consolidated Statement of profit and loss.

2.3 Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly

transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability. The principal or the most advantageous market must be accessible to / by the Group.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

All assets and liabilities for which fair value is measured or disclosed in the consolidated financial statements are categorized within fair value hierarchy, described as follows, based on the lowest level of input that is significant to the fair value measurement as a whole.

- Level 1 — Quoted (unadjusted) prices in active markets for identical assets or liabilities
- Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognised in the consolidated financial statements on a recurring basis, the Group determines whether transfers have occurred between levels in the hierarchy by reassessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

For the purpose of fair value disclosures, the Group has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

2.4 Current and non-current classification

The Group presents assets and liabilities in the consolidated balance sheet based on current / noncurrent classification.

An asset is classified as current when it satisfies any of the following criteria:

- it is expected to be realised in, or is intended for sale or consumption in, the Group's normal operating cycle.
- it is held primarily for the purpose of being traded;
- it is expected to be realised within 12 months after the reporting date; or
- it is cash or cash equivalent unless it is restricted from being exchanged or used to settle a liability for at least 12 months after the reporting date.

All other assets are classified as non-current.

A liability is classified as current when it satisfies any of the following criteria:

- It is expected to be settled in Group's normal operating cycle;
- It is held primarily for the purpose of being trading;
- It is due to be settled within 12 months after the reporting period; or
- There is no unconditional right to defer the settlement of the liability for at least 12 months after the reporting period.

The Group classifies all other liabilities as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

The operating cycle is the time between the acquisition of assets for processing and their realisation in cash and cash equivalents. The Group has identified twelve months as its operating cycle.

2.5 Business combination and goodwill

Business combinations are accounted for using the acquisition method. The cost of an acquisition is

measured as the aggregate of the consideration transferred measured at acquisition date fair value and the amount of any non-controlling interests in the acquiree. For each business combination, the Group elects whether to measure the non-controlling interests in the acquiree at fair value or at the proportionate share of the acquiree's identifiable net assets. Acquisition-related costs are expensed in the periods in which the costs are incurred, and the services are received, with the exception of the costs of issuing debt or equity securities that are recognised in accordance with Ind AS 32 and Ind AS 109.

At the acquisition date, the identifiable assets acquired, and the liabilities assumed are recognised at their acquisition date fair values. For this purpose, the liabilities assumed include contingent liabilities representing present obligation and they are measured at their acquisition fair values irrespective of the fact that outflow of resources embodying economic benefits is not probable. However, the following assets and liabilities acquired in a business combination are measured at the basis indicated below:

- Deferred tax assets or liabilities are recognised and measured in accordance with Ind AS 12 Income Tax.

Non-controlling interests in the results and equity of subsidiaries are shown separately in the consolidated statement of profit and loss, consolidated statement of changes in equity and consolidated balance sheet respectively.

When the Group acquires a business, it assesses the financial assets and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions as at the acquisition date. This includes the separation of embedded derivatives in host contracts by the acquiree.

Goodwill is initially measured at cost, being the excess of the aggregate of the consideration transferred and the amount recognised for non-controlling interests, and any previous interest held, over the net identifiable assets acquired and liabilities assumed.

Notes to Consolidated Financial Statements

For the year ended March 31, 2025

CIN - L63090DL2008PLC179041

All amounts in ₹ million (unless otherwise stated)

If the fair value of the net assets acquired is in excess of the aggregate consideration transferred, the Group re-assesses whether it has correctly identified all of the assets acquired and all of the liabilities assumed and reviews the procedures used to measure the amounts to be recognised at the acquisition date. If the reassessment still results in an excess of the fair value of net assets acquired over the aggregate consideration transferred, then the gain is recognised in OCI and accumulated in equity as capital reserve. However, if there is no clear evidence of bargain purchase, the entity recognises the gain directly in equity as capital reserve, without routing the same through OCI.

After initial recognition, goodwill is measured at cost less any accumulated impairment losses. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Group's cash-generating units that are expected to benefit from the combination, irrespective of whether other assets or liabilities of the acquiree are assigned to those units.

A cash generating unit to which goodwill has been allocated is tested for impairment annually, or more frequently when there is an indication that the unit may be impaired. If the recoverable amount of the cash generating unit is less than its carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit pro rata based on the carrying amount of each asset in the unit. Any impairment loss for goodwill is recognised in profit or loss. An impairment loss recognised for goodwill is not reversed in subsequent periods.

Where goodwill has been allocated to a cash-generating unit and part of the operation within that unit is disposed of, the goodwill associated with the disposed operation is included in the carrying amount of the operation when determining the gain or loss on disposal. Goodwill disposed in these circumstances is measured based on the relative values of the disposed operation and the portion of the cash-generating unit retained.

2.6 Property, plant and equipment ('PPE')

An item is recognised as an asset, if and only if, it is probable that the future economic benefits associated with the item will flow to the Group and its cost can be measured reliably. PPE is stated at cost, net of accumulated depreciation and accumulated impairment losses, if any.

The initial cost of PPE comprises purchase price (including non-refundable duties and taxes but excluding any trade discounts and rebates), borrowing costs if capitalization criteria are met and directly attributable cost of bringing the asset to its working condition for the intended use.

Subsequent costs are included in the asset's carrying amount or recognised as separate assets, as appropriate, only when it is probable that the future economic benefits associated with expenditure will flow to the Group and the cost of the item can be measured reliably. All other repairs and maintenance are charged to Statement of Profit and Loss at the time of incurrence.

An item of property, plant and equipment and any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use or disposal.

Gains or losses arising from de-recognition of PPE are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the statement of profit and loss when the asset is derecognized.

Depreciation on property, plant and equipment is calculated on a straight-line basis using the rates arrived at based on the useful lives estimated by the management which are in line with the useful lives prescribed in Schedule II of the Companies Act, 2013.

The Group has used the following useful lives to provide depreciation on its PPE.

Notes to Consolidated Financial Statements

For the year ended March 31, 2025

CIN - L63090DL2008PLC179041

All amounts in ₹ million (unless otherwise stated)

Particulars	Years
Buildings	60
Furniture and fixtures	10
Vehicles	10
Computers	3
Office equipment	5
Vehicle- Others	8

Freehold land has an unlimited useful life and hence, is not depreciated.

Lease hold improvements are depreciated over the life of leases or 10 years, whichever is lower

The useful lives, residual values and depreciation method of PPE are reviewed, and adjusted appropriately, at-least as at each reporting date so as to ensure that the method and period of depreciation are consistent with the expected pattern of economic benefits from these assets. The effects of any change in the estimated useful lives, residual values and / or depreciation method are accounted prospectively, and accordingly the depreciation is calculated over the PPE's remaining revised useful life.

2.7 Intangible assets and Asset under development

Identifiable intangible assets are recognised when the Group controls the asset, it is probable that future economic benefits attributed to the asset will flow to the Group and the cost of the asset can be measured reliably.

Intangible assets are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less accumulated amortization and accumulated impairment losses, if any.

Intangible assets with finite life are amortized on a straight line basis over the estimated useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The Group amortizes software over the best estimate of its useful life which is three years. Website maintenance costs are charged to expense as incurred.

Intangible assets acquired in a business combination are measured at fair value as at the date of acquisition. Following initial recognition, these intangible assets are carried at cost less any accumulated amortization and impairment losses, if any.

Intangible assets acquired in a business combination are amortized on a straight-line basis over their estimated useful lives that reflect the expected pattern of consumption of the future economic benefits embodied in the asset. The estimated useful lives are as follows:

Intangible Asset	Useful life (Years)
Trademark	5 - Perpetual
Brands	10 - Perpetual
Customer Relationships	10
Vendor / Agent relationship	7.50
Non-Compete agreement	7.50 - 10.50
Technology	5

The amortization period and the amortization method are reviewed at least at each financial year end. If the expected useful life of the asset is significantly different from previous estimates, the amortization period is changed prospectively. If there has been a significant change in the expected pattern of economic benefits from the asset, the amortization method is changed to reflect the changed pattern. Such changes are accounted for in accordance with Ind AS 8 - Accounting Policies, Changes in Accounting Estimates and Errors.

An intangible asset is derecognised upon disposal (i.e., at the date the recipient obtains control) or when no future economic benefits are expected from its use or disposal. Any gain or loss arising upon derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the statement of profit and loss when the asset is derecognised.

2.8 Investment property

An investment in land or buildings, which is held by the Group for capital appreciation is classified as investment property.

Notes to Consolidated Financial Statements

CIN - L63090DL2008PLC179041

All amounts in ₹ million (unless otherwise stated)

Investment properties are measured initially at cost, including transaction costs. The cost comprises purchase price, borrowing costs if capitalization criteria are met and directly attributable cost of bringing the investment property to its working condition for the intended use. Subsequent to initial recognition, investment properties are stated at cost less accumulated depreciation and accumulated impairment loss, if any.

Depreciation on building component of investment property is calculated on a straight-line basis over the period of 60 years, which is in line with the useful life prescribed in Schedule II to the Companies Act, 2013

Depreciation on leasehold land component of investment property is calculated on a straight-line basis over the period of lease, which is in line with the useful life prescribed in Schedule II to the Companies Act, 2013.

Depreciation on leasehold land component of investment property is calculated on a straight-line basis over the period of lease, which is in line with the useful life prescribed in Schedule II to the Companies Act, 2013.

Investment properties are derecognised either when they have been disposed of or when they are permanently withdrawn from use and no future economic benefit is expected from their disposal. The difference between the net disposal proceeds and the carrying amount of the asset is recognised in profit or loss in the year of derecognition.

2.9 Impairment of non-financial assets

The Group assesses, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Group estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) fair value less costs of disposal and its value in use. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. When the carrying

amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used.

The Group bases its impairment calculation on detailed budgets and forecast calculations, which are prepared separately for each of the Group's CGUs to which the individual assets are allocated.

Impairment losses of continuing operations are recognised in the statement of profit and loss.

For assets excluding goodwill, an assessment is made at each reporting date to determine whether there is an indication that previously recognised impairment losses no longer exist or have decreased. If such indication exists, the Group estimates the asset's or CGU's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the statement of profit and loss.

Goodwill is tested for impairment annually and when circumstances indicate that the carrying value may be impaired.

Impairment is determined for goodwill by assessing the recoverable amount of each CGU (or group of CGUs) to which the goodwill relates. When the recoverable amount of the CGU is less than its carrying amount, an impairment loss is recognised. Impairment losses

Notes to Consolidated Financial Statements

For the year ended March 31, 2025

CIN - L63090DL2008PLC179041

All amounts in ₹ million (unless otherwise stated)

relating to goodwill cannot be reversed in future periods.

Intangible assets with indefinite useful lives are tested for impairment annually, as appropriate, and when circumstances indicate that the carrying value may be impaired.

Assets that are subject to depreciation and amortization are reviewed for impairment, whenever events or changes in circumstances indicate that the carrying amount may not be recoverable or when annual impairment testing for an asset is required. Such circumstances include, though are not limited to, significant or sustained decline in revenues or earnings and material adverse changes in the economic environment.

An impairment loss is recognized whenever the carrying amount of an asset or its cash-generating unit exceeds its recoverable amount. The recoverable amount of an asset is the greater of its fair value less costs to sell and value in use. To calculate value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market rates and the risks specific to the asset. For an asset that does not generate largely independent cash inflows, the recoverable amount is determined for the cash-generating unit to which the asset belongs. Fair value less costs to sell is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants, less the costs of disposal.

2.10 Leases

Where the Group is the lessee

The Group recognises a right-of-use asset and a lease liability at the lease commencement date. Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities.

The Group assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received.

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. The estimated useful lives of right-of-use assets are determined on the same basis as those of property, plant and equipment. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain re-measurements of the lease liability and the estimated useful lives of the assets, as follows:

- **Building- 3 to 15 years**

At the commencement date of the lease, the Group recognises lease liabilities measured at the present value of lease payments to be made over the lease term. In calculating the present value of lease payments, the Group uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments (e.g., changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

Lease payments included in the measurement of the lease liability comprise the following:

- fixed payments, including in-substance fixed payments;
- variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date; and

Notes to Consolidated Financial Statements

For the year ended March 31, 2025

CIN - L63090DL2008PLC179041

All amounts in ₹ million (unless otherwise stated)

- the lease payments in an optional renewal period if the Group is reasonably certain to exercise an extension option, and penalties for early termination of a lease unless the Group is reasonably certain not to terminate early.

The lease liability is measured at amortised cost using the effective interest method. It is remeasured when there is a change in future lease payments arising from a change in an index or rate, if there is a change in the Group's estimate of the amount expected to be payable under a residual value guarantee, or if the Group changes its assessment of whether it will exercise a purchase, extension or termination option.

The Group's lease liabilities are included in Interest-bearing loans and borrowings.

The Group has elected not to recognise right-of-use assets and lease liabilities for short-term leases of machinery that have a lease term of 12 months or less and leases of low-value assets. The Group recognises the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

The right-of-use assets are also subject to impairment. Refer to the accounting policies Section 2.9 Impairment of non-financial assets.

2.11 Borrowing cost

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalized as part of the cost of the respective asset. All other borrowing costs are expensed in the period they occur. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds. Borrowing cost also includes exchange differences to the extent regarded as an adjustment to the borrowing costs.

2.12 Inventories

Inventories comprises stock of food, beverages, stores and operating supplies and are valued at lower of cost or net realisable value. The Cost comprises cost of purchases, duties and taxes (other than those subsequently recoverable) and other costs incurred in bringing them to their present location and condition.

Net realisable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and the estimated costs necessary to make the sale.

2.13 Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

(i) Financial assets

Initial recognition and measurement

Financial assets are classified, at initial recognition, as subsequently measured at amortised cost, fair value through other comprehensive income (OCI), and fair value through profit or loss.

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Group's business model for managing them. With the exception of trade receivables that do not contain a significant financing component or for which the Group has applied the practical expedient, the Group initially measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs. Trade receivables that do not contain a significant financing component or for which the Group has applied the practical expedient are measured at the transaction price determined under Ind AS 115 "Revenue from Contracts with Customers". Refer to the accounting policies in section 2.15 Revenue from contracts with customers.

Notes to Consolidated Financial Statements

For the year ended March 31, 2025

CIN - L63090DL2008PLC179041

All amounts in ₹ million (unless otherwise stated)

In order for a financial asset to be classified and measured at amortised cost or fair value through OCI, it needs to give rise to cash flows that are 'solely payments of principal and interest (SPPI)' on the principal amount outstanding. This assessment is referred to as the SPPI test and is performed at an instrument level. Financial assets with cash flows that are not SPPI are classified and measured at fair value through profit or loss, irrespective of the business model.

The Group's business model for managing financial assets refers to how it manages its financial assets in order to generate cash flows. The business model determines whether cash flows will result from collecting contractual cash flows, selling the financial assets, or both. Financial assets classified and measured at amortised cost are held within a business model with the objective to hold financial assets in order to collect contractual cash flows while financial assets classified and measured at fair value through OCI are held within a business model with the objective of both holding to collect contractual cash flows and selling.

Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the marketplace (regular way trades) are recognised on the trade date, i.e., the date that the Group commits to purchase or sell the asset.

Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in following categories:

- Financial assets at amortised cost (debt instruments)
- Financial assets designated at fair value through OCI with no recycling of cumulative gains and losses upon derecognition (equity instruments)
- Financial assets at fair value through profit or loss.

Financial assets at amortised cost (debt instruments)

A 'financial asset' is measured at the amortised cost if both the following conditions are met:

- The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows, and
- Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

This category is the most relevant to the Group. After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate (EIR) method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in finance income in the profit or loss. The losses arising from impairment are recognised in the profit or loss. The Group financial assets at amortised cost includes trade receivables, and loan to an associate and loan to a director included under other non-current financial assets.

Financial assets designated at fair value through OCI (equity instruments)

Upon initial recognition, the Group can elect to classify irrevocably its equity investments as equity instruments designated at fair value through OCI when they meet the definition of equity under Ind AS 32 Financial Instruments: Presentation and are not held for trading. The classification is determined on an instrument-by-instrument basis. Equity instruments which are held for trading and contingent consideration recognised by an acquirer in a business combination to which Ind AS103 "Business Combinations" applies are classified as at FVTPL.

Gains and losses on these financial assets are never recycled to profit or loss. Dividends are

recognised as other income in the statement of profit and loss when the right of payment has been established, except when the Group benefits from such proceeds as a recovery of part of the cost of the financial asset, in which case, such gains are recorded in OCI. Equity instruments designated at fair value through OCI are not subject to impairment assessment.

The Group elected to classify irrevocably its non-listed equity investments under this category, refer note 11

Financial assets at fair value through profit or loss

Financial assets at fair value through profit or loss are carried in the balance sheet at fair value with net changes in fair value recognised in the statement of profit and loss.

This category includes derivative instruments and equity investments which the Group had not irrevocably elected to classify at fair value through OCI. Dividends on equity investments are recognised in the statement of profit and loss when the right of payment has been established, refer note 11.

Derecognition

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognised (i.e. removed from the Group's consolidated balance sheet) when:

- The rights to receive cash flows from the asset have expired, or
- The Group has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement and either:

- (a) the group has transferred substantially all the risks and rewards of the asset, or

- (b) the group has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Group has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Group continues to recognise the transferred asset to the extent of the Group's continuing involvement. In that case, the Group also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Group has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the group could be required to repay.

Impairment of financial assets

Further disclosures relating to impairment of financial assets are also provided in the following notes:

- Disclosures for significant assumptions – see Note 2.25.
- Trade receivables and contract assets – see Note 12.

The Group recognises an allowance for expected credit losses (ECLs) for all debt instruments not held at fair value through profit or loss. ECLs are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Group expects to receive, discounted at an approximation of the original effective interest rate. The expected cash flows will include cash flows from the sale of

collateral held or other credit enhancements that are integral to the contractual terms.

ECLs are recognised in two stages. For credit exposures for which there has not been a significant increase in credit risk since initial recognition, ECLs are provided for credit losses that result from default events that are possible within the next 12-months (a 12-month ECL). For those credit exposures for which there has been a significant increase in credit risk since initial recognition, a loss allowance is required for credit losses expected over the remaining life of the exposure, irrespective of the timing of the default (a lifetime ECL).

For trade receivables and contract assets, the Group applies a simplified approach in calculating ECLs. Therefore, the Group does not track changes in credit risk, but instead recognises a loss allowance based on lifetime ECLs at each reporting date. The Group has established a provision matrix that is based on its historical credit loss experience, adjusted for forward-looking factors specific to the debtors and the economic environment.

The Group considers a financial asset in default when contractual payments are 90 days past due. However, in certain cases, the Group may also consider a financial asset to be in default when internal or external information indicates that the Group is unlikely to receive the outstanding contractual amounts in full before taking into account any credit enhancements held by the Group. A financial asset is written off when there is no reasonable expectation of recovering the contractual cash flows.

Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

Financial guarantee contracts

A financial guarantee contract is a contract that requires the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payments when due in accordance with the terms of a debt instrument. Financial guarantee contracts issued by the Group are initially measured at their fair values and, if not designated as at FVTPL, are subsequently measured at the higher of:

- The amount of loss allowance determined in accordance with impairment requirements of Ind AS 109; and
- The amount initially recognised less, when appropriate, the cumulative amount of income recognised in accordance with the principles of Ind AS 115.

ii) Financial liabilities

All financial liabilities are recognized initially at fair value. The Group's financial liabilities include borrowings, trade payables and other payables.

After initial recognition, financial liabilities are subsequently measured either at amortized cost using the effective interest rate (EIR) method, or at fair value through profit or loss. Gains and losses are recognized in the statement of profit and loss when the liabilities are derecognized as well as through the EIR amortization process.

Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortization is included as finance costs in the statement of profit and loss.

Derecognition

A financial liability is derecognized when the obligation under the liability is discharged or cancelled or expires. The gain or loss on derecognition is recognized in the statement of profit and loss.

2.14 Loans and borrowings

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the EIR amortisation process. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the statement of profit and loss.

2.15 Revenue recognition

Revenue from contracts with customers is recognised when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Group expects to be entitled in exchange for those goods or services.

Revenue is recognised to the extent that it is probable that economic benefits will flow to the Group and revenue can be reliably measured. The Group considers whether there are other promises in the contract that are separate performance obligations to which a portion of the transaction price needs to be allocated. In determining the transaction price for revenue, the Group considers the effects of variable consideration, the existence of significant financing components, noncash consideration and consideration payable to the customer (if any) excluding taxes and duty.

The Group assesses its revenue arrangement against specific criteria in order to determine if it is acting as principal or agent. The Group has concluded that it is acting as agent in case of sale of airline tickets and hotel packages as the supplier is primarily responsible for providing the underlying travel services and the Group does not control the service provided by the supplier to the traveller.

Income from services

A. Air passage

Income from the sale of airline tickets is recognized as an agent on a net commission, incentives and fees on earned basis net of discounts given to

customers, as the Group does not assume any performance obligation post the confirmation of the issuance of an airline ticket to the customer. Group records allowance for cancellations at the time of the transaction based on historical experience.

Incentives from airlines are considered as earned when the performance obligations under the incentive schemes are achieved / probable to be achieved at the end of period.

The Group has measured the revenue in respect of its performance obligation of a contract at its standalone selling price. The price that is regularly charged for an item when sold separately is the best evidence of its standalone selling price.

The specific recognition criteria described below is also considered before revenue is recognised.

Variable consideration

If the consideration in a contract includes a variable amount, the Group estimates the amount of consideration to which it will be entitled in exchange for transferring the goods or services to the customer. The variable consideration is estimated at contract inception and constrained until it is highly probable that a significant revenue reversal in the amount of cumulative revenue recognised will not occur when the associated uncertainty with the variable consideration is subsequently resolved.

The Group recognizes incentives from airlines when incentives are expected to be achieved as per the threshold specified in the contract. To estimate the variable consideration, the Group applies the expected value method for contracts. The selected method that best predicts amount of variable consideration is primarily driven by the amount of volume thresholds contained in the contract. The Group uses historical data for forecasting future cancellations to come up with expected cancellation percentages.

These percentages are applied to determine the expected value of the variable consideration.

B. Hotels Packages

Income from hotel reservation is recognized as an agent on a net basis. Revenue is recognised at the time of issuance of hotel voucher including for non-refundable transactions as the Group does not assume any performance obligation post the confirmation of the issuance of hotel voucher to the customer.

Packages assembled by individual travellers through packaging functionality on our websites generally includes a merchant hotel component and some combinations of an air, car or destination services component. The individual package components are accounted for as separate performance obligations and recognised in accordance with our revenue recognition policies stated above. In few cases of corporate packages managed by the Group on an end to end basis, the Group acts as a principal and takes full responsibility of delivering the services, the revenues are recognised on a gross basis and cost of services against these packages is recognised as service costs.

Contract balances

Contract assets

A contract asset is the right to consideration in exchange for goods or services transferred to the customer. If the Group performs by transferring goods or services to a customer before the customer pays consideration or before payment is due, a contract asset is recognised for the earned consideration that is conditional.

Trade Receivables

A receivable represents the Group's right to an amount of consideration that is unconditional (i.e., only the passage of time is required before payment of the consideration is due). Refer to accounting policies of financial assets in section 2.13 Financial instruments.

Contract liabilities

A contract liability is the obligation to transfer goods or services to a customer for which the Group has received consideration (or an amount of consideration is due) from the customer. If a customer pays consideration before the Group transfers goods or services to the customer, a contract liability is recognised when the payment is made or the payment is due (whichever is earlier). Contract liabilities are recognised as revenue when the Group performs under the contract.

Non- cash Consideration

Ind AS 115 requires that the fair value of such non-cash consideration, received or expected to be received by the customer, is included in the transaction price. The Group measures the non-cash consideration at fair value. If Group cannot reasonably estimate the fair value of the non-cash consideration, the Group measures the consideration indirectly by reference to the standalone selling price of the goods or services promised to the customer in exchange for the consideration.

Interest income

For all debt instruments measured at amortized cost, interest income is recorded using the effective interest rate (EIR). EIR is the rate that exactly discounts the estimated future cash payments or receipts over the expected life of the financial instrument or a shorter period, where appropriate, to the gross carrying amount of the financial asset or to the amortized cost of a financial liability. When calculating the effective interest rate, the Group estimates the expected cash flows by considering all the contractual terms of the financial instrument but does not consider the expected credit losses. Interest income is included in other income in the statement of profit and loss.

Claims written back

Claims/ amounts due to customer represent customer's rights to refund against cancelled

and unutilised tickets, recorded under the head 'Other current financial liabilities.' The Group recognise such amount as income under the head Revenue from operations when the Group is legally released from its obligation to make refund to the customer after considering, among other matters, user agreement defining the Group policy to provide refund, airline/ hotel policy which may require the Group to make refund as well as the applicable government policies, legal and regulatory requirements.

2.16 Foreign currency

Functional and presentation currency

The Group's consolidated financial statements are presented in Indian Rupees (INR) which is also the Parent's functional and presentational currency.

Each entity of the Group determines its own functional currency and items included in the financial statements of each entity are measured using that functional currency. Functional currency is the currency of the primary economic environment in which an entity operates and is normally the currency in which the entity primarily generates and expends cash.

Foreign currency transactions and balances

Transactions in foreign currencies are initially recorded by the Group's entities at their respective functional currency spot rates at the date the transaction first qualifies for recognition. However, for practical reasons, the group uses an average rate if the average approximates the actual rate at the date of the transaction.

Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency spot rates of exchange at the reporting date.

Exchange differences arising on settlement or translation of monetary items are recognised in profit or loss with the exception of the following:

Exchange differences arising on monetary items that forms part of a reporting entity's net investment in a foreign operation are recognised in profit or loss in

the separate financial statements of the reporting entity or the individual financial statements of the foreign operation, as appropriate. In the financial statements that include the foreign operation and the reporting entity (e.g., consolidated financial statements when the foreign operation is a subsidiary), such exchange differences are recognised initially in OCI. These exchange differences are reclassified from equity to profit or loss on disposal of the net investment.

- Tax charges and credits attributable to exchange differences on those monetary items are also recorded in OCI.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined. The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of the gain or loss on the change in fair value of the item (i.e., translation differences on items whose fair value gain or loss is recognised in OCI or profit or loss are also recognised in OCI or profit or loss, respectively).

Foreign operations

On consolidation, the assets and liabilities of foreign operations are translated into INR at the rate of exchange prevailing at the reporting date and their statements of profit or loss are translated at exchange rates prevailing at the dates of the transactions. For practical reasons, the group uses an average rate to translate income and expense items, if the average rate approximates the exchange rates at the dates of the transactions. The exchange differences arising on translation for consolidation are recognised in OCI. On disposal of a foreign operation, the component of OCI relating to that particular foreign operation is recognised in profit or loss.

2.17 Employee benefits (Retirement & Other Employee benefits)

Retirement benefit in the form of Provident Fund is a defined contribution scheme and the Group has no

Notes to Consolidated Financial Statements

For the year ended March 31, 2025

CIN - L63090DL2008PLC179041

All amounts in ₹ million (unless otherwise stated)

obligation, other than the contribution payable to the provident fund. The Group recognizes contribution payable to the provident fund scheme as an expenditure, when an employee renders the related service. If the contribution payable to the scheme for service received before the balance sheet date exceeds the contribution already paid, the deficit payable to the scheme is recognized as a liability after deducting the contribution already paid.

If the contribution already paid exceeds the contribution due for services received before the balance sheet date, then excess is recognized as an asset to the extent that the pre-payment will lead to a reduction in future payment or a cash refund.

The Group operates defined benefit plan for its employees, viz., gratuity. The costs of providing benefits under the plan are determined on the basis of actuarial valuation at each year-end. Actuarial valuation is carried out for using the projected unit credit method. In accordance with the local laws and regulations, all the employees in India are entitled for the Gratuity plan. The said plan requires a lump-sum payment to eligible employees (meeting the required vesting service condition) at retirement or termination of employment, based on a pre-defined formula. The obligation towards the said benefits is recognised in the balance sheet, at the present value of the defined benefit obligations less the fair value of plan assets (being the funded portion). The present value of the said obligation is determined by discounting the estimated future cash outflows, using interest rates of government bonds. The interest income / (expense) are calculated by applying the above-mentioned discount rate to the plan assets and defined benefit obligations liability. The net interest income / (expense) on the net defined benefit liability is recognised in the statement of profit and loss. However, the related re-measurements of the net defined benefit liability are recognised directly in the other comprehensive income in the period in which they arise. The said re-measurements comprise of actuarial gains and losses (arising from experience adjustments and changes in actuarial assumptions), the return on plan assets (excluding interest). Re-measurements are not re-classified to the statement of profit and loss in any of the subsequent years.

Past service costs are recognised in profit or loss on the earlier of:

- The date of the plan amendment or curtailment, and
- The date that the Group recognises related restructuring costs

Net interest is calculated by applying the discount rate to the net defined benefit liability or asset. The Group recognises the following changes in the net defined benefit obligation as an expense in the consolidated statement of profit and loss:

- Service costs comprising current service costs, past-service costs, gains and losses on curtailments and non-routine settlements; and
- Net interest expense or income

Accumulated leave, which is expected to be utilized within the next 12 months, is treated as short-term employee benefit. The Group measures the expected cost of such absences as the additional amount that it expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

The Group treats accumulated leave expected to be carried forward beyond twelve months, as long-term employee benefit for measurement purposes. Such long-term compensated absences are provided for based on the actuarial valuation using the projected unit credit method at the year-end. Actuarial gains/losses are immediately taken to the statement of profit and loss and are not deferred.

The Group presents the leave as a current liability in the balance sheet, to the extent it does not have an unconditional right to defer its settlement for 12 months after the reporting date.

2.18 Income taxes

The income tax expense comprises of current and deferred income tax. Income tax is recognised in the statement of profit and loss, except to the extent that it relates to items recognised in the other comprehensive income or directly in equity, in which case the related income tax is also recognised accordingly.

Notes to Consolidated Financial Statements

For the year ended March 31, 2025

All amounts in ₹ million (unless otherwise stated)

a. Current tax

The current tax is calculated on the basis of the tax rates, laws and regulations, which have been enacted or substantively enacted as at the reporting date. The payment made in excess / (shortfall) of the Group's income tax obligation for the year are recognised in the balance sheet as current income tax assets / liabilities. Any interest, related to accrued liabilities for potential tax assessments are not included in Income tax charge or (credit), but are rather recognised within finance costs.

Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and considers whether it is probable that a taxation authority will accept an uncertain tax treatment. The group shall reflect the effect of uncertainty for each uncertain tax treatment by using either most likely method or expected value method, depending on which method predicts better resolution of the treatment.

Current income tax assets and liabilities are off-set against each other and the resultant net amount is presented in the balance sheet, if and only when, (a) the Group currently has a legally enforceable right to set-off the current income tax assets and liabilities, and (b) when it relates to income tax levied by the same taxation authority and where there is an intention to settle the current income tax balances on net basis.

b. Deferred tax

Deferred tax is recognised, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying values in the financial statements.

Deferred tax liabilities are recognised for all taxable temporary differences, except:

- When the deferred tax liability arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and, at the time of the

transaction, affects neither the accounting profit nor taxable profit or loss and does not give rise to equal taxable and deductible temporary differences.

- In respect of taxable temporary differences associated with investments in subsidiaries, when the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or in equity). Deferred tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity.

Deferred tax assets are recognised only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

The Group offsets deferred tax assets and deferred tax liabilities if and only if it has a legally enforceable right to set off current tax assets and current tax liabilities and the deferred tax assets and deferred tax liabilities relate to income taxes levied by the same taxation authority on either the

same taxable entity or different taxable entities which intend either to settle current tax liabilities and assets on a net basis, or to realise the assets and settle the liabilities simultaneously, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.

2.19 Dividend distribution to equity holders

The Group recognises a liability to make dividend distributions to equity holders of parent company when the distribution is authorised and the distribution is no longer at the discretion of the Group. As per the corporate laws in India, a distribution is authorised when it is approved by the shareholders or board of directors in Board meeting or Annual General Meeting as applicable. A corresponding amount is recognised directly in equity.

2.20 Earnings per share

Basic earnings per share are calculated by dividing the profit or loss for the year attributable to equity shareholders of the parent company by the weighted average number of equity shares outstanding during the year. The weighted average number of equity shares outstanding during the year is adjusted for events such as bonus issue, bonus element in a rights issue, share split, and reverse share split (consolidation of shares) that have changed the number of equity shares outstanding, without a corresponding change in resources.

For the purpose of calculating diluted earnings per share, the net profit or loss for the year attributable to equity shareholders and the weighted average number of shares outstanding during the year are adjusted for the effects of all dilutive potential equity shares.

2.21 Provisions

A provision is recognized when the Group has a present obligation as a result of past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. If the effect of the time value of money is material, provisions are measured at the present value of management's best estimate of the expenditure

required to settle the present obligation at the end of the reporting period. The discount rate used to determine the present value is a pre-tax rate that reflects the risks specific to the liability. The increase in the provision due to the passage of time is recognized as a finance cost.

Where the Group expects some or all of a provision to be reimbursed, for example under an insurance contract, the reimbursement is recognized as a separate asset but only when the reimbursement is virtually certain. The expense relating to any provision is presented in the statement of consolidated profit and loss net of any reimbursement.

2.22 Contingent liabilities

A disclosure for a contingent liability is made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. When there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made. The Group does not recognize a contingent liability but discloses its existence in financial statements.

2.23 Cash and cash equivalents

Cash and cash equivalents comprise cash at bank and in hand and short-term deposits with an original maturity of three months or less (that are readily convertible to known amounts of cash and cash equivalents and subject to an insignificant risk of changes in value) and funds in transit. However, for the purpose of the statement of cash flows, in addition to above items, any bank overdrafts / cash credits that are integral part of the Group's cash management, are also included as a component of cash and cash equivalents.

The cash flow has been prepared under the "Indirect Method" as set out in Indian Accounting Standard (Ind AS) 7- statement of cash flows.

2.24 Segment reporting policies

Operating segments are reported in a manner consistent with the internal reporting provided to the Chief Operating Decision Maker (CODM). Only those business activities are identified as operating segment

for which the operating results are regularly reviewed by the CODM to make decisions about resource allocation and performance measurement. For details, refer to note 38.

2.25 Critical accounting estimates and assumptions

The preparation of consolidated financial statements in conformity with Ind AS requires management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and disclosure of contingent liabilities at the end of the reporting period. Although these estimates are based upon management's best knowledge of current events and actions, uncertainty about these assumptions and estimates could result in the outcomes requiring a material adjustment to the carrying amounts of assets or liabilities in future periods. Changes in estimates are reflected in the consolidated financial statements in the period in which changes are made and if material, their effects are disclosed in the notes to the consolidated financial statements. Revisions of estimates are recognised on a prospective basis.

Information about key judgments in applying accounting policies that have the most significant effect on the consolidated financial statements are as follows: -

Note 2.18 - judgment required to determine probability of recognition of deferred tax assets;

Note 2.22 - judgment is required to ascertain whether it is probable or not that an outflow of resources embodying economic benefits will be required to settle the taxation disputes and legal claim

Note 2.9 - identification of impairment indicators

Information about key areas of estimation /uncertainty in applying accounting policies that have the most significant effect on the consolidated financial statements are as follows: -

Note 2.17 and 34 - measurement of defined benefit obligations: key actuarial assumptions;

Note 2.6, 2.7 and 2.8 - useful life and residual values of property, plant and equipment, fair valuation of

investment properties and useful life of intangible assets;

Note 2.3 and 40 - fair value measurement of financial instruments;

Note 2.8 and 6 - impairment assessment of investment property - key assumptions underlying recoverable amount;

Note 2.9 - impairment assessment of financial assets;

Note 2.15 – allowance for uncollectible trade receivables

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. Actual results could differ from these estimates.

2.26 Recent pronouncements

Ministry of Corporate Affairs ("MCA") notifies new standards or amendments to the existing standards under the Companies (Indian Accounting Standards) Rules as issued from time to time. During the year ended 31 March 2025, MCA has notified Ind AS 117 - Insurance Contracts and amendments to Ind As 116 – Leases, relating to sale and lease back transactions, applicable from 1 April 2024. The Group has reviewed the new pronouncements and based on its evaluation has determined that these amendments do not have any impact on the consolidated financial statements.

On 7 May 2025, MCA notifies the amendments to Ind AS 21 - Effects of Changes in Foreign Exchange Rates. These amendments aim to provide clearer guidance on assessing currency exchangeability and estimating exchange rates when currencies are not readily exchangeable. The amendments are effective for annual periods beginning on or after April 1, 2025. The Group is currently assessing the probable impact of these amendments on its consolidated financial statements

The Group performed its annual impairment test for years ended March 31, 2025 and March 31, 2024 on March 31, 2025 and March 31, 2024 respectively.

Goodwill, trademark and brand acquired through business combinations have indefinite life. The Group performs the impairment testing of the initially recognised values of goodwill, brand and trademark. The Group further performs impairment testing at every year end. The Group considers the relationship between its value in use and its carrying value, among other factors, when reviewing for indicators of impairment.

The recoverable amount of the goodwill, trademark, brands is determined based on value in use ('VIU') calculated using cash flow projections from financial budgets approved by management covering 5 - 6 year period and the terminal value (after considering the relevant long-term growth rate) at the end of the said forecast periods. The Group has used long-term growth rate of 5% (previous year 5%) and Weighted average cost of capital of 17.30% to 22.60% (previous year 20.3% to 28.43%) for calculation of terminal value. The said cash flow projections are based on the senior management past experience as well as expected market trends for the future periods. The projected cash flows have been updated to reflect the decreased demand for services. The calculation of weighted average cost of capital (WACC) is based on the Group's estimated capital structure as relevant and attributable to the Group. The WACC is also adjusted for specific risks, market risks and premium, and other inherent risks associated with similar type of investments to arrive at an approximation of the WACC of a comparable market participant. The said WACC being pre-tax discount rates reflecting specific risks, are then applied to the above mentioned projections of the estimated future cash flows to arrive at the discounted cash flows. Discount rates represent the market assessment of the risks specific to each entity, taking into consideration the time value of money and individual risks of the underlying assets that have not been incorporated in the cash flow estimates. The discount rate calculation is based on the specific circumstances of the Group and its operating segments and is derived from its WACC. The key assumptions used in the determination of VIU are the terminal growth rates and weighted average cost of capital. Revenue and EBITDA growths are based on average value achieved in preceding years. Also, the growth rates used to extrapolate the cash flows beyond the forecast period are based on industry standards.

Based on the above assumptions and analysis, no impairment was identified as at March 31, 2025 (March 31, 2024: Nil).

- 32** Sections 92-92F of Income-tax Act, 1961 prescribe transfer pricing regulations for computing the taxable income and expenditure from 'international transactions' between 'associated enterprises' on an 'arm's length' basis. These regulations, inter alia, also require the maintenance of prescribed documents and information including furnishing a report from an Accountant within the due date of filing the return of income. The Group has undertaken necessary steps to comply with the Transfer Pricing regulations. The Management is of the opinion that the international transactions are at arm's length, and hence the aforesaid legislation will not have any impact on the consolidated financial statements, particularly on the amount of tax expense and that of provision for taxation.

33 EARNINGS PER SHARE (EPS)

- (a) Basic and diluted EPS amounts are calculated by dividing the profit for the year attributable to owners of the Group by the weighted average number of equity shares outstanding during the year.
- (b) The following table reflects reconciliation of share issued during the year:

Particulars	For the year ended March 31, 2025	For the year ended March 31, 2024

(c) The following table shows computation of Basic and Diluted EPS:

Particulars	For the year ended March 31, 2025	For the year ended March 31, 2024
Profit after tax attributable to the owners for basic and diluted EPS	1,086.56	1,034.66
Weighted average number of equity shares for the purposes of diluted EPS	3,54,40,81,236	3,54,40,81,236
Basic and Diluted Earnings per share (Face value ₹ 1/- per share)	0.30	0.29

(d) Weighted average number of shares is the number of equity shares outstanding at the beginning of the year adjusted by the number of equity shares issued during year, multiplied by the time weighting factor. The time weighting factor is the number of days for which the specific shares are outstanding as a proportion of total number of days during the year.

(e) The earnings per share for all comparative period has been adjusted for the bonus issue (refer note 15(b)).

34 EMPLOYEE BENEFITS

A. Defined contribution plans

The Group makes defined contribution towards provident fund and employee's state insurance which defined contribution plans for qualifying employees. The contributions are made to registered provident fund administered by the government. The obligation of the Group is limited to the amount contributed and it has no further contractual nor any constructive obligation. The expense recognised during the year towards defined contribution plan is ₹ 25.65 million (March 31, 2024: ₹ 21.57 million).

Contributions to defined contribution plan, recognised as expense for the year are as under:

Particulars	For the year ended March 31, 2025	For the year ended March 31, 2024
Employer Provident Fund	24.23	19.03
Employee's State Insurance	1.42	2.54
Total	25.65	21.57

B. Defined Benefit Plans

Gratuity:

The gratuity plan is governed by the Payment of Gratuity Act, 1972. Under the Act, employees who have completed five years of service are entitled to specific benefit. The level of benefit provided depends on the member's length of service and salary retirement age. The employee is entitled to a benefit equivalent to 15 days salary last drawn for each completed year of service with part thereof in excess of six months subject to maximum limit of ₹ 2 million. The same is payable on termination of service or retirement or death whichever is earlier.

The present value of the obligation under such defined benefit plan is determined based on an actuarial valuation as at the reporting date using the projected unit credit method, which recognises each year of service as giving rise to additional unit of employee benefit entitlement and measures each unit separately to build up the final obligation. The obligations are measured at the present value of the estimated future cash flows. The discount rate used for determining the present value of the obligation under defined benefit plans is based on the market yields on Government bonds as at the date of actuarial valuation. Actuarial gains and losses (net of tax) are recognised immediately in the Other Comprehensive Income (OCI).

The principal actuarial assumptions used for estimating the Group's defined benefit obligations are set out below:

Particulars	As at March 31, 2025	As at March 31, 2024
Discount rate	7.15% - 7.40%	7.15% - 7.40%
Future salary increase	10.00%	10.00%

- Up to 30 years	5.00%	5.00%
- From 31 years to 44 years	3.00%	3.00%
- From 44 years to 58 years	2.00%	2.00%

* Indian Assured Lives Mortality (2012-14) Ultimate represents published mortality table used for mortality assumption.

A quantitative sensitivity analysis for significant assumption is as shown below below

Particulars	As at March 31, 2025	As at March 31, 2024
Impact of the change in discount rate		
Present value of obligation at the end of period	82.38	60.83
a) Impact due to increase of 0.50 %	(6.09)	(4.48)
b) Impact due to decrease of 0.50 %	6.77	4.98
Impact of the change in salary increase		
Present value of obligation at the end of period	82.38	60.83
a) Impact due to increase of 0.50 %	5.03	3.67
b) Impact due to decrease of 0.50 %	(4.67)	(3.47)

The sensitivity analyses above have been determined based on a method that extrapolates the impact on the defined benefit obligation as a result of reasonable changes in key assumptions occurring at the end of the reporting year. These analysis are based on a change in a significant assumption, keeping all other assumptions constant and may not be representative of an actual change in the defined benefit obligation as it is unlikely that changes in assumptions would occur in isolation of one another.

The following payments are expected contributions to the defined benefit obligation in future years:

Particulars	As at March 31, 2025	As at March 31, 2024
Year 1 (next annual reporting period)	3.27	2.73
Year 2	2.40	1.71
Year 3	2.86	2.17
Year 4	3.65	2.37
Year 5	3.52	2.83
Year 6 onwards	166.89	97.09
Total expected payments	182.59	108.90

Sensitivities due to mortality & withdrawals are not material & hence impact of change due to these not calculated.

The average duration of the defined benefit plan obligation at the end of the reporting year is 17.47 years (March 31, 2024: 17.51 years).

These assumptions were developed by management with the assistance of independent actuarial appraisers. Discount factors are determined close to each year end by reference to government bonds of relevant economic markets and that have terms to maturity approximating to the terms of the related obligation. Other assumptions are based on management's historical experience.

38 SEGMENT REPORTING

Business segments

The Group is organized into Lines of Business (LOBs) based on its products and services and has following reportable segments based on the nature of the products, the risks and returns, the organisation structure and the internal financial reporting systems. The segment results are regularly reviewed and performance is assessed by its Chief Operating Decision Maker (CODM). CODM's monitors the operating results of its business units separately for the purpose of making decisions about resource allocation and performance assessment.

The following summary describes the operations in each of the Group's reportable segments:

- Air Ticketing:** Through an internet and mobile based platform and call-centres , the Group provides the facility to book and service international and domestic air tickets to ultimate consumer through B2C (Business To Consumer) and B2B2C (Business to Business to Consumer) channel. Both these channels share similar characteristics as they are engaged in facilitation of air tickets. Management believes that it is appropriate to aggregate these two channels as one reporting segment due to similarities in the nature of business.
- Hotels Packages:** The Group provides holiday packages and hotel reservations through call centers and branch offices. The hotel reservations form integral part of the holiday packages and accordingly management believes that it is appropriate to aggregate these services as one reportable segment due to similarities in the nature of services.
- Other services:** Primarily include the income from sale of rail and bus tickets. The other services do not made any of the quantitative thresholds to be a reportable segment for any of the periods presented in these consolidated financial statements. However, management has considered this as the reportable segment and disclosed it separately, since the management believes that information about the segment would be useful to users of the consolidated financial statements.

Adjustments:

- Finance costs, other income and depreciation and amortization are not allocated to individual segments as they are managed at Group level.
- Current tax and deferred tax assets and liabilities are not allocated to individual segments as they are managed at Group level.

Management has assessed that loans, trade receivables, cash and cash equivalents, other bank balances, other financial assets, trade payables, lease liability, other financial liabilities and borrowings approximate their carrying amounts largely due to the short-term maturities of these instruments. The fair values of the mutual funds and quoted equity shares are based on price quotations at the reporting date.

Long-term fixed-rate and variable-rate receivables/borrowings are evaluated by the Group based on parameters such as interest rates, specific country risk factors, individual creditworthiness of the customer and the risk characteristics of the financed project.

41 FAIR VALUE HIERARCHY

All financial instruments for which fair value is recognised or disclosed are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole.

Level 1: This level of hierarchy includes financial assets that are measured by reference to quoted (unadjusted) prices in active markets for identical assets or liabilities.

Level 2: This level of hierarchy includes financial assets that are measured using inputs, other than quoted prices included within level 1, that are observable for such items, directly or indirectly.

42 FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES

The Group's activities are exposed to variety of financial risk; credit risk, liquidity risk and foreign currency risk. The Group's senior management oversees the management of these risks. The Group's senior management ensures that the Group's financial risk activities are governed by appropriate policies and procedures and that financial risks are identified, measured and managed in accordance with the Group's policies and risk objectives. The Group reviews and agrees on policies for managing each of these risks which are summarized below:

(a) Credit risk

Credit risk is the risk that a counter party will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Group is exposed to credit risk from its operating activities (primarily trade receivables), including deposits with banks and financial institutions, foreign exchange transactions and other financial instruments.

(i) Trade receivable & other financial assets :-

The Group exposure to credit risk is influenced mainly by the individual characteristics of each customer and if a customer fails to meet its contractual obligations. The demographics of the customer, including the default risk of the industry and country in which the customer operates, also has an influence on credit risk assessment.

The Group uses a provision matrix to compute the expected credit loss allowance for trade receivables. The provision matrix takes into account available internal credit risk factors such as the Group's historical experience for customers. Based on the business environment in which the Group operates, management considers that the trade receivables are in default (credit impaired) if the payments are more than 180 days past due (other than receivables from related parties). Majority of trade receivables are from domestic customers, which are fragmented and are not concentrated to individual customers.

Trade receivables are typically unsecured. Credit risk is managed by the Group through credit approvals, establishing credit limits and continuously monitoring the creditworthiness of customers to which the Company grants credit terms in the normal course of business.

The ageing analysis of trade receivables as of the reporting date is as follows:

Particulars	Not Due	1 to 30 days	31 to 60 days	61 to 90 days	91 to 180 days	More than 180 days	Total
As at March 31, 2025	900.76	573.41	151.87	961.51	181.97	370.17	3,139.69

(b) Liquidity risk

Liquidity risk is the risk that the Group may not be able to meet its present and future cash and collateral obligations without incurring unacceptable losses. The Group's objective is to, at all times maintain optimum levels of liquidity to meet its cash and collateral requirements. The Group closely monitors its liquidity position and deploys a robust cash management system. It maintains adequate sources of financing including loans from banks at an optimised cost.

The table below summarises the maturity profile of the Group's financial liabilities based on contractual undiscounted payments.

Total	1,375.07	464.86	798.83	23.10	109.19	19.80	1,415.78

(c) Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: interest rate risk, currency risk and other price risk, such as equity price risk and commodity risk. Financial instruments affected by market risk include trade payables in foreign currency.

(i) Foreign currency risk:

The fluctuation in foreign currency exchange rates may have potential impact on the statement of profit or loss, where any transaction references more than one currency or where assets/liabilities are denominated in a currency other than the functional currency of the Group. The Group undertakes transactions denominated in foreign currencies and thus it is exposed to exchange rate fluctuations. The Group has a treasury team which evaluates the impact of foreign exchange rate fluctuations by assessing its exposure to exchange rate risks and advises the management of any material adverse effect on the Group.
